SUBJECT INDEX

KEY TO ABBREVIATIONS

A, abstract of meeting paper
CR, case report
CC, case conference
E, editorial
H, history

L, letter
O, opinion
obit, obituary
R, review

S, symposium paper
SM, Selected Methods
SN, scientific note
SR, special report

(Page nos. in parenthesis indicate corrections.)

AACC

See also Awards, History
AACC Award winners, 1983, 1455
symposia program, 35th national meeting, 1138

ABCC

ABCC certifies 12, 1330, 2133

Abused drugs

adaptation of drugs of abuse assays to a centrifugal analyzer (A), 1243
detection of morphine in urine by hemagglutination inhibition, with use of lyophilized reagents, 1376
effects of various ion pairs of phencyclidine on its recovery during solvent evapn. (A), 1276
GC method for simultaneous detn. of tripeleminine and pentazocine (A), 1280
HPLC method for diazepam, chlorthalidopoxide, and methaqualone in serum (A), 1203
internally referenced test strip immunoassay for morphine (S), 1598
measurement of tetrahydrocannabinol in saliva by competitive binding: performance of oral THC direct RIA kit (A), 1275
RIA for detection of tetrahydrocannabinol metabolites in urine (A), 1199

Accuracy

acceptable limits for precision and accuracy in a long-term qual. control proced. (L), 572
assessment of the fundamental accuracy of the Jendrassik-Grof total and direct bilirubin assays, 31

Acetaminophen

better method for eliminating salicylate interference with measurement of acetaminophen (L), 590
enzymic method for acetaminophen adapted to a centrifugal analyzer (L), 2123
evaln. of an enzymic procedure for measurement of acetaminophen (SN), 358
measurement of acetaminophen in serum with a micro centrifugal analyzer (A), 1237
rapid quantn. of serum acetaminophen by direct acid ferric reduction using a centrifugal analyzer (A), 1237
salicylate interference with measurement of acetaminophen (L), 575
salicylate interference with measurement of acetaminophen—a reply (L), 987
simultaneous detn. of cimetidine, acetaminophen and theophylline by HPLC (A), 1209
specific acetaminophen assay using microbial enzyme—performance data (A), 1252

Acetylcholine

differential effects of two cholinergic agents, acetylcholine and butyrylcholine, on synthesis of HCG in HeLa65 cells (A), 1253

Acetylcholinesterase

acetylcholinesterase screening test for neural tube defect, 1065
quant. enzyme antigen immunoassay of acetylcholinesterase in amniotic fluid, 1061
rat erythrocyte cholinesterase measurement on a centrifugal analyzer (A), 1281

Acetylglucosaminidase

assay of urinary *N*-acetyl- β -glucosaminidase in a centrifugal analyzer, 1717
elevated lysosomal hydrolases in serum of chronic alcoholics (A), 1168
kinetic, automated assay for urinary *N*-acetyl- β -D-glucosaminidase (A), 1159
rapid fluorometric assay of *N*-acetyl- β -D-glucosaminidase in human urine on the centrifugal analyzer (A), 1159

simple, rapid spectrophotom. of urinary *N*-acetyl- β -D-glucosaminidase, with a chromogenic substrate, 1713

N-Acetylprocainamide

fluorescence polarization immunoassay for quantn. of *N*-acetylprocainamide in serum (A), 1237
simultaneous liquid chromatog. assay for procainamide, acetyl procainamide and quinidine (A), 1205

Acetylsalicylic acid

effect of aspirin on detn. of glycosylated Hb (SN), 466, (1328)

Acetylsalicylic acid esterase

improved measurement of acetylsalicylic acid esterase in serum (SN), 491

Acidosis

fetal alcohol syndrome and lactic acidosis (L), 1320

Acid phosphatase

effects of substrate concn. on results of detn. of prostatic acid phosphatase with thymolphthalein monophosphate (SN), 148
in continuously-monitored acid phosphatase methods involving diazotization, bilirubin may cause negative reaction rates (L), 1000
isolation and characterization of electrophoretic variants of prostatic acid phosphatase, 1886
markedly increased prostatic acid phosphatase as measured in a patient by a monoclonal antibody method (L), 739
quality control of acid phosphatase assay improved by direct reconstitution of lyophilized control materials with citric acid (SN), 2093

Acquired immune deficiency syndrome

abnormally high concns. of β_2 -microglobulin in AIDS patients (L), 1560
detection of multiclonal gammopathies in promiscuous males by examining urinary concentrates (A), 1180

Acridinium ester

acridinium esters as high-specific-acty. labels in immunoassay, 1474

ACTH

See Corticotropin

Acute-phase proteins

evolutionary changes in acute-phase proteins in alcoholic hepatocellular diseases, 45

Adenine

HPLC method for detn. of adenine and some adenine metabolites in plasma and urine (A), 1177
sepn. and detection of adenine metabolites by UV and electrochem. detection (A), 1204

Adenocarcinoma

variability of serum prostatic acid phosphatase in patients with stage-D adenocarcinoma of prostate as measured by RIA (A), 1217

Adenylate kinase

cathodal bands in electrophoretograms of CK isoenzymes in serum after cardiac surgery: poor prognostic sign, 1277
extent of inhibition of adenylate kinase isoenzymes in commercial CK-MB (immuno) detns. (A), 1270

Adrenal function

dehydroepiandrosterone sulfate concns. in plasma of normal ovulatory women (L), 1319
direct RIA for aldosterone in plasma, 268

Adrenal hyperplasia

heterozygote detection in congenital adrenal hyperplasia, 48

Adrenocortical function

best conditions for rapid α^{1-24} -corticotropin stimulation test of adrenocortical function (L), 1450

Age-related effects

See Sex- and age-related effects

Alanine aminotransferase

abnormal regulation of pyridoxal 5'-phosphate in Reye's syndrome (SN), 1832
effect of serum pyruvate on ALT and AST in automated chem. reactions (A), 1169
factors affecting measurement of aminotransferases in presence of exogenous pyridoxal phosphate (A), 1181
hepatic infarction: biochem. study (CR), 1850
simultaneous measurement of AST and ALT on the Cobas-Bio centrifugal analyzer (A), 1181
solid-phase reagent strip for colorimetric detn. of serum alanine aminotransferase on the serylizer (A), 1168

Albumin

albumin, prealbumin, and retinol-binding protein in nutritional assessment (A), 1284
continuous-flow system for automation of latex immunoassay by particle counting, 1007
effect of albumin concentration on equil. RIA of serum free thyroxine with labeled thyroxine analog (Amerlex® free T₄) (L), 1861
electroimmunoassay of albumin in human serum: accuracy and long-term precision (SN), 1787
enzyme immunoassay for urinary albumin (SN), 355
evaln. of bromocresol purple method for albumin with the *aca* (L), 1564
heparin does not interfere with measurement of plasma albumin with bromocresol purple (L), 1989
identification of the serum binding proteins for Fe, Zn, Cd, Ni and Ca, 629
immediate reaction (0.5 s) of serum albumin with BCG in a Cobas Bio analyzer (A), 1227
thin-film bromocresol green method for albumin measurement compared with three other methods (A), 1281

Alcohol

See also Ethanol

effect of short-term storage conditions on alcohol concns. in blood from living subjects (SN), 1959
fetal alcohol syndrome and lactic acidosis (L), 1320
reducing equivalents and ethanol metabolism (L), 1997

Alcohol dehydrogenase

interactions between L-thyroxine and alcohol dehydrogenase-dependent ethanol metabolism in livers from DBA-2J mice (A), 1211

Alcoholism

clin. status as reflected in biochem. tests on patients with chronic alcoholic liver disease (L), 992
elevated lysosomal hydrolases in serum of chronic alcoholics (A), 1168
evaln. of serum γ -glutamyltransferase by electrofocusing, and variations in isoform patterns, 1034
reversal of changes in lipoprotein A and lipoprotein B cholesterol during and for a year after a detox. treatment program in chronic alcoholism (SN), 874
serum-5'-nucleotidase and

- γ -glutamyltransferase compared in alcoholism patients after detox. (L), 1448
- Aldolase**
multivariate anal. of plasma enzyme profiles in severe head injury, 107
- Aldosterone**
direct RIA for aldosterone in plasma, 268
- Alkaline phosphatase**
agarose gel electrophoretic sepn. of alkaline phosphatase isoenzymes in tissues from dog and rat, and their use in toxicity assessment (A), 1211
alkaline phosphatase—studies to correlate the Technicon SMAC and DuPont aca (A), 1183
atypical, anodally migrating alk. phosphatase isoenzyme in children and its relation to abdominal symptoms (L), 593
CEA, fast liver alkaline phosphatase, 5'-nucleotidase and cancer (A), 1231
clin. status as reflected in biochem. tests on patients with chronic alcoholic liver disease (L), 992
development of Kodak Ektachem clin. chem. slide assay for alkaline phosphatase (A), 1269
fast liver alkaline phosphatase and metastases (A), 1216
fast liver alkaline phosphatase by two methods (A), 1206
fluorimetry of heat-stable alk. phosphatase (Regan enzyme) acty. in serum from smokers and nonsmokers, 260
improved Corning agarose gel method for alkaline phosphatase isoenzymes (A), 1225
inactivation of alk. phosphatase (L), 996
macromolecular alk. phosphatase and an immunoglobulin G that inhibited alk. phosphatase in a patient's serum (CR), 375
microsampling on the Technicon SMAC (SN), 1531
monoclonal antibodies used to detect human placental alk. phosphatase, 115
origin of anodally migrating alk. phosphatase isoenzyme in transient hyperphosphatemia of infancy (L), 1444
Reference Method for alk. phosphatase acty. in serum, 751
Regan alk. phosphatase isoenzyme in plasma from a lung-carcinoma patient (CR), 715
relative merits of biliary alk. phosphatase isoenzyme and lipoprotein-X in diagnosis of cholestasis (SN), 698
sepn. of alkaline phosphatase isoenzymes by agarose gel electrophoresis: high resolution of liver and bone isoenzymes (A), 1218
sepn. of alk. phosphatase isoenzymes from human kidney and comparison with alk. phosphatases from other human tissues, urine, and *Escherichia coli*, 100
total bone and liver alk. phosphatases in plasma: biol. variations and ref. limits, 634
two macrocomplexes between alk. phosphatase and IgA in a patient's serum (CR), 1845
- Aluminum**
Al, Ba, Si, and Sr in amniotic fluid by emission spectrometry (L), 1318
detn. of Al in serum or plasma (A), 1286
effect of ethanol on uptake and distribution of Al in rabbits (A), 1281
improved detn. of Al in serum by electrothermal at. absorp. spectrophotometry (SN), 1087
quality control sera for routine detn. of Al by electrothermal at. absorp. spectroscopy (SN), 1966
- Alzheimer's disease**
effect of ethanol on uptake and distribution of Al in rabbits (A), 1281

Cancer

anal. of leukemic cells by high-resolution two-dimensional electrophoresis. I: pilot study, 762

biochem. markers in lung cancer (A), 1231

carcinoembryonic antigen: direct quantn. in serum by immunoradiometric assay (A), 1216

β -carotene detd. in serum by liquid chromatog. with an internal std., 1042

CEA, fast liver alkaline phosphatase, 5'-nucleotidase and cancer (A), 1231

clin. and lab. evaln. of a commercial kit for measurement of serum free thyroxine ("Amplex Free T₄") (SN), 164

column enzyme immunoassay for secretory immunoglobulin A in serum (SN), 151

comparison of three thyroglobulin RIAs for management of thyroid cancer patients (A), 1169

complexes of Ig A and G with aspartate aminotransferase isoenzymes in serum (CR), 379

creatinine kinase acty. and isoenzyme pattern in various normal tissues and neoplasms, 2040

creatinine kinase isoenzyme BB: marker of gastric cancer? (L), 390

differential effects of two cholinergic agents, acetylcholine and butyrylcholine, on synthesis of HCG in HeLa65 cells (A), 1253

enzyme immunoassay for carcinoembryonic antigen, 2019

enzyme-linked immunosorbent assay for lactose synthase (galactosyltransferase) in serum, and appln. as a tumor marker in ovarian carcinoma, 1928

estrogen receptor protein-negative, progesterone receptor protein-positive primary breast cancer (A), 1231

estrone sulfate concns. in plasma of normal individuals, postmenopausal women with breast cancer, and men with cirrhosis, 86

fast liver alkaline phosphatase and metastases (A), 1216

fluorimetry of heat-stable alk. phosphatase (Regan enzyme) acty. in serum from smokers and nonsmokers, 260

- hepatitis B and primary liver cancer (A), 1139
high CK MB isoenzyme acty. assoc. with rhabdomyosarcoma (CR), 1549
investigation of NANA and LSA as serum tumor markers for carcinoma of lung (A), 1231
liquid-chromatog. detn. of 5-S-L-cysteinyl-L-dope with electrochem. detection in urine prepurified with a phenylboronate affinity gel, 2031
long-term precision of carcinoembryonic antigen assays (L), 2004
macro creatine kinase types 1 and 2: clin. signif. in neonates and children as compared with adults (CR), 201
modified NAD⁺-coupled spectrophotom. assay for galactosyltransferase (A), 1249
monitoring prostate cancer with prostatic epithelial cell specific antigen: prostate antigen (A), 1253
monoclonal antibodies used to detect human placental alk. phosphatase, 115
optical fiber fluoroprobes in clin. anal. (S), 1678
plasma sialyltransferase level as a tumor marker (A), 1254
possible role of cytochrome P-450 in breast and uterine carcinomas (A), 1217
prostate-specific antigen: quantn. in serum by immunoradiometric assay (A), 1216
prostatic acid phosphatase in diagnosis and monitoring of prostatic cancer (A), 1254
prostatic acid phosphatase: lack of clin. efficacy for screening prostatic cancer in men over 50 (A), 1253
pseudouridine serum levels as biochem. signals for tumor monitoring (A), 1157
radioimmunoassay for a monoclonal antibody-defined tumor marker, CA 19-9 (SN), 549
rapid insulin radioassay for localizing occult insulinomas during surgery (A), 1171
Regan alk. phosphatase isoenzyme in plasma from a lung-carcinoma patient (CR), 715
RIA for pancreatic polypeptide, and its age-related changes in concn., 1923
serum iron, total iron-binding capacity and ferritin status in human malignancy (A), 1215
serum lactate dehydrogenase isoenzyme 1 in a patient with seminoma (L), 1552
serum total, lipid-bound sialic acid and CEA in detection of colorectal cancer (A), 1231
soluble forms of γ -glutamyltransferase in human adult liver, fetal liver, and primary hepatoma compared, 90
spectrophotometry of occult blood in feces, 2022
stability of estrogen- and progesterone-receptor concns. in uterus tissue, 1070
two-site immunochimiluminometric assay for human α -fetoprotein, 1480
unusually high proportion of nonmyocardial creatine kinase MB isoenzyme, in serum of a patient with prostatic cancer (L), 2127
- Carbamazepine**
clin. evaln. of rate nephelometric inhibition immunoassay for carbamazepine (A), 1274
plasma carbamazepine detn. by substrate-labeled fluorescent immunoassay compared with liquid chromatog. and EMIT (L), 1705
semi-automated continuous-flow enzyme immunoassay for antiepileptic drugs in serum (SN), 1790
- Carbonate dehydrase**
proportion of glycosylated Hb in erythrocytes of a person with hemoglobins A, S, and G Philadelphia (CR), 713
- Carbon dioxide**
alternative method for stabilizing CO₂ in serum (L), 993
transcutaneous CO₂ for short-term monitoring of neonates (SN), 1534
- Carbon monoxide**
correction factors for Hb derivatives in fetal blood, measured with IL 282 CO-Oximeter (L), 1555
- Carboxylic ester hydrolases**
improved measurement of acetylsalicylic acid esterase in serum (SN), 491
- Carcinoembryonic antigen**
better linearity in recovery of CEA with Abbott EIA than with Roche RIA (A), 1216
carcinoembryonic antigen: direct quantn. in serum by immunoradiometric assay (A), 1216
carcinoembryonic antigen RIAs: interference by glycosaminoglycans and removal of glycosaminoglycans from plasma samples (A), 1254
CEA, fast liver alkaline phosphatase, 5'-nucleotidase and cancer (A), 1231
- comparison of Roche CEA, Abbott-RIA and Abbott-EIA CEA assays in body fluids (A), 1215
enzyme immunoassay for carcinoembryonic antigen, 2019
interference with carcinoembryonic antigen RIAs by glycosaminoglycans, and their removal, 2049
long-term precision of carcinoembryonic antigen assays (L), 2004
serum total, lipid-bound sialic acid and CEA in detection of colorectal cancer (A), 1231
- Carcinogens**
chemiluminometry of nitrite and N-nitroso compounds in gastric juice (L), 1860
use of laser-excited fluorescence to measure mixed-function oxidase acty. (S), 1616
- Carcinoid syndrome**
urinary 4-hydroxy-3-methoxymandelic, 4-hydroxy-3-methoxyphenylacetic, and 5-hydroxy-3-indoleacetic acids detd. by liquid chromatog. with electrochem. detection (SN), 876
- Cardiac arrhythmia**
frequency of hypomagnesemia in hypokalemic states (SN), 178
- Cardiac disease**
See Heart disease
- β -Carotene**
 β -carotene detd. in serum by liquid chromatog. with an internal std., 1042
- Cascara**
investigations into abnormal accumulation of components of cascara laxative (A), 1284
- Catalase**
serum catalase acty. for detection of hemolytic diseases (L), 741
- Catecholamines**
anal. differences in measurement of plasma catecholamines (L), 735
detn. of urinary vanillylmandelic acid by liquid chromatog. with electrochem. detection (SN), 878
evaln. of liquid chromatog. method for urinary catecholamines (A), 1167
high-pressure reversed-phase-ion pairing-chromatog. sepn.-electrochem. detection of plasma catecholamines (A), 1167
liquid-chromatog. detn. of 5-S-L-cysteinyl-L-dope with electrochem. detection in urine prepurified with a phenylboronate affinity gel, 2031
measurement of catecholamines by HPLC, post-column reaction, and fluorometry (A), 1167
microcomputer program for generating standard curves and calcg. results of routine urine endocrinology tests (A), 1171
modified handling of internal catecholamine stds. in radioenzymic assays (SN), 144
RIA for urinary catecholamines, epinephrine and norepinephrine (A), 1240
sample prepn. with ion-exchange resin before liquid-chromatog. detn. of plasma catecholamines (SN), 1426
stability of catecholamines in urine (L), 595
triarterene interferes in urinary catecholamine anal. (L), 1325
urinary catecholamines: method modifn. comparison and patient studies (A), 1167
urinary 4-hydroxy-3-methoxymandelic, 4-hydroxy-3-methoxyphenylacetic, and 5-hydroxy-3-indoleacetic acids detd. by liquid chromatog. with electrochem. detection (SN), 876
- Cefmenoxime**
liquid-chromatog. assay of cefmenoxime in serum and urine (SN), 1415
- Cefotaxime**
protocol for study of drug interferences in lab. tests: cefotaxime interference in 24 clin. tests, 1736
- Cefoxitin**
cefoxitin interferes with urinary 17-hydroxycorticosteroid detn. (L), 1311
falsely increased values for serum creatinine during therapy with Cefoxitin (L), 1700
kinetics of cefoxitin interference with Jaffé method for creatinine (A), 1259
mechanism of cefoxitin and cephalothin interference with the Jaffé method for creatinine, 2044
- Centrifugal analyzer**
acetylcholinesterase screening test for neural tube defect, 1065
adaptability of Technicon SMAC reagents to Rotochem IIA (A), 1281
adaptation and evaln. of method for detn. of 5'-nucleotidase acty. in serum (A), 1266
adaptation of drugs of abuse assays to a centrifugal analyzer (A), 1243
- adaptation of Jendrassik-Grof bilirubin method for use on Roche Cobas-Bio centrifugal analyzer (A), 1262
anal. of serum apolipoprotein AI levels by turbidimetry using the Cobas-Bio centrifugal analyzer (L), 1228
appln. of candidate ref. method for serum total protein to the Cobas Bio (A), 1265
appln. of serum Fe reagent using AM Blue 610 to a centrifugal analyzer (A), 1263
assay for plasma factor-VII using a centrifugal analyzer and a synthetic fluorogenic substrate for factor Xa (A), 1283
assay of urinary N-acetyl- β -glucosaminidase in a centrifugal analyzer, 1717
automated assay of functional α -antitrypsin and α - α -macroglobulin in serum (A), 1246
automated prothrombin time test using a chromogenic peptide substrate as thrombin indicator (A), 1283
automated spectrophotom. method for measurement of plasma Hb (A), 1281
Ca detn. in biol. systems (A), 1279
centrifugal analyzer used for enzyme immunoassay of progesterone and chorionmammotropin (SN), 302
colorimetric Mg kit adapted to the Roche Cobas-Bio (A), 1235
concurrent measurement of total and direct bilirubin using a Cobas-Bio centrifugal analyzer (A), 1221
Cu in serum measured with the Cobas Bio centrif. analyzer (L), 578
determination of serum and urine Mg with a centrifugal analyzer (L), 2120
detn. of creatinine in biol. systems (A), 1279
detn. of inorganic P content in a biol. specimen (A), 1279
devel. and clin. evaln. of a microcentrif. analyzer method for detg. creatine kinase MB isoenzyme (SN), 533
drug monitoring by fluoroimmunoassay, with use of a centr. analyzer (L), 991
Du Pont acc and Dow AST/ALT-UV (PLP activated)-centrifugal analyzer serum aspartate aminotransferase assays compare well (L), 1701
effect of protein on detn. of total bile acids in serum (SN), 171
EMIT total and free valproic acid using the Flexigem (A), 1276
enzymatic assay for methotrexate with a centr. analyzer (Cobas-Bio) (L), 1317
enzymatic assay of neonatal serum phenylalanine and tyrosine using a centrifugal analyzer (A), 1221
enzymatic detn. of alcohol by Cobas-Bio centrifugal analyzer (A), 1263
enzymic method for acetaminophen adapted to a centrifugal analyzer (L), 2123
evaln. of temp. control in Cobas-Bio centrifugal analyzer (A), 1262
immediate reaction (0.5 s) of serum albumin with BCG in a Cobas Bio analyzer (A), 1227
kinetic assay of pepsin with albumin-bromophenol blue as substrate, 447
kinetic enzymic assay for D(-)-lactate with a centrifugal analyzer (SN), 1823
kinetic enzymic method for automated detn. of total cholesterol in serum (SN), 1798
kinetic measurement of total amylase and isomylase activities with a centrifugal analyzer (SN), 1100
measurement of acetaminophen in serum with a micro centrifugal analyzer (A), 1237
measurement of erythrocyte ATP, DPG, glucose, and lactate with a Cobas-Bio centrifugal analyzer (L), 1855
measurement of leucine aminopeptidase in serum using the Multistat III centrifugal analyzer (A), 1183
multiwavelength kinetic method for calibration of centrifugal analyzer cell temp. (A), 1278
new statistical approach in biochem. method-comparison studies by using Westlake's procedure: appn. to continuous-flow centr. anal., and multilayer film anal. techniques (SN), 1131
permanent vs disposable rotors for centr. analyzers (L), 990
quantn. of C-reactive protein by centr. anal. (SN), 696
quantn. of haptens by homogeneous immunoprecipitation. 2. centr. anal. for tobramycin, phenobarbital, and theophylline in serum (SN), 1540
rapid enzymatic, UV, kinetic procedure for 5'-nucleotidase using the IL Multistat III (A), 1159
rapid fluorometric assay of N-acetyl- β -D-glucosaminidase in human urine on the

centrifugal analyzer (A), 1159
 rapid quantn. of serum acetaminophen by direct acid ferric reduction using a centrifugal analyzer (A), 1237
 rat erythrocyte cholinesterase measurement on a centrifugal analyzer (A), 1281
 salicylate detd. with a microcentrif. analyzer, and compared with Du Pont *aca*, Trinder, and liquid-chromatog. methods (SN), 839
 simultaneous measurement of AST and ALT on the Cobas-Bio centrifugal analyzer (A), 1181
 stability of EMIT standard curves on Cobas-Bio centrifugal analyzer (A), 1200
 total and direct bilirubin assays based on automated modified Jendrassik-Grof procedures (A), 1261
 use of laser-excited fluorescence to measure mixed-function oxidase acty. (S), 1616
 use of Technicon enzyme reagents in the Centrifichem 400 analyzer (A), 1277

Cephalosporins

liquid-chromatog. of cephalosporins and chloramphenicol in serum (SN), 856
 protocol for study of drug interferences in lab. tests: cefotaxime interference in 24 clin. tests, 1736
 reversed-phase HPLC method to det. ceftriaxone in biol. fluids (A), 1157

Cephalothin

mechanism of cefoxitin and cephalothin interference with the Jaffe method for creatinine, 2044

Cerebrospinal fluid

applicns. of Fast Protein Liquid Chromatography[®] in sepn. of plasma proteins in urine and cerebrospinal fluid (S), 1635
 assay of CSF protein: a rate biuret method evald. (SN), 126
 assessment of the benzethonium Cl method for routine detn. of protein in CSF and urine (SN), 343
 automated particle-counting immunoassay of C-reactive protein: appln. to serum, cord serum, and CSF (SN), 1127
 clin. evaln. of Eastman Kodak's Ektachem 400 Analyzer (SN), 498
 CSF IgD in myasthenia gravis (L), 1561
 detn. of total urinary and CSF protein with a new precipitant-dye method (L), 1314
 HPLC anal. of chloramphenicol in serum and CSF (A), 1202

improved sample prepn. before liquid-chromatog. detn. of probenecid in CSF (L), 213
 interference by ascorbate in measurement of CSF glucose by kinetic glucose oxidase/peroxidase procedure (SN), 1810
 interference by metrizamide with Du Pont *aca* method for CSF proteins (L), 395
 interpretation of CSF protein assays in various neurologic diseases, 1028
 metrizamide interference with CSF measurements (A), 1224
 modified periodic acid-Schiff staining of glycoproteins on agarose-film electrophoretograms (SN), 836
 optimized atomic absorption spectrophotometry of Zn in CSF (SN), 486
 protein in patients with various neurologic disorders (A), 1162
 quantn. of L-lactate in biol. fluids using Hitachi 705 clin. analyzer (A), 1284
 questioning the presence of pregnancy-specific β_1 -glycoprotein (or immunoglob. similar material) in CSF (L), 1310
 rapid detection of oligoclonal bands in CSF employing thin-film agarose electrophoresis which does not require cooling (A), 1174
 simultaneous liquid-chromatog. detn. of hypoxanthine, xanthine, urate, and creatinine in CSF, with direct injection (SN), 1543
 unique protein in normal human CSF (SN), 1842
 utility of isoelectric focusing of CSF and serum on agarose evald. for neurolog. patients, 810

Ceruloplasmin

high serum ceruloplasmin acty. in pulmonary tuberculosis (L), 213
 incorporation of Cu into ceruloplasmin and restoration of oxidase acty. (A), 1234, (2072)

Chemical ionization

anal. of plasma prostaglandin E₂ by capillary column gas chromatog.-neg. ion chem. ionization mass spectrometry (A), 1280

Chemical-sensitive field-effect transistors

on-line measurement of K⁺ in blood by chemical-sensitive field-effect transistors: a preliminary report (L), 405

Chemiluminescence

acridinium esters as high-specific-acty. labels in immunoassay, 1474
 chemiluminescence energy transfer technique for measuring ligand-ligand interactions in biol. fluids and intact cells (A), 1251
 chemiluminometry of nitrite and N-nitroso compounds in gastric juice (L), 1860
 further evaln. of luminol-enhanced luminescence in diagnosis of disorders of leukocyte oxidative metab.: role of myeloperoxidase (SN), 513
 homogeneous immunoassay based on chemiluminescence energy transfer (S), 1604
 two-site immunochemiluminometric assay for human α_1 -fetoprotein, 1480

Chemiluminescence immunoassay

solid-phase chemiluminescence immunoassay for plasma estradiol-17 β during gonadotropin therapy compared with two RIAs, 2068

Chloramphenicol

HPLC anal. of chloramphenicol in serum and CSF (A), 1202
 HPLC anal. of chloramphenicol in serum with automated sample preparation using Du Pont Prep I (A), 1203
 liquid-chromatog. of cephalosporins and chloramphenicol in serum (SN), 856
 measurement of chloramphenicol by HPLC using phase inversion extraction (A), 1176
 simplified approach to serum chloramphenicol measurement by HPLC (A), 1205

Chlordiazepoxide

HPLC method for diazepam, chlordiazepoxide, and methaqualone in serum (A), 1203

Chloride

clin. evaln. of liquid membrane Cl ion-selective electrode (A), 1193
 development of a screening system for cystic fibrosis (S), 1593
 quant. colorimetric method for detn. of serum Cl using Technicon RA-1000 system (A), 1255

Chlorophyll

porphyrins and chlorophylls as probes for fluoroimmunoassays (L), 1003

Cholate

bioluminescent assay for total bile acids in serum with use of bacterial luciferase (SN), 1123

Cholecalciferol

24,25-dihydroxyvitamin D₃ in serum: sample purifn. with Sep-Pak C-18 cartridges and liquid chromatog. before protein-binding assay (SN), 1806

Cholecystokinin

RIA of cholecystokinin in human plasma using non cross-reactive antiserum (A), 1171

Cholestasis

relative merits of biliary alk. phosphatase isoenzyme and lipoprotein-X in diagnosis of cholestasis (SN), 698

Cholesterol

adaptation of lipid substrate tests to random-access clin. analyzer (A), 1228
 automated enzymatic cholesterol methods compared with Abell-Kendall method (A), 1228
 case of cholesterol gravel in the urinary tract (L), 745
 cholesterol quantn. by an accurate and precise enzymic method (A), 1226
 clin. lab. evaln. of Ames' Seralyzer Reflectance Photometer for total bilirubin and cholesterol (SN), 844
 detn. of HDL and LDL-cholesterol by cholesterol dehydrogenase (A), 1173
 direct detn. of low density lipoprotein cholesterol by pptn. (A), 1227
 enzymic detn. of total cholesterol in skin (L), 2001
 evaln. of accuracy of 20 different test kits for enzymic detn. of cholesterol, 1916
 evaln. of a kit to measure HDL cholesterol in serum (L), 1311
 gas-chromatog. detn. of cholesterol sulfate in plasma and erythrocytes, for diagnosis of recessive X-linked ichthyosis, 1404
 HDL cholesterol calibration from total cholesterol regression equations (A), 1207
 HDL cholesterol using phosphotungstate-Mg²⁺ and an enzymatic reagent (A), 1227
 improved enzymatic detn. of total cholesterol in tissues (SN), 166
 interlab. proficiency survey of high-density lipoprotein cholesterol measurement (SN), 516
 kinetic enzymic method for automated detn. of total cholesterol in serum (SN), 1798

lipid concns. in serum and EDTA-treated plasma from fasting and nonfasting normal persons, with particular regard to high-density lipoprotein cholesterol (SN), 505
 measurement of HDL cholesterol and its subclasses using dextran sulfate MgCl₂ (A), 1226
 method for quantn. of serum low-density lipoprotein cholesterol (A), 1173
 monoclonal antibodies to plasma low-density lipoproteins. II. evaln. for use in RIA for apolipoprotein B in coronary artery disease, 1898
 on the presence of cholesterol in urinary calculi (L), 1864
 prepn. of soluble apolipoproteins A-I, B, and C-II with a chromatofocusing column, and evaln. of their concns. in serum in pulmonary disease, 1731
 pseudocholinesterase/high-density lipoprotein cholesterol ratio in serum of normal persons and of hyperlipoproteinemics, 1031
 quantn. of high-density-lipoprotein cholesterol by pptn. with phosphotungstic acid/MgCl₂, 2026
 quantn. of lipoprotein cholesterol in serum from children with different lipoprotein profiles: heparin-Ca pptn. and ultracentrif. compared (SN), 481
 reagent for enzymatic detn. of serum total cholesterol with improved lipolytic efficiency (SN), 1075
 relation between plasma cholesterol and in vitro leakage of intra-erythrocytic lactate dehydrogenase and PO₄ into plasma (L), 989
 reversal of changes in lipoprotein A and lipoprotein B cholesterol during and for a year after a detox. treatment program in chronic alcoholism (SN), 874
 stability of high-density-lipoprotein cholesterol in frozen sera (L), 567
 unesterified and esterified cholesterol in Chinese by HPLC (A), 1177

Cholinesterase

evaln. of accuracy of 20 different test kits for enzymic detn. of cholesterol, 1916

Cholinesterase

acetylcholinesterase screening test for neural tube defect, 1065
 comm. available assay system compared with two ref. methods for detn. of plasma cholinesterase variants, 1746
 fluorometric detn. of serum cholinesterase acty. (A), 1194
 improved Ellman procedure for erythrocyte cholinesterase (SN), 365, (2072)
 interlab. study of the proficiency of cholinesterase phenotyping, 786

Cholinesterase inhibitors

improved measurement of acetylsalicylic acid esterase in serum (SN), 491

Cholyglycine

cholyglycine assay in serum by enzyme immunoassay and RIA (A), 1259

Choriogonadotropin

anal. of a study of HCG preps. based on 2nd-IRP standardization (A), 1269
 differential effects of two cholinergic agents, acetylcholine and butyrylcholine, on synthesis of HCG in HeLa65 cells (A), 1253
 dipstick enzyme immunoassay for visual detection of choriogonadotropin (A), 1192
 discrepant values in HCG testing using commercial RIA kits (A), 1171
 DNA interference with RIA procedures, 1912
 evaln. of a solid-phase enzyme immunoassay for choriogonadotropin β subunit (SN), 1964
 evaln. of four serum tests for pregnancy (SN), 561
 evaln. of 10 kits for detn. of choriogonadotropin in serum (SN), 1828
 false-positive results for choriogonadotropin in serum (L), 1871
 five recent urinary tests for early pregnancy evald. (SN), 1812
 highly specific automated hCG RIA using a recyclable antigen chamber (A), 1245
 hormones in saliva: mode of entry and consequent implications for clin. interpretation, 1752
 performance of urine and serum human choriogonadotropin immunoassays in diagnosis of pregnancy in gynecologic emergencies (A), 1161
 qual. enzyme immunoassay for human chorionic gonadotropin in serum (A), 1213
 quantn. of free β -subunit of hCG in the presence of hCG (A), 1217
 quantn. two-site IEMA for serum HCG using single-point calibration (A), 1246
 rapid and sensitive RIA for beta-hCG (A), 1244

serum choriogonadotropin quantn. by two-site ELISA using monoclonal antibodies (A), 1191

specificity of β -choriogonadotropin assays for the hormone and for an immunoreactive fragment present in urine during normal pregnancy (SN), 667

time-resolved fluoroimmunoassay of choriogonadotropin, 60

use of hCG detns. in diagnosis of ectopic pregnancy (A), 1267

use of monoclonal antibody in latex agglutination inhibition assay for choriogonadotropin (A), 1244

use of qual. RIA for urine beta HCG in the emergency room (A), 1161

visual assay for urine HCG using monoclonal antibodies in a simultaneous TEMA (A), 1245

Choriomammotropin

centrifugal analyzer used for enzyme immunoassay of progesterone and choriomammotropin (SN), 302

Chromatofocusing

2-D anal. of serum proteins by fast chromatofocusing followed by electrophoresis (A), 1281

prepn. of alk. phosphatase isoenzymes A-I, B, and C-II with a chromatofocusing column, and evaln. of their concns. in serum in pulmonary disease, 1731

sepn. of alk. phosphatase isoenzymes from human kidney and comparison with alk. phosphatases from other human tissues, urine, and *Escherichia coli*, 100

Chromatography, affinity

affinity procedure for detn. of HbA₁ (A), 1223

apparent instability of Hb: a complication in boronate column assay of glycosylated hemoglobin (A), 1229

effects of whole blood storage on results for glycosylated Hb as measured by ion-exchange chromatog., affinity chromatog., and colorimetry (SN), 1113

glycosylated Hb and plasma glycoprotein assays by affinity chromatog. (A), 1202

glycosylated Hb in uremia: measurement by boronate affinity method 3 correlation with indicators of blood glucose control (A), 1230

glycosylated Hb measured by affinity chromatog.: micro-sample collection and room-temp. storage (SN), 1080

interference of fetal Hb and labile glycosylated Hb with measurements of glycosylated Hb (SN), 543

liquid-chromatog. detn. of 5-S-L-cysteinyl-L-dopa with electrochem. detection in urine prepurified with a phenylboronate affinity gel, 2031

use of immunoaffinity chromatog. for purifn. of ¹²⁵I-labeled prolactin, 241

Chromatography, anion-exchange

adsorption of SCN⁻ by anion-exchange resins and its anal. application (L), 403

applns. of Fast Protein Liquid Chromatography™ in sepn. of plasma proteins in urine and cerebrospinal fluid (S), 1635

"column-batch" method for separating MB and LD₁ in a single fraction, 1741

improved sepn. and quantn. of the "middle molecule" b4-2 in uremia (SN), 703

Chromatography, capillary

anal. of 12 derivatized mycotoxins by gas chromatog. using packed column and gas chromatog./mass spectrometry using fused silica chromatog. capillary (A), 1180

anal. of plasma prostaglandin E2 by capillary column gas chromatog.-neg. ion chem. ionization mass spectrometry (A), 1280

capillary GC assay of disopyramide and its dealkylmetabolite (A), 1249

differentiation and identn. of *Legionella* organisms by capillary GC and GC-MS (A), 1180

variations of 1-deoxyglucose (1,5-anhydroglucitol) content of plasma from patients with insulin-dependent diabetes mellitus, 1396

Chromatography, cation-exchange

anal. of human Hbs by cation-exchange HPLC (A), 1202

creatinine detd. by liquid chromatography, 256

interference of fetal Hb and labile glycosylated Hb with measurements of glycosylated Hb (SN), 543

sepn. and quantn. of Hb by cation-exchange HPLC (A), 1167

sepn. of normal and abnormal human Hbs by cation-exchange HPLC (A), 1196

Chromatography, column

creatinine kinase acty. and isoenzyme pattern in various normal tissues and neoplasms, 2040

estrone sulfate concns. in plasma of normal individuals, postmenopausal women with breast cancer, and men with cirrhosis, 86

evaln. of specific mini-column procedure for A_{1c} HbA_{1c} (A), 1222

influence of minicolumn procedure on apparent Hb A₁ in the presence of Hb J-Baltimore (L), 1444

method for citrulline detn. in plasma (L), 398

stable glycosylated Hb measured by a microcolumn method (L), 1687

Chromatography, exclusion-affinity

centrifugal analyzer used for enzyme immunoassay of progesterone and choriomammotropin (SN), 302

Chromatography, gas-liquid

anal. of 12 derivatized mycotoxins by gas chromatog. using packed column and gas chromatog./mass spectrometry using fused silica chromatog. capillary (A), 1180

capillary gas-chromatog. detn. of urinary homovanillic and vanillylmandelic acids (SN), 828

column deactn. in anal. for underivatized tricyclic antidepressants by gas chromatog. with use of a N detector, 452

detn. of DEHP in pulmonary patients by gas chromatog. (A), 1264

detn. of mexiletine in serum by gas chromatog. with a nitrogen-selective detector (A), 1166

differentiation and identn. of *Legionella* organisms by capillary GC and GC-MS (A), 1180

effects of contaminants in blood-collection devices on measurements of therapeutic drugs, 456

external quality assessment of assays for cortisol in plasma: use of target data obtained by gas chromatog./mass spectrometry (SN), 862

gas-chromat. detn. of propylene glycol in plasma and urine (SN), 2088

gas-chromatog. detn. of cholesterol sulfate in plasma and erythrocytes, for diagnosis of recessive X-linked ichthyosis, 1404

gas-chromatog. detn. of valproic acid in serum without derivatization (L), 990

gas-chromatog. of 3-hydroxybutyrate and lactate in plasma and 3-hydroxybutyrate in whole blood (SN), 319

GC method for simultaneous detn. of triptelennamine and pentazocine (A), 1280

immunoabsorption to improve gas chromatog./high-resolution mass spectrom. of estradiol-17 β in plasma (SN), 677

measurement of nifedipine in plasma by gas-liquid chromatog. and electron-capture detection (SN), 158

preliminary isolation of urinary placental estriol before gas or liquid chromatog. (SN), 2076

profiles of urinary volatiles from metabolic disorders characterized by unusual odors (SN), 1834

time-course of cigarette smoke contamination of clinical H₂ breath-anal. tests (SN), 1980

variations of 1-deoxyglucose (1,5-anhydroglucitol) content of plasma from patients with insulin-dependent diabetes mellitus, 1396

Chromatography, gel-filtration

detn. of glycohemoglobin with single-use boronate microcolumns (A), 1223

quantn. of serum free drug by batch-gel filtration (A), 1248

Chromatography, gel-permeation

improved sepn. and quantn. of the "middle molecule" b4-2 in uremia (SN), 703

Chromatography, immunoaffinity

use of immunoaffinity chromatog. for purifn. of ¹²⁵I-labeled prolactin, 241

Chromatography, ion

new techniques and tools for clin. chem. (S), 1659

Chromatography, ion-exchange

Boehringer immunoinhibition procedure for creatine kinase-MB evald. and compared with column ion-exchange chromatog. (SN), 1115

chromatog. and inhibition method for serum isomylases compared (L), 407

effects of whole blood storage on results for glycosylated Hb as measured by ion-exchange chromatog., affinity chromatog., and colorimetry (SN), 1113

ion-chromatog. measurement of oxalate in unprocessed urine (SN), 369

Chromatography, ion-pair

high-pressure reversed-phase-ion pairing-chromatog. sepn.-electrochem. detection of plasma catecholamines (A), 1167

Chromatography, liquid

anal. differences in measurement of plasma catecholamines (L), 735

anal. of cis-thiothixene in plasma by HPLC (A), 1210

anal. of polyamines in whole blood of psoriatic patients (A), 1177

β -carotene detd. in serum by liquid chromatog. with an internal std., 1042

clin. evaln. of the liquid-chromatog. detn. of urinary free cortisol (SN), 847

concurrent measurement of theophylline and caffeine in neonates by interference-free liquid-chromatog., 1934

creatinine detd. by liquid chromatography, 256

detn. of disopyramide phosphate and its *N*-mono dealkylated metabolite in serum by HPLC (A), 1203

detn. of nifedipine in serum or plasma by reversed-phase liquid chromatog., 1344

detn. of serum mexiletine concns. by HPLC (A), 1201

detn. of the antidepressants maprotiline and amoxapine, and their metabolites, in plasma by liquid chromatog. (SN), 314

detn. of thiamin and thiamin phosphate esters in blood by liquid chromatog. with post-column derivatization (SN), 2073

detn. of urinary vanillylmandelic acid by liquid chromatog. with electrochem. detection (SN), 878

detn. of whole blood serotonin by HPLC with electrochem. detection (A), 1201

drug anal. with dedicated isocratic, solvent-recycled HPLC systems (A), 1249

effect of aspirin on detn. of glycosylated Hb (SN), 466

evaln. of available HPLC methods for detn. of tricyclic antidepressants (A), 1287

evaln. of liquid chromatog. method for urinary catecholamines (A), 1167

evaln. of two methods for serum vancomycin measurement: HPLC and RIA (A), 1180

HPLC anal. of amiodarone and its desalkylmetabolite in plasma, red cell hemolysate, and saliva (A), 1204

HPLC anal. of chloramphenicol in serum and CSF (A), 1202

HPLC method for detn. of adenine and some adenine metabolites in plasma and urine (A), 1177

HPLC method for diazepam, chlordiazepoxide, and methaqualone in serum (A), 1203

HPLC of 5-hydroxyindoleacetic acid in urine (A), 1205

improved micromethod for monitoring clonazepam in serum by HPLC (A), 1202

improved procedure for detn. of MHPG by HPLC with electrochem. detection (A), 1201

"improved" sample extraction before liquid chromatog. of prednisone and prednisolone in serum (L), 2118

improved sample prepn. before liquid-chromatog. detn. of probenecid in CSF (L), 213

increased urinary excretion of free 20 α - and 20 β -dihydrocortisol in a hypercortisolemic but hypocortisolemic patient with Cushing's disease (CR), 385

liquid-chromatog. assay of cefmenoxime in serum and urine (SN), 1415

liquid-chromatog. detn. of aminoglutethimide in plasma (SN), 1104

liquid-chromatog. detn. of indole-3-acetic acid and 5-hydroxyindole-3-acetic acid in plasma, 1354

liquid-chromatog. detn. of lidocaine and its dealkylated metabolites in serum (A), 1203

liquid-chromatog. detn. of nadolol in plasma (SN), 1085

liquid-chromatog. detn. of tobramycin in serum with spectrophotomet. detection (SN), 674

liquid-chromatog. of cephalosporins and chloramphenicol in serum (SN), 856

liquid-chromatog. of creatinine in serum and urine (SN), 851

liquid-chromatog. profiles of urinary porphyrins (SN), 527

liquid-chromatog. profiling of endogenous fluorescent substances in sera and urine of uremic and normal subjects (SN), 675

liquid-chromatog. quantn. of piracetam (SN), 664

liquid-chromatog. sepn. and detn. of coproporphyrin I and III in urine (SN), 350

liquid-chromatog. study of fluorescent materials in uric fluids (SN), 1082

- measurement of chloramphenicol by HPLC using phase inversion extraction (A), 1176
- nonaqueous reversed-phase liquid chromatog. and fluorimetry compared for detn. of retinol in serum (SN), 1431
- "on-line" sample-pretreatment before liquid-chromatog. assay of low-concn. compounds in body fluids, illustrated by triamcinolone assay, 1367
- optimization of HPLC for propoxyphene and norpropoxyphene (A), 1203
- plasma carbamazepine detn. by substrate-labeled fluorescent immunoassay compared with liquid chromatog. and EMIT (L), 1705
- preliminary isolation of urinary placental estriol before gas or liquid chromatog. (SN), 2076
- quant. liquid-chromatog. estn. of bilirubin species in patholog. serum, 800
- reversed-phase liquid-chromatog.
- simultaneous anal. for thiopental and pentobarbital in serum (SN), 1097, (2072)
- salicylate detd. with a microcentrif. analyzer, and compared with Du Pont *aca*, Trinder, and liquid-chromatog. methods (SN), 839
- sample prepn. with ion-exchange resin before liquid-chromatog. detn. of plasma catecholamines (SN), 1426
- serum lipoprotein measurement—liquid chromatog. and sequential floatation (ultracentrif.) compared, 768
- serum provitamin A anal. by HPLC (A), 1158
- simplified liquid-chromatog. anal. for cyclosporin A, and comparison with RIA (SN), 180
- simultaneous detn. of haloperidol and its reduced metabolite in serum and plasma by isocratic liquid chromatog. with electrochem. detection, 624
- simultaneous detn. of retinol and α -tocopherol in serum or plasma by liquid chromatog. (SM), 708
- simultaneous liquid-chromatog. anal. for ethosuximide, primidone, phenobarbital, phenytoin, and carbamazepine in serum (SN), 473
- simultaneous liquid chromatog. assay for procainamide, acetyl procainamide and quindine (A), 1205
- simultaneous quantn. of imipramine and four metabolites in plasma by HPLC (A), 1249
- tech. considerations: use of liq. chromatog. in therapeutic drug monitoring (R), 1331
- unesterified and esterified cholesterol in Chinese by HPLC (A), 1177
- urinary catecholamines: method modifn. comparison and patient studies (A), 1167
- urinary 4-hydroxy-3-methoxymandelic, 4-hydroxy-3-methoxyphenylacetic, and 5-hydroxy-3-indoleacetic acids detd. by liquid chromatog. with electrochem. detection (SN), 876
- Chromatography, reversed-phase**
- anal. and quantn. of meclofenamic acid in plasma using HPLC (A), 1204
- β -carotene detd. in serum by liquid chromatog. with an internal std., 1042
- detection of β -lactamase acty. in serum by reverse-phase HPLC (A), 1206
- detn. of bethanidine in plasma by liquid-chromatog. with a microbore reversed-phase column (SN), 1793
- 24,25-dihydroxyvitamin D₃ in serum: sample purifn. with Sep-Pak C-18 cartridges and liquid chromatog. before protein-binding assay (SN), 1806
- high-pressure reversed-phase-ion pairing-chromatog. sepn.—electrochem. detection of plasma catecholamines (A), 1167
- HPLC anal. of chloramphenicol in serum with automated sample preparation using Du Pont Prep 1 (A), 1203
- HPLC detn. of serum propylthiouracil (A), 1176
- HPLC procedure for plasma bethanidine using a microbore reversed-phase column (A), 1204
- improved liquid-chromatog. detn. of lidocaine and its desethylated metabolites in serum (L), 1572
- kinetically optimized microbore HPLC in high-speed monitoring of theophylline (A), 1158
- liquid-chromatog. assay and identn. of mono- and diester conjugates of bilirubin in normal serum, 1767
- liquid-chromatog. detn. of alpha- and gamma-tocopherols in erythrocytes, with fluorescence detection (SN), 1840
- liquid-chromatog. detn. of nadolol in plasma (SN), 1085
- liquid-chromatog. of cephalosporins and chloramphenicol in serum (SN), 856
- liquid-chromatog. study of fluorescent materials in uremic fluids (SN), 1082
- loxapine/amoxapine and their 7- and 8-hydroxylated metabolites in serum by HPLC (A), 1158
- measurement of catecholamines by HPLC, post-column reaction, and fluorometry (A), 1167
- rapid HPLC of theophylline following microscale protein pptn. (A), 1204
- reversed-phase HPLC method to det. ceftriaxone in biol. fluids (A), 1157
- reversed-phase liquid-chromatog.
- simultaneous anal. for thiopental and pentobarbital in serum (SN), 1097, (2072)
- RP-HPLC assay of tricyclic antidepressants using phenyl columns (A), 1199
- simplified approach to serum chloramphenicol measurement by HPLC (A), 1205
- simultaneous detn. of cimetidine, acetaminophen and theophylline by HPLC (A), 1209
- simultaneous liquid-chromatog. anal. for ethosuximide, primidone, phenobarbital, phenytoin, and carbamazepine in serum (SN), 473
- simultaneous liquid-chromatog. detn. of hypoxanthine, xanthine, urate, and creatinine in CSF, with direct injection (SN), 1543
- solid-state extraction of cortisol from plasma or serum for liquid chromatog. (SN), 1808
- trazodone monitoring by reversed-phase liquid-chromatog. assay (A), 1166
- unconjugated estriol in serum as measured by liquid chromatog. with electrochem. detection, compared with RIA, 1463
- urinary 5-hydroxyindole-3-acetic acid by liquid chromatog. (A), 1202
- Chromatography, reversed-phase ion-pair**
- detn. of urinary normetanephrine and metanephrine by radial-compression liquid chromatog. and electrochem. detection (SN), 305
- Chromatography, thin-layer**
- amniotic fluid phospholipids assessed by one- and two-dimensional thin-layer chromatog. (L), 568
- clin. predictivity of lecithin/sphingomyelin ratios determined by TLC with saturation-sensitive or -insensitive detection methods (A), 1220
- densitometry of phosphatidylcholine and sphingomyelin in high-density lipoproteins (SN), 1435
- economical multiple spotter for thin-layer chromatog. (L), 1689
- high-yield transfer of extract to a thin-layer chromatog. plate (L), 403
- influence of phospholipid satn. on classical thin-layer chromatog. detection methods and its effect on amniotic fluid lecithin/sphingomyelin ratio detns., 250
- micro-anal. for quindine in serum by thin-layer chromatog. followed by fluorescence densitometry (SN), 2100
- non-charring of dipalmitate forms of three phosphatidyl compounds after TLC (A), 1229
- non-charring of dipalmitate forms of three phosphatidyl compounds after TLC (A), 1229
- one-dimensional chromatog. for amino acids on small thin-layer cellulose sheets (L), 744
- rapid drug screening with confirmation using Toxi-Lab (A), 1197
- (3-sn-phosphatidyl)cholines (lecithin) in amniotic fluid, 1951
- Cimetidine**
- cimetidine effect on PTH secretion as measured by PTH-fragment-specific RIA (A), 1171
- effect of cimetidine on verapamil clearance: drug-drug interactions (A), 1210
- simultaneous detn. of cimetidine, acetaminophen and theophylline by HPLC (A), 1209
- Circadian rhythm**
- See also Diurnal variation
- Cirrhosis**
- estrone sulfate concns. in plasma of normal individuals, postmenopausal women with breast cancer, and men with cirrhosis, 86
- evolutionary changes in acute-phase proteins in alcoholic hepatocellular diseases, 45
- Citrulline**
- method for citrulline detn. in plasma (L), 398
- Clinical chemistry**
- advancing in tandem: clinical endocrinol. and clin. chem. (R), 237
- biobimetric evalns. of modern clin. chem. are needed (L), 1858

qual. enzyme immunoassay for human chorionic gonadotropin in serum (A), 1213

quant. enzyme antigen immunoassay of acetylcholinesterase in amniotic fluid, 1061

"sandwich" enzyme immunoassay for serum ferritin with polypropylene test tubes as the solid phase (SN), 681

semi-automated and automated enzyme immunoassays for ethosuximide compared to EMIT and HPLC procedures (A), 1239

semi-automated continuous-flow enzyme immunoassay for antiepileptic drugs in serum (SN), 1790

serum detn. of theophylline, phenytoin, phenobarbital, gentamicin, and tobramycin by fluorescence polarization immunoassay and enzyme immunoassay (A), 1156

solid-phase enzyme immunoassay for measurement of human alpha-fetoprotein (A), 1192

solid-phase enzyme immunoassay for serum luteinizing hormone (A), 1241

spectrophotometric noise in enzyme immunoassay (A), 1241

stability of EMIT standard curves on Cobas-Bio centrifugal analyzer (A), 1200

three commercial methods for serum ferritin compared; high-dose "hook effect" eliminated (SN), 1109

Enzyme inhibition immunoassay
quantn. of serum phenobarbital: therapeutic drug monitoring by enzyme inhibitor immunoassay (A), 1239

Enzyme kinetics
macro CK: aspects of enzyme kinetics (A), 1265

soluble forms of γ -glutamyltransferase in human adult liver, fetal liver, and primary hepatoma compared, 90

Enzyme-labeled immunosorbent assay
automated enzyme-linked immunosorbent assay for detection of platelet antibodies (A), 1283

ELISA microplate assay for IgG and IgM antibody to ss- and ds-DNA (A), 1212

evaln. of new monoclonal ELISA for prostatic acid phosphatase (A), 1241

nonisotopic immunoassay for human prolactin (A), 1268

serum choriogonadotropin quantn. by two-site ELISA using monoclonal antibodies (A), 1191

Enzyme-linked immunoassay
biotin-avidin labelled EIA for quantn. of serum TSH using monoclonal antibodies (A), 1213

ELICA: enzyme-linked immune complex assay for detection of serum immune complexes (A), 1273

noncompetitive enzyme-linked heterogeneous immunoassay with high sensitivity compatible with Du Pont aca (A), 1192

Enzyme-linked immunosorbent assay
ELISA assay for apolipoprotein AII using a monoclonal antibody (A), 1173

enzyme-linked immunosorbent assay for detection of antibodies to extractable nuclear antigens in systemic lupus erythematosus, with nylon as solid phase, 823

enzyme-linked immunosorbent assay for lactose synthase (galactosyltransferase) in serum, and appln. as a tumor marker in ovarian carcinoma, 1928

Enzyme-multiplied immunoassay
anal. of caffeine: comparison of manual EMIT, automated EMIT, and HPLC procedures (A), 1274

cross reactivity of the EMIT digoxin assay with digoxin metabolites, and its validation for measurement of urinary digoxin (SN), 175

EMIT st for emergency drug screening: preliminary experience (A), 1274

EMIT total and free valproic acid using the Flexigem (A), 1276

homogeneous enzyme immunoassay for caffeine in serum (A), 1275

Enzymes
multivariate anal. of plasma enzyme profiles in severe head injury, 107

prognostic value of combined data on enzymes and inflammation markers in plasma in cases of severe head injury, 1904

Enzymic methods
4-aminoantipyrine/3,5-dichlorohydroxybenzenesulfonate as an indicator system for detn. of elevated blood glucose levels in Visidex (A), 1212

automated enzymatic cholesterol methods compared with Abell-Kendall method (A), 1228

automation of BMD-enzymatic creatinine assay: anal. and clin. aspects (A), 1260

bioluminescent assay for total bile acids in serum with use of bacterial luciferase (SN), 1123

cholesterol quantn. by an accurate and precise enzymic method (A), 1226

comparison of Gluc-DH with ref. method for glucose detn. (A), 1224

detn. of HDL and LDL-cholesterol by cholesterol dehydrogenase (A), 1173

detn. of urinary oxalate with commercially available oxalate oxidase (SN), 700

effect of protein on detn. of total bile acids in serum (SN), 171

enzymatic assay for methotrexate with a centrif. analyzer (Cobas-Bio) (L), 1317

enzymatic assay of neonatal serum phenylalanine and tyrosine using a centrifugal analyzer (A), 1221

enzymatic colour test for triglycerides using α -glycero-phosphate-oxidase/FAP-method (A), 1229

enzymatic detn. of alcohol by Cobas-Bio centrifugal analyzer (A), 1263

enzyme-based assays in coagulation testing optimized, 603

enzyme destruction of creatinine to detect interference in Jaffe reaction (A), 1258

enzymic assay for phosphatidylcholine and sphingomyelin in serum, 806

enzymic colorimetry of lecithin and sphingomyelin in aq. soln., 1513

enzymic creatinine assay and direct NH_3 assay in coated thin films, 645

enzymic creatinine assay: new colorimetric method based on H_2O_2 measurement, 1494, (2072)

enzymic detn. of total cholesterol in skin (L), 2001

enzymic detn. of urinary oxalate, with EDTA added to improve recovery (L), 1855

enzymic method for acetaminophen adapted to a centrifugal analyzer (L), 2123

enzymic radiochem. method for detg. phosphatidylglycerol in amniotic fluid, 782

evaln. of accuracy of 20 different test kits for enzymic detn. of cholesterol, 1916

evaln. of an enzymic procedure for measurement of acetaminophen (SN), 358

glucose detn. with Gluc-DH: advantages of highly specific one-step procedure (A), 1224

iminohydrolase procedure for detn. of creatinine in serum and urine (A), 1178

improved enzymatic detn. of total cholesterol in tissues (SN), 166

improved reagent for fixed-time measurement of uric acid (A), 1258

improved uric acid method for Technicon SMAC system (A), 1285

interference by ascorbate in measurement of CSF glucose by kinetic glucose oxidase/peroxidase procedure (SN), 1810

kinetic enzymic method for D-lactate: results in patients with intestinal bypass surgery and other disorders (A), 1215

kinetic methods that are independent of rate of reaction (SN), 2079

Kodak Ektachem 400 Analyzer evald. for automated enzymic detn. of plasma creatinine (SN), 1422

mechanized detn. of glucose using the glucose dehydrogenase method (A), 1224

method for detn. of triglycerides with automatic subtraction of the glycerol blank (A), 1226

micromethod detn. of lactate dehydrogenase isoenzyme C_4 acty. in seminal plasma, 1518

1-min. lactate/pyruvate anal. of whole blood by enzyme polarography (A), 1263

modified NAD^+ -coupled spectrophotom. assay for galactosyltransferase (A), 1249

new, sensitive colorimetric uric acid detn. (A), 1285

peroxidase-coupled method for colorimetric detn. of serum triglycerides (SN), 538

peroxidase-coupled method for detn. of serum triglycerides (A), 1226

quant. alcohol detn. using EMIT-st photometer and reagents (A), 1263

quantifn. of urinary oxalate with oxalate oxidase from beet stems (SN), 1815

quantn. of L-lactate in biol. fluids using Hitachi 705 clin. analyzer (A), 1284

quantn. of serum fatty acid glyceride hydrolysis by enzymatic triglyceride assay with chromatog. methods (A), 1226

reagent for enzymatic detn. of serum total cholesterol with improved lipolytic efficiency (SN), 1075

screening of angiotensin-T converting enzyme acty. with appln. of Kasahara's method to discrete-type automated analyzer (A), 1266

sensitive method for assay of lipase acty. in serum by coupling with β -oxidation enzymes of fatty acid (A), 1182

simplified method for enzymatic urine oxalate assay (A), 1260

specific acetaminophen assay using microbial enzyme—performance data (A), 1252

tableted enzymatic salicylate reagent for Paramax anal. system (A), 1274

tableted triglycerides reagent for the Paramax anal. system (A), 1229

uric acid reagent free of bilirubin and ascorbate interference (A), 1260

urinary oxalate detn. by use of immobilized oxalate oxidase in a continuous-flow system, 16

valproic acid does not interfere with enzymatic detn. of free fatty acids in plasma (L), 1322

vitamin B_6 measured in plasma with a CO_2 -selective electrode (L), 407

Epinephrine
radioenzymatic microassay for simultaneous measurement of picogram quantities of norepinephrine, epinephrine and dopamine in plasma and tissue (A), 1264

RIA for urinary catecholamines, epinephrine and norepinephrine (A), 1240

Errata
See Corrections

Erythrocytes
choice of evacuated blood-collection tube for Mg and Zn assays (L), 1560

equil. model of O_2 association curve of erythrocytes under standardized condition (SN), 1819

free erythrocyte protoporphyrin and zinc protoporphyrin measurements compared as primary screening methods for detection of Pb poisoning, 1467

immunoradiometric assay for erythrocyte complement (C3b) receptor acty. applied to pediatric population with connective tissue disease, 1720

liquid-chromatog. detn. of alpha- and gamma-tocopherols in erythrocytes, with fluorescence detection (SN), 1840

Mn^{2+} -dependent NADPH peroxidase acty. in human erythrocytes (A), 1267

^{22}Na influx into RBCs as diagnostic tool for essential hypertension (A), 1247

Na transport systems in erythrocytes from hypertensive and normotensive adults (A), 1271

rat erythrocyte cholinesterase measurement on a centrifugal analyzer (A), 1281

red cell glutathione peroxidase acty. in Jamaican children with protein energy malnutrition (A), 1214

simultaneous measurement of countertransport and cotransport in erythrocytes (A), 1256

viscosity adaption for automated micromethod of flame at. absorption spectrometry, and intracellular trace-element anal. after pressure decompr: Zn detn. in plasma and erythrocytes, 1522

Esterase
appln. of esterase as a monocyte marker (A), 1159

Estradiol
direct RIA for serum 17β -estradiol (A), 1255

direct serum estradiol assay (L), 1994

evaln. of an RIA for estradiol in unextracted serum (SN), 1961

immunoabsorption to improve gas chromatog./high-resolution mass spectrom. of estradiol- 17β in plasma (SN), 677

solid-phase chemiluminescence immunoassay for plasma estradiol- 17β during gonadotropin therapy compared with two RIAs, 2068

Estriol

automated solid-phase RIA for direct measurement of unconjugated estriol in serum (A), 1268
development and evaln. of four RIAs for estriol in saliva (A), 1254
preliminary isolation of urinary placental estriol before gas or liquid chromatog. (SN), 2076
solid-phase RIA for free estriol in unextracted serum (A), 1267
unconjugated estriol in serum as measured by liquid chromatog. with electrochem. detection, compared with RIA, 1463

Estrogen receptors

estrogen receptor protein-negative, progesterone receptor protein-positive primary breast cancer (A), 1231
lyophilized cytosols as quality control material for estrogen receptor assay (A), 1216
stability of estrogen- and progesterone-receptor concns. in uterus tissue, 1070

Estrogens

See also specific estrogen of interest
estrone sulfate concns. in plasma of normal individuals, postmenopausal women with breast cancer, and men with cirrhosis, 86
125I-labeled RIA kits for progesterone evald. for use in an in vitro fertilization program, 1024
unconjugated estriol in serum as measured by liquid chromatog. with electrochem. detection, compared with RIA, 1463

Estrone

estrone sulfate concns. in plasma of normal individuals, postmenopausal women with breast cancer, and men with cirrhosis, 86
RIA for estrone without chromatog. (A), 1255

Ethacridine

sepn. of bound and free ligand by ethacridine (RivanolTM) in thyroxine RIA, 1937

Ethanol

See also Alcohol
crime, criminal responsibility and alcohol (A), 1151
delayed vapor-alcohol anal. after sorption on silica gel (A), 1235
dipstick methodology for rapid detn. of alcohol in body fluids (A), 1178
effect of ethanol on uptake and distribution of A1 in rabbits (A), 1281
enzymatic detn. of alcohol by Cobas-Bio centrifugal analyzer (A), 1263
interactions between L-thyroxine and alcohol dehydrogenase-dependent ethanol metabolism in livers from DBA-2J mice (A), 1211
kinetic measurement of serum ethyl alcohol (A), 1178
medical aspects of alcoholism (A), 1150
quant. alcohol detn. using EMIT-st photometer and reagents (A), 1263
sex-related variability in effects of alcohol (A), 1150
under the influence: acute effects of alcohol (A), 1149

Ethosuximide

detn. of ethosuximide on Du Pont aca discrete clin. analyzer (A), 1287
semi-automated and automated enzyme immunoassays for ethosuximide compared to EMIT and HPLC procedures (A), 1239
substrate-labeled fluorescent immunoassay for ethosuximide evald. (L), 1567
total automation of SI-FIAs for ethosuximide and valproic acid (A), 1236

Ethylene glycol

propylene glycol interferes with ethylene glycol procedures (L), 727

Exercise, effects of

cardiovascular and renal effects of exercise (A), 1146
fluid and electrolyte balance assocd. with exercise (A), 1145
modified handling of internal catecholamine stds. in radioenzymic assays (SN), 144
physiol. aspects of exercise training and clin. consequences (A), 1147
reproductive and endocrine effects of exercise (A), 1146
skeletal muscle creatine kinase isoenzyme composition in marathon runners (A), 1270

Factor VII

assay for plasma factor VII using a centrifugal analyzer and a synthetic fluorogenic substrate for factor Xa (A), 1283

Factor VIII

development of amidolytic methods for human factor VIII coagulant activity: some problematic considerations (A), 1195

Factor Xa

assay for plasma factor VII using a centrifugal analyzer and a synthetic fluorogenic substrate for factor Xa (A), 1283

Fatty acids

See also Lipids, Triacylglycerols, Triglycerides
2,6-dimethyloctanedioic acid—a metabolite of phytanic acid in Refsum's disease, 434
quantn. of serum fatty acid glyceride hydrolysis by enzymatic triglyceride assay with chromatog. methods (A), 1226
valproic acid does not interfere with enzymatic detn. of free fatty acids in plasma (L), 1322

Feces

the "HemoQuant" test: a specific and quant. detn. of heme (hemoglobin) in feces and other materials, 2061
spectrophotometry of occult blood in feces, 2022

Ferritin

changes in serum iron and leukocyte count in open-heart surgery (SN), 1984
continuous-flow system for automation of latex immunoassay by particle counting, 1007
ferritin concns. in plasma from capillary (finger prick) blood and venous blood (SN), 871
immunoradiometric assay for human heart ferritin using a specific monoclonal antibody (A), 1245
lack of ferritin concn. at the decision level among commercial qual.-control materials (L), 580, (1328)
"sandwich" enzyme immunoassay for serum ferritin with polypropylene test tubes as the solid phase (SN), 681
serum iron, total iron-binding capacity and ferritin status in human malignancy (A), 1215
short-term variability of ferritin concns. in serum of children with severe protein-energy malnutrition (L), 739
significance of hyperferritinuria (L), 2121
ten commercial kits for detn. of serum ferritin compared by use in chronic hemodialysis patients (L), 984
three commercial methods for serum ferritin compared: high-dose "hook effect" eliminated (SN), 1109

Fertility studies

See also Infertility
concns. of dehydroepiandrosterone sulfate in the plasma of normal and abnormal women (L), 1992
solid-phase chemiluminescence immunoassay for plasma estradiol-17 β during gonadotropin therapy compared with two RIAs, 2068

Fertilization

125I-labeled RIA kits for progesterone evald. for use in an in vitro fertilization program, 1024

Fetal status

See also Amniotic fluid, Lecithin/sphingomyelin ratio, etc.
acetone pptn. step is needed in detg. the lecithin sphingomyelin ratio of amniotic fluid (L), 214
amniotic fluid fluorescence polarization value at physiolog. temp.: marked improvement in assessing fetal lung maturity, 264
amniotic fluid lamellar body content and neonatal respiratory status (A), 1221
clin. predictivity of lecithin/sphingomyelin ratios determined by TLC with saturation-sensitive or -insensitive detection methods (A), 1220
correction factors for Hb derivatives in fetal blood, measured with IL 282 CO-Oximater (L), 1555
dipalmitoylphosphatidylcholine in amniotic fluid quantified by fast-atom-bombardment mass spectrometry, 1349
enzymic radiochem. method for detg. phosphatidylglycerol in amniotic fluid, 782
fetal lung maturity assessed by fluorescence polarization: evaln. of predictive value, correction for endogenous fluorescence, and comparison with L/S ratio (SN), 346, (1328)
fluorometric procedure for detg. "lamellar body" phospholipids in the particulate fraction of amniotic fluid after filtration (SN), 362
influence of phospholipid satn. on classical thin-layer chromatog. detection methods and its effect on amniotic fluid lecithin/sphingomyelin ratio detns., 250
pH measurement with a fiber-optic tissue-pH monitor and a standard blood-pH meter (L), 1566
relations among amniotic fluid dipalmitoyl lecithin, postpartum respiratory compliance, and neonatal respiratory distress syndrome, 650

(3-sn-phosphatidyl)cholines (lecithin) in amniotic fluid, 1951
specific vs nonspecific methods for amniotic fluid creatinine measurements (A), 1221
use or abuse of fluorescence polarization measurement of amniotic fluid for detn. of fetal lung maturity? (L), 1565

Fetoprotein

acetylcholinesterase screening test for neural tube defect, 1065
acridinin esters as high-specific-acty. labels in immunoassay, 1474
alpha-fetoprotein concns. in maternal serum: relation to race, body weight (SN), 531
amniotic fluid alpha-fetoprotein reactivity to *Lens culinaris* agglutinin and concanavalin A in crossed-affinity immunoelectrophoresis: ancillary tests in prenatal diagnosis of severe fetal malformations, 21, (1328)
development of immunoenzymatic assay for alpha-fetoprotein (A), 1217
sensitive RIA for measurement of low levels of alpha-fetoprotein in serum (A), 1215
solid-phase enzyme immunoassay for measurement of human alpha-fetoprotein (A), 1192
two-site immunochemiluminometric assay for human α_1 -fetoprotein, 1480

Fibrinogen

clin. and exptl. utilization of modified RIA for B β 15-42 related peptides (A), 1161
development and anal. performance of a functional assay for fibrinogen on the Du Pont acaTM Analyzer, 614
solid-phase RIA of fragment D of fibrinogen by use of a low-affinity monoclonal antibody, 778

Fibrinopeptide

mol. markers of hemostatic disorders: implications in diagnosis and therapeutic management of thrombotic and bleeding disorders (S), 1641

Flame photometry

See Flame spectroscopy

Flame spectroscopy

evaln. of a direct potentiometric method for Na and K used in the Du Pont aca (SN), 1090
Na anal. in hyperlipidemia: comparison between flame photometry, direct and indirect potentiometry (A), 1193
Na measurements and protein content: flame photometry, indirect potentiometry, corrected and uncorrected potentiometry compared (A), 1188
potentiometry of Na⁺ in undil. serum and urine with improved neutral carrier-based solvent polymeric membrane electrode, 1508
trace metals anal. by laser-enhanced ionization in flames (S), 1683

Flow cytometry

hematology: quant. cytochem., image anal., and flow cytometry (A), 1141

Flow-injection analysis

controlled dispersion anal.: flow-injection anal. without injection (SN), 332
flow injection anal.: new approach to automation (A), 1155
more on flow injection/atomic absorption anal. for electrolytes (L), 568

Fluorescence densitometry

micro-anal. for quinidine in serum by thin-layer chromatog. followed by fluorescence densitometry (SN), 2100

Fluorescence immunoassay

See Fluorimmunoassay, Immunoassay

Fluorescence polarization

amniotic fluid fluorescence polarization value at physiolog. temp.: marked improvement in assessing fetal lung maturity, 264
antiepileptics and theophylline monitoring by fluorescence polarization immunoassay (A), 1157
automated fluorescence polarization immunoassay for monitoring kanamycin (A), 1276
comparison of Abbott TDX gentamicin and tobramycin assays to Syva EMIT (A), 1175
digoxin assay by fluorescence polarization (A), 1237
digoxin assay by fluorescence polarization immunoassay and RIA methods (A), 1179
evaln. of and service experience with fluorescence polarization immunoassay for digoxin (A), 1175
evaln. of fluorescence polarization immunoassay for digoxin on the Abbott TDX analyzer (A), 1201
evaln. of rapid fluorescence polarization immunoassay for digoxin (A), 1239

- evaln. of serum digoxin assay by fluorescence polarization immunoassay (A), 1237
- evaln. of theophylline assay by fluorescence polarization immunoassay (A), 1238
- fetal lung maturity assessed by fluorescence polarization: evaln. of predictive value, correction for endogenous fluorescence, and comparison with L/S ratio (SN), 346, (1328)
- fluorescence polarization analyzer (TDx) for measurement of aminoglycosides and theophylline (A), 1199
- fluorescence polarization assay for unsaturated thyroxine-binding sites (A), 1185
- fluorescence polarization immunoassay for brain creatine kinase (A), 1194
- fluorescence polarization immunoassay for quantitating serum thyroxine (A), 1185
- fluorescence polarization immunoassay for quantn. of methotrexate (A), 1274
- fluorescence polarization immunoassay for quantn. of *N*-acetylprocainamide in serum (A), 1237
- fluorescence polarization immunoassay for quantn. of valproic acid (A), 1275
- fluorescence polarization immunoassay of serum digoxin: comparison of the Abbott immunoassay with the Amerlex RIA (L), 586
- general method for routine clin. chem. on Abbott Analyzer (A), 1251
- pediatric protocol for TDx FPIA assays (A), 1273
- polarized emission components as response variables in fluorescence immunoassays (A), 1179
- serum detn. of theophylline, phenytoin, phenobarbital, gentamicin, and tobramycin by fluorescence polarization immunoassay and enzyme immunoassay (A), 1156
- stability and consistency of fluorescence polarization immunoassay for quantn. of drug levels in human serum or plasma (A), 1199
- use or abuse of fluorescence polarization measurement of amniotic fluid for detn. of fetal lung maturity? (L), 1565

- evaln. of Accu-Chek BG for rapid quant. whole blood glucose detns. (A)**, 1284
- evaln. of accuracy of 20 different test kits for enzymic detn. of cholesterol**, 1916
- evaln. of a kit to measure HDL cholesterol in serum (L)**, 1311
- evaln. of Ames Seralyzer for detn. of whole blood Hb (A)**, 1212
- evaln. of an RIA for estradiol in unextracted serum (SN)**, 1961
- evaln. of 10 kits for detn. of choriogonadotropin in serum (SN)**, 1828
- evaln. of reagent strip method for urine specific gravity (A)**, 1259
- falsely negative values for creatine kinase isoenzyme MB by the Isomune CK-MB assay, and a solution to the problem (L)**, 1451
- five recent urinary tests for early pregnancy evald. (SN)**, 1812
- free thyroxine by RIA: evaln. of direct method involving a radiolabeled thyroxine analog**, 1781
- further evaln. of specific gravity test strip (L)**, 1551
- Gelman kit modified (L)**, 2121
- ¹²⁵I-labeled RIA kits for progesterone evald. for use in an in vitro fertilization program**, 1024
- improved dialysis method for free thyroxine in serum compared with five commercial RIAs in nonthyroidal illness and subjects with abnormal concns. of thyroxine-binding globulin**, 816
- improved enzymatic detn. of total cholesterol in tissues (SN)**, 166
- "improved" vitamin B₁₂ assays: report on four commercial kits (L)**, 582
- internally referenced test strip immunoassay for morphine (S)**, 1598
- kits for measurement of free thyroxine (L)**, 1317
- long-term precision of carcinoembryonic antigen assays (L)**, 2004
- meaning of serum free-thyroxine values in nonthyroidal illnesses: seven methods compared (SN)**, 2091
- measurement of serum Ca by use of a kit (L)**, 1315
- measurement of tetrahydrocannabinol in saliva by competitive binding: performance of oral THC direct RIA kit (A)**, 1275
- modified handling of internal catecholamine stds. in radioenzymic assays (SN)**, 144
- more on the Phadebas IsoAmylase Test (L)**, 597
- more on vitamin B₁₂ results as measured with "boil" and "no-boil" kits (L)**, 2115
- nonlinear regression-kinetic method for quantn. of serum triglycerides**, 1392
- on standards provided with digoxin RIA kits (L)**, 734
- possible interference with Helena Laboratories' method for phosphatidylglycerol (L)**, 404

reaction-rate method for detg. amylase and isoamylase (L), 586

reagent for enzymatic detn. of serum total cholesterol with improved lipolytic efficiency (SN), 1075

reagent strip measurement of urine specific gravity with Ames Clin-Tek (A), 1164

reagent strip (Visidex) for detn. of glucose in whole blood, 438

reliability of kit methods for free thyroxine: the Corning Test System (L), 1322

RIA of bile acids in tissue, bile, urine (SN), 494

RIA of cortisol in saliva with the "GammaCoat" kit (L), 1869

salivary urea nitrogen index of renal function: test-strip method (SN), 1825

serum lactate dehydrogenase isoenzyme-1: effect of time of sampling and total serum LD acty. on diagnostic efficacy (L), 589

seven digoxin immunoassay kits compared: interference by a digoxin-like immunoreactive substance in serum from premature and full-term infants (SN), 1972

solid-phase reagent strip for colorimetric detn. of serum alanine aminotransferase on the Seralyzer (A), 1168

solid-phase reagent strip for colorimetric detn. of serum aspartate aminotransferase on the Seralyzer (A), 1267

solid-phase reagent strip test for colorimetric detn. of serum triglycerides on the Seralyzer (A), 1247

split-products of α -amylase with oligosaccharides and their PNP-derivatives—evaln. of 5 commercially available test kits (A), 1182

systematic evaln. of TSH kits: package insert data as initial screen (A), 1184

tableted α -amylase kinetic assay reagent with enhanced sensitivity (A), 1250

ten commercial kits for detn. of serum ferritin compared by use in chronic hemodialysis patients (L), 994

test-strip screen for optimization of microscopic urinalysis (L), 1692

three commercial methods for serum ferritin compared: high-dose "hook effect" eliminated (SN), 1109

"unbound analog" RIAs for free thyroxine measure albumin-bound hormone fraction, 1408

Laboratory safety

low prevalence of hepatitis B virus serological markers and risk of HBV infection in hospital employees (A), 1206

β -Lactamase

detection of β -lactamase acty. in serum by reverse-phase HPLC (A), 1206

Lactate

gas-chromatog. of 3-hydroxybutyrate and lactate in plasma and 3-hydroxybutyrate in whole blood (SN), 319

kinetic enzymic assay for D(-)-lactate with a centrifugal analyzer (SN), 1823

kinetic enzymic method for D-lactate, results in patients with intestinal bypass surgery and other disorders (A), 1215

measurement of erythrocyte ATP, DPG, glucose, and lactate with a Cobas-Bio centrifugal analyzer (L), 1855

1-min. lactate/pyruvate anal. of whole blood by enzyme polarography (A), 1263

quantn. of L-lactate in biol. fluids using Hitachi 705 clin. analyzer (A), 1284

Lactate dehydrogenase

accuracy of lactate dehydrogenase isoenzyme estns. by a thin-layer agarose fluorescent technique: ternary and quaternary mixtures of purified LDH isoenzymes (SN), 2096

CK/LDH isoenzymes and low prevalence of AMI in a community hospital (A), 1220

"column-batch" method for separating MB and LD₁ in a single fraction, 1741

comments: proposed Selected Method for electrophoresis of LDH isoenzymes (L), 1446

comparison of three methods of detn. of serum lactate dehydrogenase isoenzymes (A), 1265

creatinine kinase and lactate dehydrogenase: stability of isoenzymes and their acty. in stored plasma and prostatic tissue extracts and effect of sample diln. (SN), 832

development of Kodak Ektachem clin. chem. slide for lactate dehydrogenase (A), 1168

electrophoresis of lactate dehydrogenase isoenzymes (SM), 189

hepatic infarction: biochem. study (CR), 1850

interference of ascorbic and homogentisic acids in urine lactate dehydrogenase anal. (A), 1219

interpretation of serum LD-1 abnormality by electrophoresis for myocardial infarct (A), 1219

in vitro stability of immunochem.-isolated lactate dehydrogenase isoenzyme 1 acty. (A), 1233

lactate dehydrogenase isoenzyme-5 and the predictive power of total lactate dehydrogenase in myocardial infarction, 774

lactate dehydrogenase isoenzymes in human milk—prelim. study (L), 1568

lactate dehydrogenase isoenzyme 6 with increased creatine kinase BB isoenzyme (L), 1443

LD-6: a sign of impending death (A), 1218

LD isoenzyme 6: I. biochem. properties and clin. significance (A), 1168

micromethod detn. of lactate dehydrogenase isoenzyme C₂ acty. in seminal plasma, 1518

multivariate anal. of plasma enzyme profiles in severe head injury, 107

on electrophoresis of lactate dehydrogenase isoenzymes (L), 1700

partial characterization, properties, and clin. significance of lactate dehydrogenase-immunoglobulin A₂ complex in serum, 272

relation between plasma cholesterol and in vitro leakage of intra-erythrocytic lactate dehydrogenase and PO₄ into plasma (L), 989

selective spectrophotometry of the five isoenzymes of lactate dehydrogenase, based stabilities at alkaline pH, 1941

serum lactate dehydrogenase in chronic lymphocytic leukemia (A), 1215

serum lactate dehydrogenase isoenzyme-1: effect of time of sampling and total serum LD acty. on diagnostic efficacy (L), 589

serum lactate dehydrogenase isoenzyme 1 in a patient with seminoma (L), 1552

serum LD-1 acty. in suspected acute myocardial infarction, 1057

unusual lactate dehydrogenase isoenzyme pattern in rhabdomyolysis (L), 1562

Lactose

urinary lactose and galactose in infants and children (A), 1233

Lactose malabsorption

sensy. and specificity of the H₂ breath anal. test for detecting malabsorption of physiol. doses of lactose (SN), 545

Lactose synthase

enzyme-linked immunosorbent assay for lactose synthase (galactosyltransferase) in serum, and appln. as a tumor marker in ovarian carcinoma, 1928

Lamellar body

amniotic fluid lamellar body content and neonatal respiratory status (A), 1221

Lanthanide chelates

time-resolved fluorometer for lanthanide chelates—a new generation of nonisotopic immunoassays, 65

Lasers

trace metals anal. by laser-enhanced ionization in flames (S), 1683

use of laser-excited fluorescence to measure mixed-function oxidase acty. (S), 1616

Latex agglutination

nephelometric detn. of C-reactive protein, antistreptolysin O and rheumatoid factors by latex agglutination tests (A), 1189

Latex agglutination inhibition assay

use of monoclonal antibody in latex agglutination inhibition assay for choriogonadotropin (A), 1244

Lead

free erythrocyte protoporphyrin and zinc protoporphyrin measurements compared as primary screening methods for detection of Pb poisoning, 1467

high-efficiency aerosol deposition for measuring Pb in blood by furnace AAS (A), 1280

relationship of airborne lead to sudden infant death and cord blood lead (A), 1222

Lecithin

enzymic colorimetry of lecithin and sphingomyelin in aq. soln., 1513

influence of phospholipid satn. on classical thin-layer chromatog. detection methods and its effect on amniotic fluid lecithin/sphingomyelin ratio detns., 250

relations among amniotic fluid dipalmitoyl lecithin, postpartum respiratory compliance, and neonatal respiratory distress syndrome, 650

(3-sn-phosphatidyl)cholines (lecithin) in amniotic fluid, 1951

Lecithin:cholesterol acyltransferase

lecithin:cholesterol acyltransferase acty. in plasma of patients with multiple sclerosis (L), 1995

Lecithin/sphingomyelin ratio

acetone pptn. step is needed in detg. the lecithin/sphingomyelin ratio of amniotic fluid (L), 214

amniotic fluid fluorescence polarization value at physiolog. temp.: marked improvement in assessing fetal lung maturity, 264

clin. predictivity of lecithin/sphingomyelin ratios determined by TLC with saturation-sensitive or -insensitive detection methods (A), 1220

enzymic colorimetry of lecithin and sphingomyelin in aq. soln., 1513

enzymic radiochem. method for detg. phosphatidylglycerol in amniotic fluid, 782

fetal lung maturity assessed by fluorescence polarization: evaln. of predictive value, correction for endogenous fluorescence, and comparison with L/S ratio (SN), 346, (1329)

fluorometric procedure for detg. "lamellar body" phospholipids in the particulate fraction of amniotic fluid after filtration (SN), 362

influence of phospholipid satn. on classical thin-layer chromatog. detection methods and its effect on amniotic fluid lecithin/sphingomyelin ratio detns., 250

Legionnaires' disease

differentiation and identn. of Legionella organisms by capillary GC and GC-MS (A), 1180

Lens culinaris agglutinin

amniotic fluid alpha-fetoprotein reactivity to Lens culinaris agglutinin and concanavalin A in crossed-affinity immunoelectrophoresis: ancillary tests in prenatal diagnosis of severe fetal malformations, 21

Leucine aminopeptidase

measurement of leucine aminopeptidase in serum using the Multistat III centrifugal analyzer (A), 1183

Leukemia

improved turbidimetric assay for lysozyme in urine, 1488

Leukocytes

anal. of leukemic cells by high-resolution two-dimensional electrophoresis. I: pilot study, 762

changes in serum iron and leukocyte count in open-heart surgery (SN), 1984

characteristics of high-affinity folate binding in leukocytes (SN), 869

clin. trial of leukocyte test strips in routine use (L), 997

further evaln. of luminol-enhanced luminescence in diagnosis of disorders of leukocyte oxidative metab.: role of myeloperoxidase (SN), 513

immunoassay for human granulocyte elastase/ α_1 -proteinase inhibitor complex (A), 1179

test-strip screen for optimization of microscopic urinalysis (L), 1692

Lidocaine

improved liquid-chromatog. detn. of lidocaine and its desethylated metabolites in serum (L), 1572

lidocaine is stable in serum and blood (L), 1564

liquid-chromatog. detn. of lidocaine and its dealkylated metabolites in serum (A), 1203

radial partition immunoassay for lidocaine (A), 1273

Light-chain proteins

evaln. of the Coomassie Brilliant Blue G-250 method for urinary protein, 1946

Lipase

characterization and elimination of a factor in serum that interferes with turbidimetry and nephelometry of lipase, 96

comparison of serum amylase and lipase acty. in pancreatitis and chronic renal failure patients (A), 1250

evaln. of RIA specific for human pancreatic lipase (A), 1244

immunoquantn. of total apolipoprotein B in serum by nephelometry: influence of lipase and detergents, 1045

improved turbidimetric assay for pancreatic lipase at 37 °C (A), 1182

pancreatic lipase in serum of patients with β -thalassaemia major (L), 2003

postheparin plasma lipoprotein lipase and hepatic triglyceride lipase activities in patients with primary asymptomatic gout (L), 2124

selective measurement of lipoprotein lipase and hepatic lipase (SN), 154

sensitive method for assay of lipase acty. in serum by coupling with β -oxidation enzymes of fatty acid (A), 1182

variations in amylase isoenzymes and lipase during acute pancreatitis, and in other disorders causing hyperamylasemia, 1020

Lipids

adaptation of lipid substrate tests to random-access clin. analyzer (A), 1228

- blood lipid levels in controlled and uncontrolled diabetic patients (A), 1228
description of water displacement, a major measurement problem (A), 1229
development and prelim. evaln. of an infrared method for serum lipid anal. (A), 1177
Intralipid parenteral nutrition soln. causes major interferences with common chem. tests (A), 1248
lipid concns. in serum and EDTA-treated plasma from fasting and nonfasting normal persons, with particular regard to high-density lipoprotein cholesterol (SN), 505
simple quantn. of serum lipid fractions (L), 209
- Lipoproteins**
appln. of polyacrylamide gel electrophoresis to quantn. of lipoproteins (A), 1225
cryoscopic behavior of isolated Lp(a), and possible consequences for its use as a standard (L), 1856
densitometry of phosphatidylcholine and sphingomyelin in high-density lipoproteins (SN), 1435
detrn. of HDL and LDL-cholesterol by cholesterol dehydrogenase (A), 1173
direct detrn. of low density lipoprotein cholesterol by pptn. (A), 1227
evaln. of a kit to measure HDL cholesterol in serum (L), 1311
HDL cholesterol calibration from total cholesterol regression equations (A), 1207
HDL cholesterol using phosphotungstate-Mg²⁺ and an enzymatic reagent (A), 1227
interlab. proficiency survey of high-density lipoprotein cholesterol measurement (SN), 516
lipid concns. in serum and EDTA-treated plasma from fasting and nonfasting normal persons, with particular regard to high-density lipoprotein cholesterol (SN), 505
measurement of HDL cholesterol and its subclasses using dextran sulfate MgCl₂ (A), 1226
method for quantn. of serum low-density lipoprotein cholesterol (A), 1173
methodology and standn. of apolipoprotein A-I immunoassays (R), 415
methodology and standn. of apolipoprotein B immunoassays (R), 427
monoclonal antibodies to plasma low-density lipoproteins. I. enhanced binding of ¹²⁵I-labeled LDL by use of two monoclonal antibodies, 1890
monoclonal antibodies to plasma low-density lipoproteins. II. evaln. for use in RIA for apolipoprotein B in coronary artery disease, 1898
postheparin plasma lipoprotein lipase and hepatic triglyceride lipase activities in patients with primary asymptomatic gout (L), 2124
pseudocholinesterase/high-density lipoprotein cholesterol ratio in serum of normal persons and of hyperlipoproteinemics, 1031
quantn. of high-density-lipoprotein cholesterol by pptn. with phosphotungstic acid/MgCl₂, 2026
quantn. of lipoprotein cholesterol in serum from children with different lipoprotein profiles: heparin-Ca pptn. and ultracentrif. compared (SN), 481
rapid isolation of C apolipoproteins from human VLDL (A), 1173
reversal of changes in lipoprotein A and lipoprotein B cholesterol during and for a year after a detoxn. treatment program in chronic alcoholism (SN), 874
selective measurement of lipoprotein lipase and hepatic lipase (SN), 154
serum lipoprotein measurement—liquid chromatog. and sequential floatation (ultracentrif.) compared, 768
specific prepn. of low-density lipoproteins in complex with heparin at pH 5.12 (A), 1173
stability of high-density-lipoprotein cholesterol in frozen sera (L), 567
ultracentrif. in swinging-bucket and fixed-angle rotors evald. for isolation and detrn. of high-density lipoprotein subfractions HDL₂ and HDL₃, 656
- Lipoprotein-X**
relative merits of biliary alk. phosphatase isoenzyme and lipoprotein-X in diagnosis of cholestasis (SN), 698
- Liposomes**
EMIA: a nonradioisotopic method for quantn. of specific antigens (A), 1213
novel liposome composition for rapid colorimetric test for systemic lupus erythematosus (S), 1587
- Lithiasis**
See Calculous disease
- Lithium**
Li ratio and tricyclic antidepressant drug ratio compared (A), 1198
- Liver disease**
See also Liver function, hepatic disease
abnormal regulation of pyridoxal 5'-phosphate in Reye's syndrome (SN), 1832
bioluminescent assay for total bile acids in serum with use of bacterial luciferase (SN), 1123
clin. implications of differences between two recommended procedures for detrn. of aspartate aminotransferase (SN), 523
clin. status as reflected in biochem. tests on patients with chronic alcoholic liver disease (L), 992
complexes of Ig A and G with aspartate aminotransferase isoenzymes in serum (CR), 379
enzymic assay for phosphatidylcholine and sphingomyelin in serum, 806
evolutionary changes in acute-phase proteins in alcoholic hepatocellular diseases, 45
hepatic triglyceride lipase acty. in plasma of patients with fatty liver, after treatment with heparin (L), 726
improved turbidimetric assay for lysozyme in urine, 1488
marked post-op. increase in serum aspartate aminotransferase acty. (L), 1323
mathematical and computer-assisted procedures in diagnosis of liver and biliary tract disorders (A), 1140
serum lipoprotein measurement—liquid chromatog. and sequential floatation (ultracentrif.) compared, 768
soluble forms of γ -glutamyltransferase in human adult liver, fetal liver, and primary hepatoma compared, 90
two macrocomplexes between alk. phosphatase and IgA in a patient's serum (CR), 1845
- Liver function**
See also Liver disease
effect of protein on detrn. of total bile acids in serum (SN), 171
hepatic infarction: biochem. study (CR), 1850
- Loxapine**
loxapine/amoxapine and their 7- and 8-hydroxylated metabolites in serum by HPLC (A), 1158
- Luciferase**
bioluminescent assay for total bile acids in serum with use of bacterial luciferase (SN), 1123
screening for neonatal Duchenne muscular dystrophy by bioluminescence measurement of creatine kinase in blood spotted on paper (SN), 161
- Luminescence**
solid-phase antigen luminescence technique for thyroxine detns. (A), 1242
- Lung disease**
biochem. markers in lung cancer (A), 1231
direct spectrophotometry of angiotensin converting enzyme in serum (SN), 1093
investigation of NANA and LSA as serum tumor markers for carcinoma of lung (A), 1231
prepn. of soluble apolipoproteins A-I, B, and C-II with a chromatofocusing column, and evaln. of their concns. in serum in pulmonary disease, 1731
- Lupus erythematosus**
absorbance nephelometry of C1q-precipitable immune complexes: method comparisons and clin. correlations (SN), 2082
interpretation of CSF protein assays in various neurologic diseases, 1028
- Lutropin**
dipstick enzyme immunoassay for human luteinizing hormone in urine (A), 1192
solid-phase enzyme immunoassay for serum luteinizing hormone (A), 1241
time-resolved fluorimmunoassay of choriongonadotropin, 60
utilization of acrylamide columns to facilitate direct measurement of human urinary follicle stimulating hormone and luteinizing hormone by RIA (A), 1253
- Lymphocytes**
glycylprolyl dipeptidylaminopeptidase in subpopulations of peripheral blood lymphocytes (A), 1266
immunoenzymatic method for enumeration of T and B lymphocytes (A), 1243
- Lymphocytic leukemia**
serum lactate dehydrogenase in chronic lymphocytic leukemia (A), 1215
- Lysozyme**
free and total lysozyme detd. in parotid saliva (L), 1551
improved turbidimetric assay for lysozyme in urine, 1488
- Macroamylasemia**
electrophoretic isoenzyme patterns of macroamylase (A), 1250
screening for macroamylasemia with PEG pptn. method (A), 1250
variations in amylase isoenzymes and lipase during acute pancreatitis, and in other disorders causing hyperamylasemia, 1020
- Macroglobulin**
automated assay of functional α_1 -antitrypsin and α_2 -macroglobulin in serum (A), 1246
- Magnesium**
appln. of Mg procedure to Technicon RA-1000 system (A), 1256
bilirubin interferes in the aca detrn. of Mg²⁺ in serum (L), 1309
choice of evacuated blood-collection tube for Mg and Zn assays (L), 1560
colorimetric Mg kit adapted to the Roche Cobas-Bio (A), 1235
comparison of two separation media for detrn. of Mg content of blood mononuclear cells (A), 1271
Cu, Mg, Se, and Zn in human mononuclear cells and neutrophils (A), 1286
determination of serum and urine Mg with a centrifugal analyzer (L), 2120
frequency of hypomagnesemia in hypokalemic states (SN), 178
ultrafiltrable Ca and Mg in ultrafiltrates of serum prepared with the Amicon MPS-1 system (SN), 519
- Malate dehydrogenase**
prepn. of immunolog. sensitive malate dehydrogenase-gentamicin complexes (L), 397
- Malnutrition**
short-term variability of ferritin concns. in serum of children with severe protein-energy malnutrition (L), 739
- Manganese**
Mn²⁺-dependent NADPH peroxidase acty. in human erythrocytes (A), 1267
- Maple syrup urine disease**
profiles of urinary volatiles from metabolic disorders characterized by unusual odors (SN), 1834
use of HPLC to supplement a BIA in screening newborns for MSUD: technolog. and cost effectiveness (A), 1162
- Mass spectrometry**
anal. of 12 derivatized mycotoxins by gas chromatog. using packed column and gas chromatog./mass spectrometry using fused silica chromatog. capillary (A), 1180
anal. of plasma prostaglandin E₂ by capillary column gas chromatog.—neg. ion chem. ionization mass spectrometry (A), 1280
diagnostic potential of breath anal. (R), 5
differentiation and identn. of Legionella organisms by capillary GC and GC-MS (A), 1180
dipalmitoylphosphatidylcholine in amniotic fluid quantified by fast-atom-bombardment mass spectrometry, 1349
external quality assessment of assays for cortisol in plasma: use of target data obtained by gas chromatog./mass spectrometry (SN), 862
immunoabsorption to improve gas chromatog./high-resolution mass spectrom. of estradiol-17 β in plasma (SN), 677
inborn errors of steroid biosyn.: detection by mass-spectrometry, 246
stable isotope ratio anal. of metals using fast atom bombardment mass spectrometry (A), 1287
- Meclofenamic acid**
anal. and quantn. of meclofenamic acid in plasma using HPLC (A), 1204
- Melatonin**
direct RIA and gas chromatog.—mass spectrometry compared for detrn. of melatonin in plasma (L), 1703
direct RIA for melatonin in plasma (L), 396
- Membranes**
pharmacologic investigation of membrane abnormality in muscular dystrophy (A), 1233
- Meningitis**
interference by ascorbate in measurement of CSF glucose by kinetic glucose oxidase/peroxidase procedure (SN), 1810

Menstrual cycle

biochem. changes at menopause (A), 1153
biochem. of menstruation and menstrual disorders (A), 1152
clin. features of menopause (A), 1152
¹²⁵I-labeled RIA kits for progesterone evald. for use in *in vitro* fertilization program, 1024
therapy of menopause-related problems (A), 1153

Mental disorders

endocrine considerations in psychiatric disorders (A), 1149

Metabolic disease

diagnostic potential of breath anal. (R), 5

Metabolism

metabolism of creatinine *in vivo*, 1363

Metanephrines

detn. of urinary normetanephrine and metanephrine by radial-compression liquid chromatog. and electrochem. detection (SN), 305
microcomputer program for generating standard curves and calcg. results of routine urine endocrinology tests (A), 1171

Methanol intoxication

falsely high serum creatinine concn. associated with severe methanol intoxication (CR), 205

Methaqualone

HPLC method for diazepam, chlorthalidopexide, and methaqualone in serum (A), 1203

Methemoglobin

evaln. of multi-wavelength derivative spectra for quant. applications in clin. chem. (S), 1673

Methionine

effect of phenobarbital and methionine on biosynthesis of potential uremic toxins (A), 1258

Methods for the small laboratory

clin. and lab. evaln. of a commercial kit for measurement of serum free thyroxine ("Amerlex Free T4") (SN), 164
simple kinetic assay for plasma NH₃, suitable for small labs. (L), 1704

Methotrexate

enzymatic assay for methotrexate with a centrif. analyzer (Cobas-Bio) (L), 1317
fluorescence polarization immunoassay for quantn. of methotrexate (A), 1274

3-Methoxy-4-hydroxyphenylethylglycol

improved procedure for detn. of MHPG by HPLC with electrochem. detection (A), 1201

3-Methylhexanedioic acid

2,6-dimethyloctanedioic acid—a metabolite of phytanic acid in Refsum's disease, 434

Metrizamide

interference by metrizamide with Du Pont acca method for CSF proteins (L), 395
metrizamide interference with CSF measurements (A), 1224

Metronidazole

blank correction for metronidazole interference with continuous-flow measurement of aspartate aminotransferase (L), 406
metronidazole interference in hexokinase glucose detns. (L), 995

Metyrapone test

polarization fluoroimmunoassay of 11-deoxycortisol in serum and saliva (SN), 1803

Mexiletine

comparative study of serum plasma for mexiletine, an antiarrhythmic drug (A), 1166
detn. of mexiletine in serum by gas chromatog. with a nitrogen-selective detector (A), 1166
detn. of serum mexiletine concns. by HPLC (A), 1201

Mice

interactions between L-thyroxine and alcohol dehydrogenase-dependent ethanol metabolism in livers from DBA-2J mice (A), 1211

Microbiological assay

microbiol. and RIA assays for folic acid in whole blood compared: effect of Zn nutriture (L), 2117

Microbiology

microbiology (A), 1143

Microglobulin

abnormally high concns. of β_2 -microglobulin in AIDS patients (L), 1560
continuous-flow system for automation of latex immunoassay by particle counting, 1007
enzyme immunoassay for serum beta-2 microglobulin and its predictive value in renal transplant. unction (A), 1245
inter- and intralaboratory quality-control survey of RIA of insulin, thyroxine, thyrotropin, cortisol, digoxin, gastrin, β_2 -microglobulin, and IgE in Japan with

β_2 -microglobulin detn. by new enzyme

immunoassay (A), 1240

β_2 -microglobulin not suitable for assessing renal tubular function (L), 996

Microsomes

use of laser-excited fluorescence to measure mixed-function oxidase acty. (S), 1616

Milk

lactate dehydrogenase isoenzymes in human milk—prelim. study (L), 1568

Monitoring pregnancy

See also Fetal status

Monitoring therapy

assay of urinary N-acetyl- β -glucosaminidase in a centrifugal analyzer, 1717

column deactn. in anal. for underivatized tricyclic antidepressants by gas chromatog. with use of a N detector, 452

cross reactivity of the EMIT digoxin assay with digoxin metabolites, and its validation for measurement of urinary digoxin (SN), 175

detn. of nifedipine in serum or plasma by reversed-phase liquid chromatog., 1344

double-antibody fluoroimmunoassay for aminoglycoside antibiotics, phenytoin, and theophylline in serum, 1015

drug monitoring by fluoroimmunoassay, with use of a centrif. analyzer (L), 991

enzyme immunoassay for carcinoembryonic antigen, 2019

enzyme-linked immunosorbent assay for lactose synthase (galactosyltransferase) in serum, and appln. as a tumor marker in ovarian carcinoma, 1928

measurement of nifedipine in plasma by gas-liquid chromatog. and electron-capture detection (SN), 158

pharmacokinetic computer models and their role in monitoring therapy (A), 1141

simple, rapid spectrophotom. of urinary N-acetyl- β -D-glucosaminidase, with a chromogenic substrate, 1713

simultaneous detn. of phenytoin and phenobarbital in serum or plasma by substrate-labeled fluorescence immunoassay, 1051

tech. considerations: use of liq. chromatog. in therapeutic drug monitoring (R), 1331

three commercial methods for serum ferritin compared: high-dose "hook effect" eliminated (SN), 1109

variations of 1-deoxyglyucose (1,5-anhydroglucitol) content of plasma from patients with insulin-dependent diabetes mellitus, 1396

Monoclonal antibodies

acridinium esters as high-specific-acty. labels in immunoassay, 1474

biotin-avidin labeled EIA for quantn. of serum TSH using monoclonal antibodies (A), 1213

clin. evaln. of monoclonal-based nephelometric immunoassay for theophylline (A), 1156

competitive nephelometric inhibition immunoassay of theophylline with monoclonal reagents: comparison with fluorescence polarization and EMIT (L), 1857

detn. of apolipoprotein B values by RIA using monoclonal antibodies (A), 1243

development of immunoenzymetric assay for alpha-fetoprotein (A), 1217

development of monoclonal antibodies to disease-related proteins identified by two-dimensional electrophoresis (A), 1213

dipstick enzyme immunoassay for human luteinizing hormone in urine (A), 1192

dipstick enzyme immunoassay for visual detection of choriongonadotropin (A), 1192

ELISA assay for apolipoprotein AII using a monoclonal antibody (A), 1173

enzyme immunoassay for bTSH in serum using monoclonal antibodies (A), 1185

evaln. of new monoclonal ELISA for prostatic acid phosphatase (A), 1241

growth hormone quantn. in human serum using monoclonal antibodies in a two-site IRMA (A), 1245

immunoradiometric assay for human heart ferritin using a specific monoclonal antibody (A), 1245

markedly increased prostatic acid phosphatase as measured in a patient by a monoclonal antibody method (L), 739

monoclonal antibodies to plasma low-density lipoproteins. I. enhanced binding of ¹²⁵I-labeled LDL by use of two monoclonal antibodies, 1890

monoclonal antibodies to plasma low-density lipoproteins. II. evaln. for use in RIA for apolipoprotein B in coronary artery disease, 1898

monoclonal antibodies used to detect human

placental alk. phosphatase, 115

production of monoclonal antibodies to theophylline for clin. use (A), 1201

purifn. of human creatine kinase isoenzymes for monoclonal antibody production (A), 1219

qual. enzyme immunoassay for human chorionic gonadotropin in serum (A), 1213

quantn. two-site IEMA for serum HCG using single-point calibration (A), 1246

radioimmunoassay for a monoclonal antibody-defined tumor marker, CA 19-9 (SN), 549

sandwich assay for human PAP based on two monoclonal antibodies (A), 1179

serum choriongonadotropin quantn. by two-site ELISA using monoclonal antibodies (A), 1191

simultaneous Tandem IEMAS: comparison of single to multipoint calibration (A), 1213

solid-phase chemiluminescence immunoassay for plasma estradiol-17 β during gonadotropin therapy compared with two RIAs, 2068

solid-phase RIA of fragment D of fibrinogen by use of a low-affinity monoclonal antibody, 778

theophylline substrate-labeled fluorescent immunoassay using monoclonal antibody (A), 1176

time-resolved fluoroimmunoassay of choriongonadotropin, 60

use of immunoaffinity chromatog. for purifn. of ¹²⁵I-labeled prolactin, 241

use of monoclonal antibody in latex agglutination inhibition assay for choriongonadotropin (A), 1244

visual assay for urine HCG using monoclonal antibodies in a simultaneous TEMA (A), 1245

Monoclonal gammopathies

modified periodic acid-Schiff staining of glycoproteins on agarose-gel

electrophoretograms (SN), 836

Mononuclear cells

comparison of two separation media for detn. of Mg content of blood mononuclear cells (A), 1271

Morphine

detection of morphine in urine by hemagglutination inhibition, with use of lyophilized reagents, 1376

internally referenced test strip immunoassay for morphine (S), 1598

Mucoprotein

comparison of sensitivities of three turbidimetric methods to proteins and mucoprotein of low molecular mass (L), 409

Multi-enzyme electrodes

multi-enzyme membrane electrodes for detn. of creatinine and creatine in serum, 51

Multilayer film analysis

anal. performance of kinetic enzyme methods using Kodak Ektachem 700 analyzer (A), 1211

anal. performance of Kodak Ektachem 400 analyzer and clin. chem. slides for urinary Ca, creatinine, and amylase (A), 1260

automated dry-side enzymatic method evald. for creatinine in serum (SN), 684

clin. evaln. of Eastman Kodak's Ektachem 400 Analyzer (SN), 498

development of Kodak Ektachem clin. chem. slide assay for alkaline phosphatase (A), 1269

development of Kodak Ektachem clin. chem. slide assay for inorganic P (A), 1246

development of Kodak Ektachem clin. chem. slide for aspartate aminotransferase (A), 1247

development of Kodak Ektachem clin. chem. slide for creatine kinase (A), 1212

development of Kodak Ektachem clin. chem. slide for lactate dehydrogenase (A), 1168

diazobromide dry film for detn. of total bilirubin in serum, 37

enzymic creatinine assay and direct NH₃ assay in coated thin films, 645

evaln. of fractionated bilirubin system from Kodak in neonatal and pediatric populations (A), 1233

evaln. of several analytes assayed using multi-layered dry film reagent slides with Eastman Kodak Ektachem 400 analyzer (A), 1246

evaln. of two-film system for total and fractional bilirubin anal. from Kodak (A), 1247

Kodak Ektachem 700 analyzer (A), 1211

Kodak Ektachem 400 Analyzer evald. for automated enzymic detn. of plasma creatinine (SN), 1422

Kodak Ektachem clin. chem. slides (NBIL) minimize interference from lipemia and hemolysis (A), 1222

- multilayer film anal.: evaln. of ion-selective electrolyte slides (SN), 129
- multilayer film anal. for glucose in 1- μ L samples of plasma (SN), 2103
- new statistical approach in biochem. method-comparison studies by using Westlake's procedure: appn. to continuous-flow centrif. anal., and multilayer film anal. techniques (SN), 1131
- performance of multilayered film reagent slides for ammonia and creatinine using Eastman Kodak Ektachem 400 Analyzer (A), 1247
- stabilization of creatine kinase and stability of enzymes in Kodak Ektachem calibrators (A), 1269
- Multiple sclerosis**
- interpretation of CSF protein assays in various neurologic diseases, 1028
- lecithin:cholesterol acyltransferase activity in plasma of patients with multiple sclerosis (L), 1995
- utility of isoelectric focusing of CSF and serum on agarose evald. for neurolog. patients, 810
- Multiple-wavelength analysis**
- polychromatic equations to increase accuracy of colorimetric glycohemoglobin assay (A), 1223
- Multivariate analysis**
- enzyme-based assays in coagulation testing optimized, 603
- multivariate anal. of plasma enzyme profiles in severe head injury, 107
- Mumps**
- variations in amylase isoenzymes and lipase during acute pancreatitis, and in other disorders causing hyperamylasemia, 1020
- Munchausen syndrome**
- on the presence of cholesterol in urinary calculi (L), 1864
- Muscular dystrophy**
- pharmacologic investigation of membrane abnormality in muscular dystrophy (A), 1233
- Mutarotase**
- use of mutarotase to improve Trinder assay of glucose in serum and plasma (A), 1230
- Myasthenia gravis**
- CSF IgD in myasthenia gravis (L), 1561
- macromolecular alk. phosphatase and an immunoglobulin G that inhibited alk. phosphatase in a patient's serum (CR), 375
- Mycotoxins**
- anal. of 12 derivatized mycotoxins by gas chromatog. using packed column and gas chromatog./mass spectrometry using fused silica chromatog. capillary (A), 1180
- Myelin basic protein**

- use of Du Pont neonatal bilirubin method for detn. of bilirubin in neonates (A), 1221
- use of HPLC to supplement a BIA in screening newborns for MSUD: technol. and cost effectiveness (A), 1162

Nifedipine

detn. of nifedipine in serum or plasma by reversed-phase liquid chromatog., 1344
measurement of nifedipine in plasma by gas-liquid chromatog. and electron-capture detection (SN), 158

Nitrites

chemiluminometry of nitrite and *N*-nitroso compounds in gastric juice (L), 1860

Nitrogen

concn. of three types of N in urine (L), 408

Nitronaphthol reaction

chemical basis and specificity of the nitronaphthol reaction (SN), 1969

Nonesterified fatty acids

See Fatty acids

Norepinephrine

radioenzymatic microassay for simultaneous measurement of picogram quantities of norepinephrine, epinephrine and dopamine in plasma and tissue (A), 1264
RIA for urinary catecholamines, epinephrine and norepinephrine (A), 1240

Normal values

See Reference interval

Normetanephrine

detn. of urinary normetanephrine and metanephrine by radial-compression liquid chromatog. and electrochem. detection (SN), 305

Norpropoxyphene

optimization of HPLC for propoxyphene and norpropoxyphene (A), 1203

Nuclear magnetic resonance

assessment of Na binding to bicarbonate by potentiometry and NMR (A), 1272

Nucleotidase

adaptation and evaln. of method for detn. of 5'-nucleotidase acty. in serum (A), 1266
CEA, fast liver alkaline phosphatase, 5'-nucleotidase and cancer (A), 1231
rapid enzymatic, UV, kinetic procedure for 5'-nucleotidase using the IL Multistat III (A), 1159
serum 5'-nucleotidase and γ -glutamyltransferase compared in alcoholism patients after detoxn. (L), 1448

Nutrition

See also Parenteral nutrition
albumin, prealbumin, and retinol-binding protein in nutritional assessment (A), 1284
fate of Zn, Cu, and Fe placed in bags for parental nutrition (A), 1286
Intralipid parenteral nutrition soln. causes major interferences with common chem. tests (A), 1248
red cell glutathione peroxidase acty. in Jamaican children with protein energy malnutrition (A), 1214
transferrin and retinol-binding protein for neonatal nutrition monitoring (A), 1220

Nutritional status

automated rate-immunonephelometric detn. of serum prealbumin (transferrin) (SN), 564

Obituaries

Sendroy, Jr., Julius (obit), 2114

Occult blood

the "HemoQuant" test: a specific and quant. detn. of heme (hemoglobin) in feces and other materials, 2061
spectrophotometry of occult blood in feces, 2022

Occupational hazards

detn. of DEHP in pulmonary patients by gas chromatog. (A), 1264
diagnostic potential of breath anal. (R), 5
improved Ellman procedure for erythrocyte cholinesterase (SN), 365, (2072)
liquid-chromatog. profiles of urinary porphyrins (SN), 527

Oligoclonal bands

interpretation of CSF protein assays in various neurologic diseases, 1028
rapid detection of oligoclonal bands in CSF employing thin-film agarose electrophoresis which does not require cooling (A), 1174

Oncotic pressure

free ionized Ca in serum, increase in the upper ref. limit for ambulatory patients and relationship to concurrently measured oncotic pressure (A), 1187

Organ culture

phenomenological anal. of light scattering of rabbit lenses organ-cultured in isotonic and hypertonic media (A), 1189

Organic acids

organic aciduria associated with isovaleric acidemia (L), 1002, (2072)

Orosomucoid

evolutionary changes in acute-phase proteins in alcoholic hepatocellular diseases, 45

Osmometry

See Osmotic pressure

Osmotic pressure

osmometry of CO₂ in gas samples (SN), 884
watery diarrhea and stool osmolality (L), 211

Ovarian carcinoma

enzyme-linked immunosorbent assay for lactose synthase (galactosyltransferase) in serum, and appln. as a tumor marker in ovarian carcinoma, 1928

Oxalate

assay of urinary oxalate: six methods compared (SN), 1977
detn. of urinary oxalate with commercially available oxalate oxidase (SN), 700
enzymic detn. of urinary oxalate, with EDTA added to improve recovery (L), 1855
ion-chromatog. measurement of oxalate in unprocessed urine (SN), 369
photoelectroanal. chem.: possible interferences in serum and selective detection of tris(2,2'-bipyridine)Ru(II) in the presence of interferences (S), 1665
quantit. of urinary oxalate with oxalate oxidase from beet stems (SN), 1815
sensitive fluorometric measurement of oxalic acid in urine (A), 1194
simplified method for enzymatic urine oxalate assay (A), 1260
urinary oxalate detn. by use of immobilized oxalate oxidase in a continuous-flow system, 16

Pancreas

purifn. and characterization of human pancreatic phospholipase A₂, 1772

Pancreatic adenocarcinoma

radioimmunometric assay for a monoclonal antibody-defined tumor marker, CA 19-9 (SN), 549

Pancreatic disease

characterization and elimination of a factor in serum that interferes with turbidimetry and nephelometry of lipase, 96
time-resolved fluorimunoassay of human pancreatic phospholipase A₂, 1777
variations in amylase isoenzymes and lipase during acute pancreatitis, and in other disorders causing hyperamylasemia, 1020

Pancreatic juice

detn. of Ca concn. in pancreatic juice with the Corning 940 Calcium Titrator (L), 745

Pancreatic polypeptide

RIA for pancreatic polypeptide, and its age-related changes in concn., 1923

Pancreatitis

comparison of serum amylase and lipase acty. in pancreatitis and chronic renal failure patients (A), 1250
unusual creatine kinase isoenzyme pattern associated with a case of acute pancreatitis (L), 579
variations in amylase isoenzymes and lipase during acute pancreatitis, and in other disorders causing hyperamylasemia, 1020

Parathyrin

cimetidine effect on PTH secretion as measured by PTH-fragment-specific RIA (A), 1171
comparison of PTH levels by mid-molecule RIA and cytochem. bioassay (A), 1252
parathyroid hormone levels in hypercalcemia and parathyroid disease (A), 1254
protein-bound, complex-bound, and ionized Ca related to PTH in healthy donors during plateletpheresis (A), 1271
utilization of C-terminal parathyroid hormone assays in a large metropolitan teaching hospital (A), 1285

Parathyroid

parathyroid hormone levels in hypercalcemia and parathyroid disease (A), 1254

Parenteral nutrition

screening for congenital hypothyroidism by assay for thyrotropin in dried blood: effect of parenteral nutrition (L), 400

Particle counting

automated particle-counting immunoassay of C-reactive protein: appln. to serum, cord serum, and CSF (SN), 1127
continuous-flow system for automation of latex immunoassay by particle counting, 1007

Pco₂

Pediatric chemistry

See also Fetal status, Heritable disorders, Newborns

abnormal regulation of pyridoxal 5'-phosphate in Rye's syndrome (SN), 1832
atypical, anocally migrating alk. phosphatase isoenzyme in children and its relation to abdominal symptoms (L), 593
breath collection device for H₂ measurements in children (L), 999
cross reactivity of the EMIT digoxin assay with digoxin metabolites, and its validation for measurement of urinary digoxin (SN), 175
detg. plasma ammonia N with an ion-selective electrode (SN), 867
development of a screening system for cystic fibrosis (S), 1593
direct measurement of testosterone in a pediatric center, with an RIA kit and unextracted serum (SN), 1796
enzyme immunoassay for urinary albumin (SN), 355
evaln. of fractionated bilirubin system from Kodak in neonatal and pediatric populations (A), 1233
evaln. of serum separator tube for collection of capillary blood (A), 1257
"Eyetone" blood glucose reflectance colorimeter evald. for in vitro and in vivo accuracy and clin. efficacy (SN), 558
falsely positive digoxin results in serum specimens from acute-care infants (A), 1249
ferritin concn. in plasma from capillary (finger prick) blood and venous blood (SN), 871
further evaln. of luminal-enhanced luminescence in diagnosis of disorders of leukocyte oxidative metab.: role of myeloperoxidase (SN), 513
immunoradiometric assay for erythrocyte complement (C3b) receptor acty. applied to pediatric population with connective tissue disease, 1720
improved turbidimetric assay for lysozyme in urine, 1488
macro creatine kinase types 1 and 2: clin. signif. in neonates and children as compared with adults (CR), 201
microsampling on the Technicon SMAC (SN), 1531
multilayer film anal. for glucose in 1- μ L samples of plasma (SN), 2103
normal children and their anion gap (A), 1271
pattern anal. of pediatric microchem. profiles (A), 1196
pediatric protocol for TDx FPIA assays (A), 1273
profiles of urinary volatiles from metabolic disorders characterized by unusual odors (SN), 1834
quantn. of lipoprotein cholesterol in serum from children with different lipoprotein profiles: heparin-Ca pptn. and ultracentrif. compared (SN), 481
red cell glutathione peroxidase acty. in Jamaican children with protein energy malnutrition (A), 1214
ref. intervals for amylase isoenzymes in serum and plasma of infants and children (SN), 1119
short-term variability of ferritin concns. in serum of children with severe protein-energy malnutrition (L), 739
specific micro-RIA for prednisolone in serum, 1358
unpredictable error in calculated bicarbonate homeostasis during pediatric intensive care: the delusion of fixed pK', 69
urinary lactose and galactose in infants and children (A), 1233

Pelvic inflammatory disease
chronic hyperamylasemia and chronic pelvic inflammatory disease (CR), 887

Pentobarbital
reversed-phase liquid-chromatog.
simultaneous anal. for thiopental and pentobarbital in serum (SN), 1097, (2072)

Pepsin
kinetic assay of pepsin with albumin-bromophenol blue as substrate, 447

Peptides
biochem. of enkephalins (A), 1148
lack of cross reactivity of peptide YY and neuropeptide Y with antibodies to pancreatic polypeptide in RIA (L), 1553
pattern of urinary putative neuropeptides in control and autistic subjects (A), 1287

Perfluorocarbons
effect of Fluosol-DA on tests performed by RIA (A), 1241

Peroxidase

amino antipyrine-coupled peroxidase indicators: kinetics and ascorbic acid resistance (A), 1278
comparison of three alkylbenzidine indicators for H_2O_2 /peroxidase assays (A), 1158
effect of ring substitution in cumene hydroperoxide on kinetics of peroxidase reaction (A), 1278
 Mn^{2+} -dependent NADPH peroxidase acty. in human erythrocytes (A), 1267
peroxidase-coupled method for colorimetric detn. of serum triglycerides (SN), 538

pH

pH measurement with a fiber-optic tissue-pH monitor and a standard blood-pH meter (L), 1566
temp. correction of blood-gas and pH measurements (R), 1877

Pharmacokinetics

lack of effect of probenecid on pharmacokinetics and renal elimination of theophylline (A), 1249
pharmacokinetic computer models and their role in monitoring therapy (A), 1141
RIA for bupropion in plasma: tritiated and iodinated radioligands compared (SN), 462

Phencyclidine

effects of various ion pairs of phencyclidine on its recovery during solvent evapn. (A), 1276

Phenobarbital

See also Barbiturates

effect of phenobarbital and methionine on biosynthesis of potential uremic toxins (A), 1258
quantn. of haptens by homogeneous immunoprecipitation. 2. centrif. anal. for tobramycin, phenobarbital, and theophylline in serum (SN), 1540
quantn. of serum phenobarbital: therapeutic drug monitoring by enzyme inhibitor immunoassay (A), 1239
radial partition immunoassay: monitoring phenobarbital levels in serum and plasma (A), 1239
semi-automated continuous-flow enzyme immunoassay for antiepileptic drugs in serum (SN), 1790
serum phenobarbital to primidone ratios in patients ingesting primidone (A), 1238
simultaneous detn. of phenytoin and phenobarbital in serum or plasma by substrate-labeled fluorescence immunoassay, 1051

Phenylalanine

enzymatic assay of neonatal serum phenylalanine and tyrosine using a centrifugal analyzer (A), 1221

Phenylketonuria

profiles of urinary volatiles from metabolic disorders characterized by unusual odors (SN), 1834

Phenylmaleimide

insulin immunoreactivity stabilized in serum and plasma at ambient temps. (L), 1559

Phenytoin

comparison of TDX, EMIT, and HPLC measurement of free phenytoin levels (A), 1239
double-antibody fluoroimmunoassay for aminoglycoside antibiotics, phenytoin, and theophylline in serum, 1015
evaln. of Abbott TDX and Syva EMIT for detn. of phenytoin serum levels in patients with renal disease (A), 1200
method-dependence of serum phenytoin measurements in patients with renal disease (A), 1276
phenytoin can be measured reliably in uremic patients by immunoassay (L), 737
semi-automated continuous-flow enzyme immunoassay for antiepileptic drugs in serum (SN), 1790
simultaneous detn. of phenytoin and phenobarbital in serum or plasma by substrate-labeled fluorescence immunoassay, 1051

Phoechromocytoma

urinary 4-hydroxy-3-methoxymandelic, 4-hydroxy-3-methoxyphenylacetic, and 5-hydroxy-3-indoleacetic acids detd. by liquid chromatog. with electrochem. detection (SN), 876

Phosphate

See also Inorganic phosphate
relation between plasma cholesterol and in vitro leakage of intra-erythrocytic lactate dehydrogenase and PO_4 into plasma (L), 989

Phosphatidylcholine

densitometry of phosphatidylcholine and sphingomyelin in high-density lipoproteins (SN), 1435

enzymic assay for phosphatidylcholine and sphingomyelin in serum, 806
quantn. of high-density-lipoprotein cholesterol by pptn. with phosphotungstic acid/ $MgCl_2$, 2026
relations among amniotic fluid dipalmitoyl lecithin, postpartum respiratory compliance, and neonatal respiratory distress syndrome, 650

Phosphatidylglycerol

enzymic radiochem. method for detg. phosphatidylglycerol in amniotic fluid, 782
possible interference with Helena Laboratories' method for phosphatidylglycerol (L), 404

Phospholipase

purifn. and characterization of human pancreatic phospholipase A_2 , 1772
time-resolved fluoroimmunoassay of human pancreatic phospholipase A_2 , 1777

Phospholipids

amniotic fluid lamellar body content and neonatal respiratory status (A), 1221
amniotic fluid phospholipids assessed by one- and two-dimensional thin-layer chromatog. (L), 568
enzymic colorimetry of lecithin and sphingomyelin in aq. soln., 1513
fluorometric procedure for detg. "lamellar body" phospholipids in the particulate fraction of amniotic fluid after filtration (SN), 362
influence of phospholipid satn. on classical thin-layer chromatog. detection methods and its effect on amniotic fluid lecithin/sphingomyelin ratio detns., 250
non-charring of dipalmitate forms of three phosphatidyl compounds after TLC (A), 1229
relations among amniotic fluid dipalmitoyl lecithin, postpartum respiratory compliance, and neonatal respiratory distress syndrome, 650

Phosphorus

See also Inorganic phosphate, Phosphate
detn. of inorganic P content in a biol. specimen (A), 1279
development of Kodak Ektachem clin. chem. slide assay for inorganic P (A), 1246
direct detn. of P in serum with a single reagent (SN), 372, (1328)
optimization of phosphorus-UV reagent (A), 1255
protocol for study of drug interferences in lab. tests: cefotaxime interference in 24 clin. tests, 1736
revisions of the 1963 semidine HCl std. method for inorg. P (SM), 184
serum blank-corrected fast P measurement at 340 nm (A), 1256

Photoelectroanalytical chemistry

photoelectroanal. chem.: possible interferences in serum and selective detection of tris(2,2'-bipyridine)Ru(II) in the presence of interferents (S), 1665

Photometry

automated fluorometer/photometer system for homogeneous immunoassays (S), 1628
discrete automated chem. system with tableted reagents (S), 1609

Phycobiliprotein

immunoassay techniques with fluorescent phycobiliprotein conjugates (S), 1582

Phytanic acid

2,6-dimethyloctanedioic acid—a metabolite of phytanic acid in Refsum's disease, 434

Piracetam

liquid-chromatog. quantn. of piracetam (SN), 664

Pituitary

neuroendocrine regulation of anterior pituitary hormone secretion (A), 1148

Pituitary-adrenal disorders

clin. evaln. of the liquid-chromatog. detn. of urinary free cortisol (SN), 847

Placenta

human placenta as convenient source of CK BB (SN), 1537

Placental lactogen

solid-phase RIA for placental lactogen in serum (SN), 168

Plasminogen

development and anal. performance of automated tests for antithrombin III and plasminogen on the Du Pont aca™ Analyzer, 609
enzyme-based assays in coagulation testing optimized, 603

Plateletpheresis

protein-bound, complex-bound, and ionized Ca related to PTH in healthy donors during plateletpheresis (A), 1271

Platelets

automated enzyme-linked immunosorbent assay for detection of platelet antibodies (A), 1283
hypercholesterolemic platelet dependence on calcium for thromboxane and 12-hydroxyicosatetraenoic acid release (A), 1227

Po2

See Blood gases

Polarography

1-min. lactate/pyruvate anal. of whole blood by enzyme polarography (A), 1263

Polyamines

anal. of polyamines in whole blood of psoriatic patients (A), 1177

Polychromatic analysis

multiple polychromatic equations initiated by serum characterization provide greater accuracy in direct bilirubin detns. (A), 1260

Polycystic ovary syndrome

heterozygote detection in congenital adrenal hyperplasia, 48

Polycythemia

serum catalase acty. for detection of hemolytic diseases (L), 741

Polyvinyl chloride

detn. of DEHP in pulmonary patients by gas chromatog. (A), 1264

Porphyria

liquid-chromatog. profiles of urinary porphyrins (SN), 527

Porphyria

liquid-chromatog. anal. for urinary porphyrins (L), 1867

porphyrins and chlorophylls as probes for fluoroimmunoassays (L), 1003

Postmortem changes

cytoplasmic creatine kinase isoenzymes quantitated in tissue specimens obtained at surgery (SN), 310

Potassium

See also Electrolytes
clin. evaln. of bis crown ether-based K^+ ion-selective electrodes (A), 1193
detn. of $[K^+]$ in blood serum with valinomycin-based silicone rubber membrane of universal applicability to body fluids (L), 1447
evaln. of a direct potentiometric method for Na and K used in the Du Pont aca (SN), 1090
frequency of hypomagnesemia in hypokalemic states (SN), 178
new instrument for clin. detn. of Na, K, and ionized Ca (A), 1188
rapid, simultaneous detn. of Na, K, and total CO_2 on the Technicon RA-1000 system (A), 1193

Potentiometry

See also Electrochemical techniques
assessment of Na binding to bicarbonate by potentiometry and NMR (A), 1272
clin. evaln. of Eastman Kodak's Ektachem 400 Analyzer (SN), 498
evaln. of a direct potentiometric method for Na and K used in the Du Pont aca (SN), 1090
Na anal. in hyperlipidemia: comparison between flame photometry, direct and indirect potentiometry (A), 1193
Na measurements and protein content: flame photometry, indirect potentiometry, corrected and uncorrected potentiometry compared (A), 1188
potentiometry of Na^+ in undil. serum and urine with improved neutral carrier-based solvent polymeric membrane electrode, 1508

Prealbumin

albumin, prealbumin, and retinol-binding protein in nutritional assessment (A), 1284
automated rate-immunonephelometric detn. of serum prealbumin (transferrin) (SN), 564
development of homogeneous fluorescence rate immunoassay for prealbumin (transferrin) (A), 1190
identification of the serum binding proteins for Fe, Zn, Cd, Ni and Ca, 629
transferrin and retinol-binding protein for neonatal nutrition monitoring (A), 1220

Prednisolone

diluting serum before RIA does not prevent prednisolone binding to protein (L), 1989
"improved" sample extraction before liquid chromatog. of prednisone and prednisolone in serum (L), 2118
specific micro-RIA for prednisolone in serum, 1358

Prednisone

"improved" sample extraction before liquid chromatog. of prednisone and prednisolone in serum (L), 2118

Pregnancy

- clin. evaln. of two direct procedures for free thyroxine, and of free thyroxine index detd. nonisotopically and by measuring thyroxine-binding globulin, 1908
- effect of albumin concn. on assay of serum free thyroxine by equilibrium RIA with labeled thyroxine analog (Amerlex® free T₄) (SN), 321
- evaln. of four serum tests for pregnancy (SN), 561
- evaln. of 10 kits for detn. of chorionadotropin in serum (SN), 1828
- five recent urinary tests for early pregnancy evald. (SN), 1812
- free thyroid hormone index, thyroid hormone/thyroxine-binding globulin ratio, triiodothyronine uptake, and thyroxine-binding globulin compared for diagnostic value regarding thyroid function, 74, (414)
- free thyroxine by RIA: evaln. of direct method involving a radiolabeled thyroxine analog, 1781
- free triiodothyronine and free thyroxine in sera of pregnant women and subjects with congenitally increased or decreased thyroxine-binding globulin, 1527
- improved dialysis method for free thyroxine in serum compared with five commercial RIAs in nonthyroidal illness and subjects with abnormal concns. of thyroxine-binding globulin, 816
- monoclonal antibodies used to detect human placental alk. phosphatase, 115
- performance of urine and serum human chorionadotropin immunoassays in diagnosis of pregnancy in gynecologic emergencies (A), 1161
- specificity of β -chorionadotropin assays for the hormone and for an immunoreactive fragment present in urine during normal pregnancy (SN), 667
- "Tandem" urine pregnancy test evaluated (L), 2119
- unconjugated estril in serum as measured by liquid chromatog. with electrochem. detection, compared with RIA, 1463
- use of hCG detns. in diagnosis of ectopic pregnancy (A), 1267
- Prenatal diagnosis**
- See also Fetal status. Heritable disorders amniotic fluid alpha-fetoprotein reactivity to *Lens culinaris* agglutinin and concanavalin A in crossed-affinity immunoelectrophoresis: ancillary tests in prenatal diagnosis of severe fetal malformations, 21
- Primidone**
- quantn. of primidone by homogeneous immunopptn. assay (A), 1235
- semi-automated continuous-flow enzyme immunoassay for antiepileptic drugs in serum (SN), 1790
- serum phenobarbital to primidone ratios in patients ingesting primidone (A), 1238
- Probenecid**
- improved sample prep. before liquid-chromatog. detn. of probenecid in CSF (L), 213
- lack of effect of probenecid on pharmacokinetics and renal elimination of theophylline (A), 1249
- Procainamide**
- procainamide and NAPA determination by SLFIA on automated TDA analyzer (A), 1273
- simultaneous liquid chromatog. assay for procainamide, acetyl procainamide and quinidine (A), 1205
- Product Guide**
- addendum to the Product Guide for Radioassays and Non-Isotopic Ligand Assays (3rd ed.) (SR), 1987

objective anal. goals should be used in quality control procedures (L), 1867
on-line quality control program using IBM's patient care system (A), 1172
potential error on Beckman Astra-8 print-out sheet (L), 1573

precision of duplicate assays as a tool for technician evaln. (A), 1208
quality control sera for routine detn. of Al by electrothermal at. absorp. spectroscopy (SN), 1966
Seralyzer and use of qual. control materials (L), 578
statistical method-comparison approach from external quality control data (A), 1163
succinonitrile triple-point std.: a fixed point to improve accuracy of temp. measurements in the clin. lab., 1380
suitability of control materials in the differential inhib. assay for pancreatic and salivary amylase (SN), 510
two liquid and lyophilized control materials compared (L), 1999
use of interlab. problem report to search for weak links in lab system (A), 1207
use of the mean and range rule for the Du Pont *aca* (L), 596, (1328)
validation of accuracy of Astra enzyme system reagent dispensers (A), 1277
value of the anion gap in clin. diagnosis and lab. evaln., 279

Quinidine
clin. evaln. of immunoassay for quinidine and its metabolites in serum (A), 1276
evaln. of automated fluoroimmunoassay for patient serum quinidine levels (A), 1194
influence of several variables on protein binding of quinidine (A), 1240
micro-anal. for quinidine in serum by thin-layer chromatog. followed by fluorescence densitometry (SN), 2100
radial partition immunoassay for quinidine: synthesis of immunogen and label (A), 1200
simultaneous liquid chromatog. assay for procainamide, acetyl procainamide and quinidine (A), 1205

Rabbits
metabolism of creatinine in vivo, 1363

Race-related differences
serum total and unbound bilirubin in Chinese neonates (A), 1222

Radial immunodiffusion
apolipoprotein B measured by radial immunodiffusion (L), 1001
methodology and standn. of apolipoprotein A-I immunoassays (R), 415
optimizing ref. values for measurement of alpha₁-antitrypsin in serum: comparison of three methods (SN), 1838

Radial partition immunoassay
radial partition immunoassay for lidocaine (A), 1273
radial partition immunoassay for quinidine: synthesis of immunogen and label (A), 1200
radial partition immunoassay: monitoring digoxin levels in serum and plasma (A), 1209
radial partition immunoassay: monitoring phenobarbital levels in serum and plasma (A), 1239
radial partition immunoassay: monitoring theophylline levels in serum and plasma (A), 1198

Radioassay
addendum to the Product Guide for Radioassays and Non-Isotopic Ligand Assays (3rd ed.) (SR), 1987
elimination of protein and "patient blank" problems in cobalamin (B12) radioassay using a solid phase no boil approach (A), 1195
enzymic radiochem. method for detg. phosphatidylglycerol in amniotic fluid, 782
human thyrotropin radiolabel: specific act., zero binding, and stability (L), 1870
identification of the serum binding proteins for Fe, Zn, Cd, Ni and Ca, 629
immunoabsorption to improve gas chromatog./high-resolution mass spectrom. of estradiol-17 β in plasma (SN), 677
measurement of thyroid stimulating immunoglobulin in sera of patients with Graves' and other thyroid diseases by radioreceptor assay (A), 1184
modified method for detg. free testosterone in serum (A), 1255
²²Na influx into RBCs as diagnostic tool for essential hypertension (A), 1247
Product Guide for Radioassays and Non-Isotopic Ligand Assays, 3rd (expanded) edn. (SR), 889
radioassay for serum angiotensin converting enzyme act. (A), 1266
rapid insulin radioassay for localizing occult insulinomas during surgery (A), 1171

Radioenzymatic assay
anal. differences in measurement of plasma catecholamines (L), 735
radioenzymatic assay for direct measurement of plasma pyridoxal 5'-phosphate, 642

Radioenzymic assay
modified handling of internal catecholamine stds. in radioenzymic assays (SN), 144
radioenzymatic microassay for simultaneous measurement of picogram quantities of norepinephrine, epinephrine and dopamine in plasma and tissue (A), 1264
simple, specific and sensitive radioenzymatic microassay for picogram quantities of serotonin or acetylserotonin in biol. fluids and tissues (A), 1262

Radioimmunoassay
additional applications of the Fernandez-Loeb plot in RIAs (L), 1996
anal. and clin. evaln. of direct free T₄ RIA (A), 1160
assay of thyrotropin in hyperthyroidism (L), 1688
automated on-line RIA quality control (A), 1208
automated recyclable assay to quant. insulin in serum using unique sepn. technique (A), 1252
automated solid-phase RIA for direct measurement of unconjugated estril in serum (A), 1268
carcinoembryonic antigen RIAs: interference by glycosaminoglycans and removal of glycosaminoglycans from plasma samples (A), 1254
cholyglycine assay in serum by enzyme immunoassay and RIA (A), 1259
cimetidine effect on PTH secretion as measured by PTH-fragment-specific RIA (A), 1171
clin. and exptl. utilization of modified RIA for B β 15-42 related peptides (A), 1161
clin. experience with RIA for intrinsic factor-blocking antibodies (A), 1214
clin. usefulness of a free triiodothyronine RIA using a tracer analog method (A), 1186
comparison of logistic and mass-action curves for RIA data, 1757
comparison of PTH levels by mid-molecule RIA and cytochem. bioassay (A), 1252
comparison of three thyroglobulin RIAs for management of thyroid cancer patients (A), 1169
creatine kinase B subunit as measured with an RIA kit in detection of acute myocardial infarction (SN), 336
detn. of apolipoprotein B values by RIA using monoclonal antibodies (A), 1243
development and evaln. of four RIAs for estril in saliva (A), 1254
development of buffers for ultrarapid RIAs (A), 1272
development of competitive solid-phase RIAs for both total and free T₄ (A), 1169
development of direct RIA kits for human complement anaphylatoxins (A), 1206
development of magnetic solid-phase RIA for triiodothyronine (A), 1186
digoxin assay by fluorescence polarization immunoassay and RIA methods (A), 1179
diluting serum before RIA does not prevent prednisolone binding to protein (L), 1989
direct measurement of testosterone in a pediatric center, with an RIA kit and unextracted serum (SN), 1796
direct RIA and gas chromatog.-mass spectrometry compared for detn. of melatonin in plasma (L), 1703
direct RIA for aldosterone in plasma, 268
direct RIA for melatonin in plasma (L), 396
direct RIA for prostaglandin E₂ metabolite levels in plasma (A), 1240
direct RIA for serum 17 β -estradiol (A), 1255
direct RIA of plasma thromboxane B₂ and 6-keto-PGF_{1 α} (A), 1252
direct serum estradiol assay (L), 1994
discrepant values in HCG testing using commercial RIA kits (A), 1171
DNA interference with RIA procedures, 1912
double-antibody RIA for myelin basic protein: significance in head injury (A), 1179
effect of albumin concentration on equil. RIA of serum free thyroxine with labeled thyroxine analog (Amerlex® free T₄) (L), 1861
effect of albumin concn. on assay of serum free thyroxine by equilibrium RIA with labeled thyroxine analog (Amerlex® free T₄) (SN), 321
effect of Fluosol-DA on RIA results (SN), 1418
effect of Fluosol-DA on tests performed by RIA (A), 1241
effect of light on ¹²⁵I-labeled triiodothyronine in different RIA buffer systems (L), 394
effect of specimen collection and prepn. on RIA of thioridazine (A), 1210
estrone sulfate concns. in plasma of normal individuals, postmenopausal women with breast cancer, and men with cirrhosis, 86

evaln. of an RIA for estradiol in unextracted serum (SN), 1961
 evaln. of an RIA for measurement of free T₃ (A), 1183
 evaln. of digoxin assay on Bector-Dickinson ARIA-HT (A), 1246
 evaln. of five RIA procedures for human thyroid-stimulating hormone (A), 1186
 evaln. of 10 kits for detn. of choriogonadotropin in serum (SN), 1828
 evaln. of new single-tube direct RIA for serum free T₃ in cases with normal and abnormal TBG levels (A), 1160
 evaln. of RIA specific for human pancreatic lipase (A), 1244
 evaln. of two methods for serum vancomycin measurement: HPLC and RIA (A), 1180
 evaln. of various blood collection tubes for detn. of free T₄ by RIA (A), 1184
 experiences with high throughput automated RIA system (ARIA-HT) (A), 1243
 field evaln. of multichannel RIA analyzer (A), 1242
 flexibility of automated RIA on ARIA HT with digoxin as an example analyte (A), 1245
 fluorescence polarization immunoassay of serum digoxin: comparison of the Abbott immunoassay with the Amerlex RIA (L), 586
 free thyroxin by RIA: evaln. of direct method involving a radiolabeled thyroxin analog, 1781
 further studies on danazol interference in testosterone RIAs (A), 141
 highly specific automated hCG RIA using a recyclable antigen chamber (A), 1245
¹²⁵I-labeled RIA kits for progesterone evald. for use in an in vitro fertilization program, 1024
 improved dialysis method for free thyroxin in serum compared with five commercial RIAs in nonthyroidal illness and subjects with abnormal concns. of thyroxin-binding globulin, 816
 inter- and intralaboratory quality-control survey of RIA of insulin, thyroxin, thyrotropin, cortisol, digoxin, gastrin, β_2 -microglobulin, and IgE in Japan with commercially available kits, 1501
 interference in RIA of total serum thyroxin and free thyroxin due to thyroxin-binding autoantibodies (L), 1324
 interference with carcinoembryonic antigen RIAs by glycosaminoglycans, and their removal, 2049
 interrelations of the various math. approaches to RIA, 284
 isolation and characterization of electrophoretic variants of prostatic acid phosphatase, 1886
 lack of cross reactivity of peptide YY and neuropeptide Y with antibodies to pancreatic polypeptide in RIA (L), 1553
 logit-log RIA data reduction: weighted vs unweighted (L), 391
 meaning of serum free-thyroxin values in nonthyroidal illnesses: seven methods compared (SN), 2091
 measurement of arginine vasopressin by RIA using Bond Elut extraction column (A), 1161
 measurement of intrinsic factor-blocking antibodies by solid-phase RIA (A), 1214
 measurement of tetrahydrocannabinol in saliva by competitive binding: performance of oral THC direct RIA kit (A), 1275
 methodology and standn. of apolipoprotein A-I immunoassays (R), 415
 microbial, and RIA assays for folic acid in whole blood compared: effect of Zn nutriture (L), 2117
 monoclonal antibodies to plasma low-density lipoproteins. I. enhanced binding of ¹²⁵I-labeled LDL by use of two monoclonal antibodies, 1890
 monoclonal antibodies to plasma low-density lipoproteins. II. evaln. for use in RIA for apolipoprotein B in coronary artery disease, 1898
 monoclonal antibodies used to detect human placental alk. phosphatase, 115
 new heterogeneous assay sepn. technique (A), 1240
 on standards provided with digoxin RIA kits (L), 734
 performance characteristics of Corning/IF Ab radioassay: screen for PA (A), 1282
 previous work overlooked (L), 1445
 quantn. of free β -subunit of hCG in the presence of hCG (A), 1217
 rapid and sensitive RIA for beta-hCG (A), 1244
 rapid solid-phase RIA for prolactin (A), 1178
 response curves for RIA, 1762
 RIA for arginine-vasopressin in cold ethanol extracts of plasma (SN), 882

RIA for bupropion in plasma: tritiated and iodinated radioligands compared (SN), 462
 RIA for corticosteroid-binding globulin, 1389
 RIA for detection of tetrahydrocannabinol metabolites in urine (A), 1199
 RIA for 1,25-dihydroxycholecalciferol (SM), 196
 RIA for estrone without chromatog. (A), 1255
 RIA for pancreatic polypeptide, and its age-related changes in concn., 1923
 RIA for prothrombin (SN), 842
 RIA for urinary catecholamines, epinephrine and norepinephrine (A), 1240
 RIA of bile acids in tissue, bile, urine (SN), 494
 RIA of cholecystokinin in human plasma using non cross-reactive antiserum (A), 1171
 RIA of cortisol in saliva with the "GammaCoat" kit (L), 1869
 sandwich assay for human PAP based on two monoclonal antibodies (A), 1179
 second-generation solid-phase RIA method (A), 1253
 sensitive double-antibody solid-phase RIA to measure thyrotropin (A), 1186
 sensitive RIA for measurement of low levels of alpha-fetoprotein in serum (A), 1215
 sepn. of bound and free ligand by ethacridine (RivanolTM) in thyroxin RIA, 1937
 simplified liquid-chromatog. anal. for cyclosporin A, and comparison with RIA (SN), 180
 software for Apple II handling of endocrine RIA data (L), 1863
 solid-phase chemiluminescence immunoassay for plasma estradiol-17 β during gonadotropin therapy compared with two RIAs, 2068
 solid-phase RIA for free estriol in unextracted serum (A), 1267
 solid-phase RIA for placental lactogen in serum (SN), 168
 solid-phase RIA of fragment D of fibrinogen by use of a low-affinity monoclonal antibody, 778
 solid-state multihead gamma counter in 2nd generation system for solid-phase immunoassay (S), 1620
 specificity of β -choriogonadotropin assays for the hormone and for an immunoreactive fragment present in urine during normal pregnancy (SN), 667
 specific micro-RIA for prednisolone in serum, 1358
 three commercial methods for serum ferritin compared; high-dose "hook effect" eliminated (SN), 1109
 totally automated serum thyroxine, T₃ uptake, and FTI utilizing ARIA HT (A), 1184
 triiodothyronine RIA automated on the ARIA systems (A), 1186
 "unbound analog" RIAs for free thyroxin measure albumin-bound hormone fraction, 1408
 unconjugated estriol in serum as measured by liquid chromatog. with electrochem. detection, compared with RIA, 1463
 use of immunoaffinity chromatog. for purifn. of ¹²⁵I-labeled prolactin, 241
 use of qual. RIA for urine beta HCG in the emergency room (A), 1161
 use of superparamagnetic particles as a solid-phase reagent for RIAs (A), 1242
 utilization of acrylamide columns to facilitate direct measurement of human urinary follicle stimulating hormone and luteinizing hormone by RIA (A), 1253
 validation of single tube RIA for direct measurement of free T₄ (A), 1160
 variability of serum prostatic acid phosphatase in patients with stage-D adenocarcinoma of prostate as measured by RIA (A), 1217
 variation among insulin RIAs is mainly a matter of standardization (L), 1689
Radiimmunoassay
 radioimmunoassay for a monoclonal antibody-defined tumor marker, CA 19-9 (SN), 549
Radiometric assay
 detn. of ultrafiltrable Zn in plasma by flameless at. absorp. spectrophotometry (SN), 1974
 spectrophotometry and radiometry of angiotensin-converting enzyme compared (L), 1990
Radioreceptor assay
 radioreceptor assay for propranolol and other β -adrenergic blockers (A), 1275
 specificity of β -choriogonadotropin assays for the hormone and for an immunoreactive fragment present in urine during normal pregnancy (SN), 667

Raji cell assay
 absorbance nephelometry of C1q-precipitable immune complexes: method comparisons and clin. correlations (SN), 2082
Random-access analysis
 adaptation of lipid substrate tests to random-access clin. analyzer (A), 1228
 appln. of enzyme test reagents to random access clin. analyzer (A), 1277
 expl. detn. of reagent carryover (A), 1207
 performance of prototype test-selective clin. analyzer (A), 1251
Rate nephelometry
 clin. evaln. of rate nephelometric inhibition immunoassay for carbamazepine (A), 1274
 evaln. of rate-nephelometric assay for rheumatoid factor (A), 1272
 first-year lab. performance of quant. rheumatoid factor assay (A), 1180
 IgG index: imprecision and automated rate nephelometry (A), 1188
 optimizing ref. values for measurement of alpha₁-antitrypsin in serum: comparison of three methods (SN), 1838
 rate nephelometric detn. of IgE (L), 1556
 rate nephelometric measurement of serum retinol-binding protein (A), 1195
Rate turbidimetry
 rate turbidimetric immunoassay for quantn. of theophylline in serum (A), 1236
Rats
 agarose gel electrophoretic sepn. of alkaline phosphatase isoenzymes in tissues from dog and rat, and their use in toxicity assessment (A), 1211
 creatinine assay of rat and dog urine and serum by Astra-4 and comparison to Rotochem II A (A), 1211
 detection of renal damage in rats by urine total proteins and electrophoresis (A), 1211
 identn. of specific prostaglandin-binding protein in rat ileum (A), 1210
 rat erythrocyte cholinesterase measurement on a centrifugal analyzer (A), 1281
 RIA of bile acids in tissue, bile, urine (SN), 494
 stability of serum sorbitol dehydrogenase (A), 1282
Receiver-operating characteristic curves
 alternative to receiver-operating characteristic curves (L), 1445
 selecting a diagnostic study's cutoff value by using its receiver operating characteristic curve (L), 571
Reference interval
 AACC ionized Ca working group on ref. intervals (A), 1187
 absorbance nephelometry of C1q-precipitable immune complexes: method comparisons and clin. correlations (SN), 2082
 apoenzyme content of serum aminotransferases and plasma pyridoxal-5'-phosphate concn., 789
 appln. of statistical approach for collecting ref. values of haematochem. parameters (A), 1191
 assay of urinary N-acetyl- β -glucosaminidase in a centrifugal analyzer, 1717
 automated particle-counting immunoassay of C-reactive protein: appln. to serum, cord serum, and CSF (SN), 1127
 automated rate-immunonephelometric detn. of serum prealbumin (transferrin) (SN), 564
 Ca²⁺ in milk as detd. with a Ca-selective electrode (SN), 858
 calcn. of a "reference change" for comparing two consecutive measurements, 25
 β -carotene detd. in serum by liquid chromatog. with an internal std., 1042
 clin. acceptance of a multi-test ref. region for biochem.-panel results, 1724
 clin. evaln. of immunoinhibition detn. of creatine kinase B subunits in coronary care (SN), 353
 clin. evaln. of the liquid-chromatog. detn. of urinary free cortisol (SN), 847
 computer anal. of normal and abnormal population data for Corning's B12/10late assay (A), 1191
 concns. of dehydroepiandrosterone sulfate in the plasma of normal and abnormal women (L), 1992
 densitometry of phosphatidylcholine and sphingomyelin in high-density lipoproteins (SN), 1435
 detg. plasma ammonia N with an ion-selective electrode (SN), 867
 detn. of ultrafiltrable Zn in plasma by flameless at. absorp. spectrophotometry (SN), 1974

- detn. of urinary normetanephrine and metanephrine by radial-compression liquid chromatog. and electrochem. detection (SN), 305
- detn. of urinary vanillylmandelic acid by liquid chromatog. with electrochem. detection (SN), 878
- 24,25-dihydroxyvitamin D₃ in serum: sample purifn. with Sep-Pak C-18 cartridges and liquid chromatog. before protein-binding assay (SN), 1806
- direct RIA for aldosterone in plasma, 268
- direct spectrophotometry of angiotensin converting enzyme in serum (SN), 1093
- effect of protein on detn. of total bile acids in serum (SN), 171
- enzyme immunoassay for carcinoembryonic antigen, 2019
- enzyme immunoassay of thyroxine-binding globulin in dried blood samples on filter paper (SN), 1437
- enzyme-linked immunosorbent assay for lactose synthase (galactosyltransferase) in serum, and appln. as a tumor marker in ovarian carcinoma, 1928
- estn. of ref. ranges from markedly skewed distributions (A), 1196
- estrone sulfate concns. in plasma of normal individuals, postmenopausal women with breast cancer, and men with cirrhosis, 86
- evaln. of accuracy of 20 different test kits for enzymic detn. of cholesterol, 1916
- evaln. of a colorimetric method for detn. of glycosylated Hb (SN), 135
- evaln. of the Coomassie Brilliant Blue G-250 method for urinary protein, 1946
- fluorimetry of heat-stable alk. phosphatase (Regan enzyme) acty. in serum from smokers and nonsmokers, 260
- free ionized Ca in serum. increase in the upper - ref. limit for ambulatory patients and relationship to concurrently measured oncotic pressure (A), 1187
- free thyroxin by RIA: evaln. of direct method involving a radiolabeled thyroxin analog, 1781
- gas-chromatog. detn. of cholesterol sulfate in plasma and erythrocytes, for diagnosis of recessive X-linked ichthyosis, 1404
- immunonephelometry of apolipoprotein A-II in hyperlipoproteinemic serum, 1385
- immunonephelometry of retinol-binding protein in serum and urine (SN), 853
- improved detn. of AI in serum by electrothermal at. absorption spectrophotometry (SN), 1087
- improved dialysis method for free thyroxin in serum compared with five commercial RIAs in nonthyroidal illness and subjects with abnormal concns. of thyroxin-binding globulin, 816
- improved Ellman procedure for erythrocyte cholinesterase (SN), 365, (2072)
- improved measurement of acetylsalicylic acid esterase in serum (SN), 491
- improved turbidimetric assay for lysozyme in urine, 1488
- increased urinary excretion of free 20 α - and 20 β -dihydrocortisol in a hypercortisolemic but hypocortisolemic patient with Cushing's disease (CR), 385
- liquid-chromatog. assay and identn. of mono- and diester conjugates of bilirubin in normal serum, 1767
- liquid-chromatog. detn. of indole-3-acetic acid and 5-hydroxyindole-3-acetic acid in plasma, 1354
- liquid-chromatog. profiles of urinary porphyrins (SN), 527
- liquid-chromatog. sepn. and detn. of coproporphyrin I and III in urine (SN), 350
- optimized atomic absorption spectrophotometry of Zn in CSF (SN), 486
- optimizing ref. values for measurement of alpha₁-antitrypsin in serum: comparison of three methods (SN), 1838
- pattern anal. of pediatric microchem. profiles (A), 1196
- pseudocholinesterase/high-density lipoprotein cholesterol ratio in serum of normal persons and of hyperlipoproteinemics, 1031
- quant. enzyme antigen immunoassay of acetylcholinesterase in amniotic fluid, 1061
- quantifn. of urinary oxalate with oxalate oxidase from beet stems (SN), 1815
- radioenzymatic assay for direct measurement of plasma pyridoxal 5'-phosphate, 642
- radioisotopic method for fructose-1-phosphate aldolase that facilitates diagnosis of hereditary fructose intolerance, 1955
- ref. intervals for amylase isoenzymes in serum and plasma of infants and children (SN), 1119
- ref. intervals for selected biochem. indices in a large occupational health program (A), 1191
- RIA for arginine-vasopressin in cold ethanol extracts of plasma (SN), 882
- RIA for corticosteroid-binding globulin, 1389
- RIA for pancreatic polypeptide, and its age-related changes in concn., 1923
- "sandwich" enzyme immunoassay for serum ferritin with polypropylene test tubes as the solid phase (SN), 681
- serum total and unbound bilirubin in Chinese neonates (A), 1222
- sex-related normal intervals for an index of urinary creatine excretion (L), 1697
- short-term biol. variation of plasma analytes in renal disease (SN), 508
- time-resolved fluorimmunoassay of human pancreatic phospholipase A₂, 1777
- total and ionized Ca in plasma and saliva (L), 1856
- total bone and liver alk. phosphatases in plasma: biol. variations and ref. limits, 634
- ultracentrif. in swinging-bucket and fixed-angle rotors evald. for isolation and detn. of high-density lipoprotein subfractions HDL₂ and HDL₃, 656
- ultrafiltrable Ca and Mg in ultrafiltrates of serum prepared with the Amicon MPS-1 system (SN), 519
- urinary 4-hydroxy-3-methoxymandelic, 4-hydroxy-3-methoxyphenylacetic, and 5-hydroxy-3-indoleacetic acids detd. by liquid chromatog. with electrochem. detection (SN), 876
- urinary oxalate detn. by use of immobilized oxalate oxidase in a continuous-flow system, 16
- use of existing data on biol. variation advocated (L), 731
- viscosity adaption for automated micromethod of flame at. absorption spectrometry, and intracellular trace-element anal. after pressure decompr.: Zn detn. in plasma and erythrocytes, 1522
- Reference materials**
- See also Standard Reference Materials
- anal. of a study of HCG preps. based on 2nd-IRP standardization (A), 1269
- transfer of bilirubin measurement accuracy through the NBS/NRSCC proposed system (A), 1164
- Reference methods**

Rheumatoid arthritis

absorbance nephelometry of C1q-precipitable immune complexes: method comparisons and clin. correlations (SN), 2082
characterization and elimination of a factor in serum that interferes with turbidimetry and nephelometry of lipase, 96

Rheumatoid factor

evaln. of rate-nephelometric assay for rheumatoid factor (A), 1272
first-year lab. performance of quant. rheumatoid factor assay (A), 1180
nephelometric detn. of C-reactive protein, antistreptolysin O and rheumatoid factors by latex agglutination tests (A), 1189
performance of quant. assay for rheumatoid factor in a clin. lab. (A), 1205

Rh immunization

disagreement of anti-D titers in serum and estimates of bilirubin in amniotic fluid in a case of severe Rh immunization (L), 2116

Rocket immunoelectrophoresis

See also Immunoelectrophoresis
electroimmunoassay of albumin in human serum: accuracy and long-term precision (SN), 1787
prepn. of soluble apolipoproteins A-I, B, and C-II with a chromatofocusing column, and evaln. of their concns. in serum in pulmonary disease, 1731

Rubella

measurement of IgM antibody to Rubella virus by enzyme immunoassay (A), 1205

Saccharogenic assay

ref. intervals for amylase isoenzymes in serum and plasma of infants and children (SN), 1119

Salicylate

See also Aspirin

better method for eliminating salicylate interference with measurement of acetaminophen (L), 590
measurement of true salicylate concns. in serum from patients with Reye's syndrome, 1012
salicylate detd. with a microcentrif. analyzer, and compared with Du Pont aca, Trinder, and liquid-chromatog. methods (SN), 839
salicylate interference with measurement of acetaminophen (L), 575
salicylate interference with measurement of acetaminophen—a reply (L), 987
tableted enzymatic salicylate reagent for Paramax anal. system (A), 1274
use of heparinized samples for salicylate detn. with the Du Pont aca validated (L), 214

Saliva

aminoglycoside antibiotics do not appear in saliva (L), 988
development and evaln. of four RIAs for estriol in saliva (A), 1254
free and total lysozyme detd. in parotid saliva (L), 1551
hormones in saliva: mode of entry and consequent implications for clin. interpretation, 1752
HPLC anal. of amiodarone and its desalkylmetabolite in plasma, red cell hemolysate, and saliva (A), 1204
measurement of tetrahydrocannabinol in saliva by competitive binding: performance of oral THC direct RIA kit (A), 1275
polarization fluoroimmunoassay of 11-deoxycortisol in serum and saliva (SN), 1803
RIA of cortisol in saliva with the "GammaCoat" kit (L), 1869
salivary urea nitrogen index of renal function: test-strip method (SN), 1825
total and ionized Ca in plasma and saliva (L), 1856

Sample collection

ferritin concn. in plasma from capillary (finger prick) blood and venous blood (SN), 871

Sample handling

automated sample handling in the Kone Progress selective analyser (A), 1163
Ca²⁺ in milk as detd. with a Ca-selective electrode (SN), 858
does ionized Ca need to be measured as a stat sample? (A), 1271
effect of short-term storage conditions on alcohol concns. in blood from living subjects (SN), 1959
evaln. of various blood collection tubes for detn. of free T₄ by RIA (A), 1184
insulin immunoreactivity stabilized in serum and plasma at ambient temps. (L), 1559
lipid concns. in serum and EDTA-treated plasma from fasting and nonfasting normal persons, with particular regard to high-density lipoprotein cholesterol (SN), 505

liquid-chromatog. profiles of urinary porphyrins (SN), 527
robotics (A), 1154
sample identn. and handling: a unique and smooth method (A), 1257
stability of HbA_{1c} by ion exchange, affinity, HPLC, and isoelectric focusing (A), 1230
stability of high-density-lipoprotein cholesterol in frozen sera (L), 567
study of specimen stability during transport through pneumatic tube system (A), 1256
tech. considerations: use of liq. chromatog. in therapeutic drug monitoring (R), 1331
temp. dependency of apparent cyclosporin A concns. in plasma (L), 1865

Sample preparation

anal. of clin. drugs using on-line solid phase solid phase sorbent cartridges (A), 1176
comparison of EDTA-derived plasma and serum from serum separator tubes in assay of selected basic drugs (A), 1236
comparison of two separation media for detn. of Mg content of blood mononuclear cells (A), 1271
comparison of XAD-2 resin and ToxElute columns in urine drug abuse testing by TLC (A), 1199
24,25-dihydroxyvitamin D₃ in serum: sample purifn. with Sep-Pak C-18 cartridges and liquid chromatog. before protein-binding assay (SN), 1806
effect of blood collection systems on anal. of propranolol (A), 1236
effect of protein on detn. of total bile acids in serum minimized by preheating (L), 1871
effect of specimen collection and prepn. on RIA of thioridazine (A), 1210
evaln. of 3 commercial silica cartridges for sepn. of vit. D and its metabolites (A), 1157
evaln. of plasma separator micro blood collection device containing Li heparin as anticoagulant (A), 1220
evaln. of sample-prepn. procedure for bile acids in serum and bile (L), 1694
evaln. of serum separator tube for collection of capillary blood (A), 1257
HPLC of 5-S-cysteinylolopa in urine after clean-up with phenylboronate gel (A), 1168
measurement of arginine vasopressin by RIA using Bond Elut extraction column (A), 1161
methyl p-hydroxybenzoate as preservative in phosphate-buffered salt soln. for electronic cell counters (L), 1693
"on-line" sample-pretreatment before liquid-chromatog. assay of low-concn. compounds in body fluids, illustrated by triamcinolone assay, 1367
sample prepn. with ion-exchange resin before liquid-chromatog. detn. of plasma catecholamines (SN), 1426
solid-state extraction of cortisol from plasma or serum for liquid chromatog. (SN), 1808
use of immunoaffinity chromatog. for purifn. of ¹²⁵I-labeled prolactin, 241
utilization of acrylimide columns to facilitate direct measurement of human urinary follicle stimulating hormone and luteinizing hormone by RIA (A), 1253

Sarcoidosis

colorimetry of angiotensin converting enzyme in serum, 1399
direct spectrophotometry of angiotensin converting enzyme in serum (SN), 1093
interpretation of CSF protein assays in various neurologic diseases, 1028

Scanning auger microscopy

anal. of Thorotrast granuloma by scanning auger microscopy (L), 1704

Screening

acetylcholinesterase screening test for neural tube defect, 1065
β-carotene detd. in serum by liquid chromatog. with an internal std., 1042
clin. evaln. of the liquid-chromatog. detn. of urinary free cortisol (SN), 847
cloxacillin interferes with screening for Bence Jones proteins (L), 1309
conclusions from a pilot immunoreactive trypsin newborn screen for cystic fibrosis (L), 1559
detection of morphine in urine by hemagglutination inhibition, with use of lyophilized reagents, 1376
development of a screening system for cystic fibrosis (S), 1593
EMIT st for emergency drug screening: preliminary experience (A), 1274
enzyme immunoassay of thyroxine-binding globulin in dried blood samples on filter paper (SN), 1437
free erythrocyte protoporphyrin and zinc protoporphyrin measurements compared as primary screening methods for detection of Pb poisoning, 1467

free thyroxine by RIA: evaln. of direct method involving a radiolabeled thyroxine analog, 1781

glycosylated Hb measured by affinity chromatog.: micro-sample collection and room-temp. storage (SN), 1080
novel liposome composition for rapid colorimetric test for systemic lupus erythematosus (S), 1587
optimizing ref. values for measurement of alpha₁-antitrypsin in serum: comparison of three methods (SN), 1838
oxprenolol metabolite interferes with screening tests for 5-hydroxyindole in urine (L), 743
quant. enzyme antigen immunoassay of acetylcholinesterase in amniotic fluid, 1061
rapid drug screening with confirmation using Toxi-Lab (A), 1197
screening for congenital hypothyroidism by assay for thyrotropin in dried blood: effect of parenteral nutrition (L), 400
screening for macroamylasemia with PEG pptn. method (A), 1250
screening for neonatal Duchenne muscular dystrophy by bioluminescence measurement of creatine kinase in blood spotted on paper (SN), 161
screening of angiotensin-T converting enzyme acty. with appln. of Kasahara's method to discrete-t_{1/2} automated analyzer (A), 1266
sensy. and specificity of the H₂ breath anal. test for detecting malabsorption of physiol. doses of lactose (SN), 545
test-strip screen for optimization of microscopic urinalysis (L), 1692
urinary 4-hydroxy-3-methoxymandelic, 4-hydroxy-3-methoxyphenylacetic, and 5-hydroxy-3-indoleacetic acids detd. by liquid chromatog. with electrochem. detection (SN), 876
use of HPLC to supplement a BIA in screening newborns for MSUD: technolog. and cost effectiveness (A), 1162

Selected Methods

comments: proposed Selected Method for electrophoresis of LDH isoenzymes (L), 1446
electrophoresis of lactate dehydrogenase isoenzymes (SM), 189
on electrophoresis of lactate dehydrogenase isoenzymes (L), 1700
revisions of the 1963 semidine HCl std. method for inorg. P (SM), 184
RIA for 1,25-dihydroxycholecalciferol (SM), 196
simultaneous detn. of retinol and α-tocopherol in serum or plasma by liquid chromatog. (SM), 708

Selenium

Cu, Mg, Se, and Zn in human mononuclear cells and neutrophils (A), 1286

Semidine

revisions of the 1963 semidine HCl std. method for inorg. P (SM), 184

Seminal plasma

immunonephelometry of specific proteins in seminal plasma, 618
micromethod detn. of lactate dehydrogenase isoenzyme C₄ acty. in seminal plasma, 1518

Seminoma

serum lactate dehydrogenase isoenzyme 1 in a patient with seminoma (L), 1552

Sendroy, Jr., Julius

(obit), 2114

Serotonin

detn. of whole blood serotonin by HPLC with electrochem. detection (A), 1201
mol. markers of hemostatic disorders: implications in diagnosis and therapeutic management of thrombotic and bleeding disorders (S), 1641
simple, specific and sensitive radioenzymatic microassay for picogram quantities of serotonin or acetylserotonin in biol. fluids and tissues (A), 1262

Serous ovarian tumors

enzymatic properties of human serous ovarian tumor amylase (A), 1250

Sex- and age-related effects

apoenzyme content of serum aminotransferases and plasma pyridoxal-5'-phosphate concn., 789
blood chem. and hematologic values in elderly compared to young adults (A), 1191
clin. evaln. of the liquid-chromatog. detn. of urinary free cortisol (SN), 847
ferritin concns. in plasma from capillary (finger prick) blood and venous blood (SN), 871
free thyroid hormone index, thyroid hormone/thyroxine-binding globulin ratio, and thyroxine-binding globulin uptake, and thyroxine-binding globulin compared for diagnostic value regarding thyroid function, 74, (414)

Testosterone

direct measurement of testosterone in a pediatric center, with an RIA kit and unextracted serum (SN), 1796
further studies on danazol interference in testosterone RIAs (SN), 141
modified method for detg. free testosterone in serum (A), 1255

Tetrahydrocannabinol

measurement of tetrahydrocannabinol in saliva by competitive binding: performance of oral THC direct RIA kit (A), 1275
RIA for detection of tetrahydrocannabinol metabolites in urine (A), 1199

Thalassemia

pancreatic lipase in serum of patients with β -thalassemia major (L), 2003

Theophylline

cathodally migrating CK in sera of patients treated with theophylline, and its diagnostic implications, 1484
cathodally migrating creatine phosphokinase in serum of theophylline-treated patients (A), 1219
clin. evaln. of monoclonal-based nephelometric immunoassay for theophylline (A), 1156
comparison of methods for clin. detn. of serum theophylline in children (A), 1157
comparison of six methods for theophylline (A), 1238
competitive nephelometric inhibition immunoassay of theophylline with monoclonal reagents: comparison with fluorescence polarization and EMIT (L), 1857
concurrent measurement of theophylline and caffeine in neonates by interference-free liquid-chromatog., 1934
discrepant results for detn. of theophylline in serum from a patient with renal failure (A), 1275
discrepant results for theophylline in a patient with renal failure (L), 1870
double-antibody fluoroimmunoassay for aminoglycoside antibiotics, phenytoin, and theophylline in serum, 1015
evaln. of theophylline assay by fluorescence polarization immunoassay (A), 1238
fluorescence polarization analyzer (TDX) for measurement of aminoglycosides and theophylline (A), 1199
increase in apparent theophylline concn. in the serum of two uremic patients as measured by some immunoassay methods (caused by 1,3-dimethyluric acid?) (L), 1698
kinetically optimized microbore HPLC in high-speed monitoring of theophylline (A), 1158
lack of effect of probenecid on pharmacokinetics and renal elimination of theophylline (A), 1249
production of monoclonal antibodies to theophylline for clin. use (A), 1201
quantn. of haptens by homogeneous immunoprecipitation. 2. centrif. anal. for tobramycin, phenobarbital, and theophylline in serum (SN), 1540
radial partition immunoassay: monitoring theophylline levels in serum and plasma (A), 1198
rapid HPLC of theophylline following microscale protein pptn. (A), 1204
rate turbidimetric immunoassay for quantn. of theophylline in serum (A), 1236
simultaneous detn. of cimetidine, acetaminophen and theophylline by HPLC (A), 1209
theophylline concentrations may be falsely high in serum of uremic patients (L), 2125
theophylline substrate-labeled fluorescent immunoassay using monoclonal antibody (A), 1176
therapeutic drug monitoring of antiepileptics and theophylline by SLFIA (A), 1198
turbidimetric latex particle immunoassay: detn. of serum theophylline using the Technicon RA-1000 system (A), 1156
very precise measurement for theophylline on Du Pont aca analyzer (A), 1156

Therapeutic drug monitoring

See Monitoring therapy

Thiamin

detn. of thiamin and thiamin phosphate esters in blood by liquid chromatog. with post-column derivatization (SN), 2073

Thiocyanate

adsorption of SCN⁻ by anion-exchange resins and its anal. application (L), 403

Thiopental

reversed-phase liquid-chromatog. simultaneous anal. for thiopental and pentobarbital in serum (SN), 1097, (2072)

Thioridazine

effect of specimen collection and prepn. on RIA of thioridazine (A), 1210

Thiothixene

anal. of *cis*-thiothixene in plasma by HPLC (A), 1210

Thromboglobulin

mol. markers of hemostatic disorders: implications in diagnosis and therapeutic management of thrombotic and bleeding disorders (S), 1641

Thromboplastin

development of APTT assay for Du Pont aca analyzer (A), 1282
effect of vit. B6 compounds on blood clotting and platelet aggregation (A), 1283

Thrombosis

fluorometric heparin assay using Abbott VP to monitor DVT patients (A), 1282
mol. markers of hemostatic disorders: implications in diagnosis and therapeutic management of thrombotic and bleeding disorders (S), 1641

Thromboxanes

direct RIA of plasma thromboxane B₂ and 6-keto-PGF_{1 α} (A), 1252
hypercholesterolemic platelet dependence on calcium for thromboxane and 12-hydroxyeicosatetraenoic acid release (A), 1227
mol. markers of hemostatic disorders: implications in diagnosis and therapeutic management of thrombotic and bleeding disorders (S), 1641

Thymoma

macromolecular alk. phosphatase and an immunoglobulin G that inhibited alk. phosphatase in a patient's serum (CR), 375

Thyroglobulin

comparison of three thyroglobulin RIAs for management of thyroid cancer patients (A), 1169

Thyroid hormone

clin. value of free-thyroxine measurements, 2057
free thyroid hormone estimates related to measurements of total serum thyroid hormone and free thyroid hormone indices (L), 1866
how useful are thyroid-function tests for patients referring to ear-nose-throat clinics? (A), 1162
use of superparamagnetic particles as a solid-phase reagent for RIAs (A), 1242

Thyroid status

challenge of several concepts of free thyroxine index for assessing thyroid status in patients with altered thyroid-binding protein capacity, 56
clin. and lab. evaln. of a commercial kit for measurement of serum free thyroxine ("Amerlex Free T₄") (SN), 164
clin. evaln. of two direct procedures for free thyroxine, and of free thyroxine index detd. nonisotopically and by measuring thyroxine-binding globulin, 1908
clin. value of free-thyroxine measurements, 2057
effect of albumin concn. on assay of serum free thyroxine by equilibrium RIA with labeled thyroxine analog (Amerlex® free T₄) (SN), 321
free thyroid hormone estimates related to measurements of total serum thyroid hormone and free thyroid hormone indices (L), 1866
free thyroid hormone index, thyroid hormone/thyroxine-binding globulin ratio, triiodothyronine uptake, and thyroxine-binding globulin compared for diagnostic value regarding thyroid function, 74, (414)
free thyroxine by RIA: evaln. of direct method involving a radiolabeled thyroxine analog, 1781
free triiodothyronine and free thyroxine in sera of pregnant women and subjects with congenitally increased or decreased thyroxine-binding globulin, 1527
improved dialysis method for free thyroxine in serum compared with five commercial RIAs in nonthyroidal illness and subjects with abnormal concns. of thyroxine-binding globulin, 816
meaning of serum free-thyroxine values in nonthyroidal illnesses: seven methods compared (SN), 2091
serum thyrotropin and more accurate diagnosis of "thyroid hormone resistance" (L), 1997
totally automated serum thyroxine, T₃ uptake, and FTI utilizing ARIA HT (A), 1184

Thyrotropin

assay of thyrotropin in hyperthyroidism (L), 1688

biotin-avidin labelled EIA for quantn. of serum TSH using monoclonal antibodies (A), 1213

development of an IRMA magnetic solid-phase assay for human TSH (A), 1186

enhancing the sensitivity of an immunoradiometric assay for thyrotropin (L), 2127

enzyme immunoassay for hTSH in serum using monoclonal antibodies (A), 1185

evaln. of five RIA procedures for human thyroid-stimulating hormone (A), 1186

human thyrotropin radiolabel: specific acty., zero binding, and stability (L), 1870

inter- and intralaboratory quality-control survey of RIA of insulin, thyroxine, thyrotropin, cortisol, digoxin, gastrin, β_2 -microglobulin, and IgE in Japan with commercially available kits, 1501

measurement of thyroid stimulating immunoglobulin in sera of patients with Graves' and other thyroid diseases by radioreceptor assay (A), 1184

screening for congenital hypothyroidism by assay for thyrotropin in dried blood: effect of parenteral nutrition (L), 400

sensitive double-antibody solid-phase RIA to measure thyrotropin (A), 1186

serum thyrotropin and more accurate diagnosis of "thyroid hormone resistance" (L), 1997

systematic evaln. of TSH kits: package insert data as initial screen (A), 1184

TSH quantn. in human serum by sensitive and specific immunoradiometric assay (A), 1160

Thyroxine

anal. and clin. evaln. of direct free T₄ RIA (A), 1160

assay of serum thyroxine using the Du Pont aca (A), 1184

autoantibodies to thyroxine and interference with free-thyroxine assay (L), 581

challenge of several concepts of free thyroxine index for assessing thyroid status in patients with altered thyroid-binding protein capacity, 56, (414)

clin. and lab. evaln. of a commercial kit for measurement of serum free thyroxine ("Amerlex Free T₄") (SN), 164

clin. evaln. of two direct procedures for free thyroxine, and of free thyroxine index detd. nonisotopically and by measuring thyroxine-binding globulin, 1908

clin. value of free-thyroxine measurements, 2057

development of competitive solid-phase RIAs for both total and free T₄ (A), 1169

effect of albumin concentration on equil. RIA of serum free thyroxine with labeled thyroxine analog (Amerlex® free T₄) (L), 1861

effect of albumin concn. on assay of serum free thyroxine by equilibrium RIA with labeled thyroxine analog (Amerlex® free T₄) (SN), 321

effect of Fluosol-DA on RIA results (SN), 1418

EMIA: a nonradioisotopic method for quantn. of specific antigens (A), 1213

evaln. of homogeneous enzyme immunoassay for thyroxine in serum using the American Monitor Parallel Chem. analyzer (A), 1169

evaln. of serum T₄ levels in normal and abnormal sera using a Technicon RA-1000 system (A), 1159

evaln. of various blood collection tubes for detn. of free T₄ by RIA (A), 1184

fluorescence polarization assay for unsaturated thyroxine-binding sites (A), 1185

fluorescence polarization immunoassay for quantitating serum thyroxine (A), 1185

free thyroid hormone estimates related to measurements of total serum thyroid hormone and free thyroid hormone indices (L), 1866

free thyroxine by RIA: evaln. of direct method involving a radiolabeled thyroxine analog, 1781

free-thyroxine concn. as affected by major illness (L), 1702

free triiodothyronine and free thyroxine in sera of pregnant women and subjects with congenitally increased or decreased thyroxine-binding globulin, 1527

hormones in saliva: mode of entry and consequent implications for clin. interpretation, 1752

improved dialysis method for free thyroxine in serum compared with five commercial RIAs in nonthyroidal illness and subjects with abnormal concns. of thyroxine-binding globulin, 816

influence of age and sex on concn. of free thyroxine in serum and on the free thyroxine: total thyroxine ratio (SN), 1428

- interactions between L-thyroxine and alcohol dehydrogenase-dependent ethanol metabolism in livers from DBA-2J mice (A), 1211
- inter- and intralaboratory quality-control survey of RIA of insulin, thyroxine, thyrotropin, cortisol, digoxin, gastrin, β_2 -microglobulin, and IgE in Japan with commercially available kits, 1501
- interference in RIA of total serum thyroxine and free thyroxine due to thyroxine-binding autoantibodies (L), 1324

- kits for measurement of free thyroxine (L), 1317
- meaning of serum free-thyroxine values in nonthyroidal illnesses: seven methods compared (SN), 2091
- reliability of kit methods for free thyroxine: the Corning Test System (L), 1322
- sepn. of bound and free ligand by ethacridine (Rivanol™) in thyroxine RIA, 1937
- solid-phase antigen luminescence technique for thyroxine detns. (A), 1242
- solid-state multihead gamma counter in 2nd generation system for solid-phase immunoassay (S), 1620
- totally automated serum thyroxine, T_3 uptake, and FTI utilizing ARIA HT (A), 1184
- "unbound analog" RIAs for free thyroxine measure albumin-bound hormone fraction, 1408
- utility of replacing free thyroxine index detn. with free thyroxine (A), 1185
- validation of single tube RIA for direct measurement of free T_4 (A), 1160
- Thyroxine-binding globulin**
- enzyme immunoassay of thyroxine-binding globulin in dried blood samples on filter paper (SN), 1437
- enzyme inhibition assay for thyronine uptake method for use on Du Pont acca (A), 1185
- free triiodothyronine and free thyroxine in sera of pregnant women and subjects with congenitally increased or decreased thyroxine-binding globulin, 1527
- improved dialysis method for free thyroxine in serum compared with five commercial RIAs in nonthyroidal illness and subjects with abnormal concns. of thyroxine-binding globulin, 816
- influence of age and sex on concn. of free thyroxine in serum and on the free thyroxine: total thyroxine ratio (SN), 1428
- Tissue analysis**
- creatinine kinase acty. and isoenzyme pattern in various normal tissues and neoplasms, 2040
- cytoplasmic creatine kinase isoenzymes quantitated in tissue specimens obtained at surgery (SN), 310
- improved enzymatic detn. of total cholesterol in tissues (SN), 166
- RIA of bile acids in tissue, bile, urine (SN), 494
- Tobramycin**
- comparison of Abbott TDX gentamicin and tobramycin assays to Syva EMIT (A), 1175
- comparison of Syva EMIT Autolab 5000 and Beckman Auto ICS II systems for assay of gentamicin and tobramycin in human serum (A), 1200
- comparison of three systems for detn. of gentamicin and tobramycin (A), 1175
- double-antibody fluorimmunoassay for aminoglycoside antibiotics, phenytoin, and theophylline in serum, 1015
- evaln. of tobramycin assay on Du Pont acca (A), 1197
- liquid-chromatog. detn. of tobramycin in serum with spectrophotomet. detection (SN), 672
- protocol for study of drug interferences in lab. tests: cefotaxime interference in 24 clin. tests, 1736
- quantn. of haptens by homogeneous immunoprecipitation. 2. centrif. anal. for tobramycin, phenobarbital, and theophylline in serum (SN), 1540
- Tocopherols**
- liquid-chromatog. detn. of alpha- and gamma-tocopherols in erythrocytes, with fluorescence detection (SN), 1840
- simultaneous detn. of retinol and α -tocopherol in serum or plasma by liquid chromatog. (SM), 708
- Tonometry**
- effect of temp. on the p_{50} value for blood, 110
- Toxicity**
- free erythrocyte protoporphyrin and zinc protoporphyrin measurements compared as primary screening methods for detection of Pb poisoning, 1467
- use of laser-excited fluorescence to measure mixed-function oxidase acty. (S), 1616
- Toxicology**
- agarose gel electrophoretic sepn. of alkaline phosphatase isoenzymes in tissues from dog and rat, and their use in toxicity assessment (A), 1211
- biphasic profile in elimination of digoxin from serum after massive overdose (L), 393
- detn. of DEHP in pulmonary patients by gas chromatog. (A), 1264
- diagnostic potential of breath anal. (R), 5
- falsely high serum creatinine concn. associated with severe methanol intoxication (CR), 205
- improved Ellman procedure for erythrocyte cholinesterase (SN), 365, (2072)
- lab.-assisted toxicol. evaln. of emergency hospital admission involving a misrepresented Qualude tablet (A), 1165
- relationship of airborne lead to sudden infant death and cord blood lead (A), 1222
- Trace elements**

profiles of urinary volatiles from metabolic disorders characterized by unusual odors (SN), 1834
quantif. of urinary oxalate with oxalate oxidase from beet stems (SN), 1815
quant. uroporphyrin assays by the *aca* (A), 1190
reagent strip measurement of urine specific gravity with Ames Clini-Tek (A), 1164
RIA for detection of tetrahydrocannabinol metabolites in urine (A), 1199
RIA for urinary catecholamines, epinephrine and norepinephrine (A), 1240
RIA of bile acids in tissue, bile, urine (SN), 494
semiautomated detn. of urinary 17-hydroxycorticosteroids as Porter-Silber chromogens (L), 1695
semiquant. anal. of urinary glucose: three dipsticks compared (A), 1261
sensitive fluorimetric measurement of oxalic acid in urine (A), 1194
sepn. of alk. phosphatase isoenzymes from human kidney and comparison with alk. phosphatases from other human tissues, urine, and *Escherichia coli*, 100
sex-related normal intervals for an index of urinary creatine excretion (L), 1697
should routine microscopic examination of urine be discontinued? (L), 212
significance of hyperferritinuria (L), 212
simple, rapid spectrophotom. of urinary *N*-acetyl- β -D-glucosaminidase, with a chromogenic substrate, 1713
simplified method for enzymatic urine oxalate assay (A), 1260
six meth.ds for detg. urinary protein compared (SN), 553
specificity of β -choriogonadotropin assays for the hormone and for an immunoreactive fragment present in urine during normal pregnancy (SN), 667
stability of catecholamines in urine (L), 595
standard additions technique to improve system performance and usable range for urine electrolyte anal. on Astra-8 (A), 1187
"Tandem" urine pregnancy test evaluated (L), 2119
total urine protein: comparison of three quant. methods (A), 1247
triarterterene interferes in urinary catecholamine anal. (L), 1325
turbidimetric measurement of total urinary proteins: revised method (A), 1189
urinary catecholamines: method modifn. comparison and patient studies (A), 1167
urinary 5-hydroxyindole-3-acetic acid by liquid chromatog. (A), 1202
urinary 4-hydroxy-3-methoxymandelic, 4-hydroxy-3-methoxyphenylacetic, and 5-hydroxy-3-indoleacetic acids detd. by liquid chromatog. with electrochem. detection (SN), 876
urinary lactose and galactose in infants and children (A), 1233
urinary oxalate detn. by use of immobilized oxalate oxidase in a continuous-flow system, 16
urine monitoring tests for avoidance of recurrent uric acid nephrolithiasis (A), 1165
urine urea Ni as measured in the Beckman Astra-8 (L), 1310
validation of new automated (DuPont *aca*) urinary total protein assay using a ref. biuret method (A), 1279
visual assay for urine HCG using monoclonal antibodies in a simultaneous TEMA (A), 1245
- Valproic acid**
detn. of free valproate by fluorescence polarization immunoassay (A), 1176
EMIT total and free valproic acid using the Flexigam (A), 1276
fluorescence polarization immunoassay for quantn. of valproic acid (A), 1275
free and bound valproic acid sepd. by two methods of ultrafiltration (L), 1441
free fraction of valproic acid: same in serum and plasma (L), 1449
gas-chromatog. detn. of valproic acid in serum without derivatization (L), 990
semi-automated continuous-flow enzyme immunoassay for antiepileptic drugs in serum (SN), 1790
total automation of SLFIAs for ethosuximide and valproic acid (L), 1236
valproic acid does not interfere with enzymatic detn. of free fatty acids in plasma (L), 1322
- Vancomycin**
evaln. of two methods for serum vancomycin measurement: HPLC and RIA (A), 1180
- Vanillylmandelic acid**
are random urine specimens acceptable for HVA and VMA detns.? (A), 1234
capillary gas-chromatog. detn. of urinary homovanillic and vanillylmandelic acids (SN), 828
detn. of urinary vanillylmandelic acid by liquid chromatog. with electrochem. detection (SN), 878
increased urinary vanillylmandelic acid excretion in a patient with essential hypertension and hyperthyroidism (L), 576, (1328)
urinary 4-hydroxy-3-methoxymandelic, 4-hydroxy-3-methoxyphenylacetic, and 5-hydroxy-3-indoleacetic acids detd. by liquid chromatog. with electrochem. detection (SN), 876
- Variation, source of**

5 REVIEW: The Diagnostic Potential of Breath Analysis

Antony Manolis

16 Urinary Oxalate Determination by Use of Immobilized Oxalate Oxidase in a Continuous-Flow System

Nicholas Potezny, Renze Bais, Peter D. O'Loughlin, John B. Edwards, Allan M. Role, and Robert A. J. Conyers

21 Comparison of Amniotic Fluid Alpha-Fetoprotein Reactivity to *Lens culinaris* Agglutinin and Concanavalin A in Crossed-Affinity Immunoelectrophoresis: Ancillary Tests in the Prenatal Diagnosis of Severe Fetal Malformations

K. Toftgaard-Larsen, E. Kjaersgaard, and B. Nergaard-Pederson

25 On the Calculation of a "Reference Change" for Comparing Two Consecutive Measurements

Eugene K. Harris and Toshio Yasaka

31 Assessment of the Fundamental Accuracy of the Jendrassik-Gróf Total and Direct Bilirubin Assays

Donald H. Lo and Tai-Wing Wu

37 A Diazo-Based Dry Film for Determination of Total Bilirubin in Serum

Glen M. Dappen, Michael W. Sundberg, Tai-Wing Wu, Bruce E. Babb, and James R. Shaeffer

42 Remazol Brilliant Blue as a Pre-Stain for the Immediate Visualization of Human Serum Proteins on Polyacrylamide Gel Disc Electrophoresis

A. M. Saoji, C. Y. Jad, and S. S. Kelkar

45 Evolutionary Changes in Acute-Phase Proteins in Alcoholic Hepatocellular Diseases

C. Perier, A. Chamson, R. Engler, and J. Frey

48 Heterozygote Detection in Congenital Adrenal Hyperplasia

David J. Handelsman, Chris J. Howe, Ann J. Conway, and John R. Turtle

51 Multi-Enzyme Membrane Electrodes for Determination of Creatinine and Creatine in Serum

Toshio Tsuchida and Kentaro Yoda

56 A Challenge of Several Concepts of Free Thyroxine Index for Assessing Thyroid Status in Patients with Altered Thyroid-Binding Protein Capacity

Timothy J. Wilke

60 Time-Resolved Fluoroimmunoassay of Human Choriongonadotropin

Kim Petterson, Harri Siitari, Ilkka Hemmälä, Erkki Soini, Timo Lövgren, Veli Hänninen, Pirjo Tanner, and Ulf-Hakan Stenman

65 Time-Resolved Fluorometer for Lanthanide Chelates—A New Generation of Nonisotopic Immunoassays

Erkki Soini and Hannu Kojola

69 Unpredictable Error in Calculated Bicarbonate Homeostasis during Pediatric Intensive Care: The Delusion of Fixed pH'

Robert C. Rosan, Derek Enlander, and Jan Ellis

74 Free Thyroid Hormone Index, Thyroid Hormone/Thyroxine-Binding Globulin Ratio, Triiodothyronine Uptake, and Thyroxine-Binding Globulin Compared for Diagnostic Value Regarding Thyroid Function

Timothy J. Wilke

80 Measurement of Glucose in Plasma by a Differential pH Technique

M. Luzzana, G. Dossi, A. Mosca, A. Granelli, D. Berger, E. Rovida, M. Ripamonti, A. Musetti, and L. Rossi-Bernardi

86 Estrone Sulfate Concentrations in Plasma of Normal Individuals, Postmenopausal Women with Breast Cancer, and Men with Cirrhosis

Agnès Rémy-Martin, Odile Prost, Monique Nicotier, Josette Burnod, and Gérard L. Adessi

90 Soluble Forms of γ -Glutamyltransferase in Human Adult Liver, Fetal Liver, and Primary Hepatoma Compared

P. Selvaraj and K. A. Balasubramanian

96 Characterization and Elimination of a Factor in Serum that Interferes with Turbidimetry and Nephelometry of Lipase

H. Kannisto, M. Lalla, and E. Lukkari

100 Separation of Alkaline Phosphatase Isoenzymes from Human Kidney and Comparison with Alkaline Phosphatases from Other Human Tissues, Urine, and *Escherichia coli*

Alan W. Hodson

107 Multivariate Analysis of Plasma Enzyme Profiles in Severe Head Injury

A. Bourguignon, G. Ferard, G. Jung, Th. Klumpff, and P. Metais

110 Effect of Temperature on the p_{50} Value for Human Blood

M. Samaja, D. Melotti, E. Rovida, and L. Rossi-Bernardi

115 Use of Monoclonal Antibodies to Detect Human Placental Alkaline Phosphatase

Guy De Groote, Peter De Waele, Andre Van de Voorde, Mark De Broe, and Walter Fiers

120 Immunochemical Determination of Apolipoprotein A-1 in Hyperlipoproteinemic Serum

Claus-Chr. Heuck, Ingeborg Erbe, and Pia Flint-Hansen

1534 Transcutaneous Carbon Dioxide for Short-Term Monitoring of Neonates

Gerald J. Kost, John L. Chow, and Margaret A. Kenny

1537 Human Placenta as a Convenient Source of Creatine Kinase BB

Jean P. Steghens, Irène Maire, and Monique Mathieu

1540 Quantitation of Haptens by Homogeneous Immunoprecipitation. 2. Centrifugal Analysis for Tobramycin, Phenobarbital, and Theophylline in Serum

Joseph W. Wu, Chaiyun Bunyagidj, Somsong Hoskin, Suzanne M. Riebe, Jan Aucker, Karen White, and Sean P. O'Neill

1543 Simultaneous Liquid-Chromatographic Determination of Hypoxanthine, Xanthine, Urate, and Creatinine in Cerebrospinal Fluid, with Direct Injection

Frank Niklasson

1546 Test-Request Patterns for Clinical Chemistry in a British and a Canadian Renal Dialysis Unit

Mary D. Gardner and A. Ralph Henderson

CASE REPORT

1549 High Creatine Kinase MB Isoenzyme Activity Associated with a Rhabdomyosarcoma

Peter E. Hickman, S. Messina, J.M. Trotter, and J.R.L. Masarei

LETTERS

1551 Further Evaluation of a Specific-Gravity Test Strip

Seymour Winsten, Stanley E. Gordesky, and Elsie M. Riggs

1551 Free and Total Lysozyme Determined in Parotid Saliva

Nicholas M. Papadopoulos, Robert O. Wolf, and Anthony Tylden

- 1552 **Serum Lactate Dehydrogenase Isoenzyme 1 (LDH 1) in a Patient with Seminoma**
Adrian O. Vladutiu
- 1553 **Lack of Cross Reactivity of Peptide YY (PPY) and Neuropeptide Y (NPY) with Antibodies to Pancreatic Polypeptide (PP) in Radioimmunoassay**
Mairead M.T. O'Hare, Mei-Huei Chen, Kazuhiko Tatemoto, Keith D. Buchanan, Stephen N. Joffe, and Richard F. Murphy
- 1554 **Ionized Calcium and the Donnan Effect**
J. Thode, N. Fogh-Andersen, and O. Siggaard-Andersen
- 1555 **Correction Factors for Hemoglobin Derivatives in Fetal Blood, as Measured with the IL 282 CO-Oximeter**
P.J.H. Cornelissen, C.L.M. van Woensel, W.C. van Oel, and P.A. de Jong
(Reply)
W.G. Zijlstra, A. Buursma, J. Koek, and A. Zwart
- 1556 **Rate Nephelometric Determination of IgE**
Randall W. Yatscoff and James Crumb
(Reply)
Oscar E. Beck
- 1557 **Measurement of Cobalamin Analogue(s) in Biological Material by Current Techniques Is Erroneous**
Sheldon P. Rothenberg and George Marcoullis
- 1558 **Reminder: Cresol and Phenol Preservatives Interfere with Analysis for Glucose with the YSI Analyzer**
D. Peel, J.D.S. Kay, and F. Taylor
- 1559 **Insulin Immunoreactivity Stabilized in Serum and Plasma at Ambient Temperatures**
John Livesey, Richard A. Donald, and Helen K. Roud
- 1559 **Conclusions from a Pilot Immunoreactive Trypsin Newborn Screen for Cystic Fibrosis**
L.T. Kirby, A.G.F. Davidson, D.A. Applegarth, L.T.K. Wong, and D.F. Hardwick
- 1560 **Abnormally High Concentrations of β_2 -Microglobulin in Acquired Immunodeficiency Syndrome (AIDS) Patients**
Ravi B. Bhalla, Bijan Safai, Roland Mertelsmann, and Morton K. Schwartz
- 1560 **Choice of a Satisfactory Evacuated Blood-Collection Tube for Magnesium and Zinc Assays**
Michelle Speich and Simone Gelot
- 1561 **Cerebrospinal Fluid Immunoglobulin D in Myasthenia Gravis**
Rameshwar Prasad
- 1562 **Unusual Lactate Dehydrogenase Isoenzyme Pattern in Rhabdomyolysis**
Amin A. Nanji and Morris R. Pudek
- 1562 **Heparin Solution as a Source of Error in Blood Gas Determinations**
M. Turton
(Reply)
L.D. Mellor and V.T. Innanen
- 1563 **Plasma Ammonia Concentration during the First Six Postnatal Months, as Measured with an Ammonium-Selective Electrode**
Richard J. Cooke and Robert L. Jensen

- 1564 **Lidocaine Is Stable in Serum and Blood**
Barry Levine, Robert Blanke, and James Valentour
- 1564 **Evaluation of the Bromocresol Purple Method for Albumin as Used with the aca**
Diane D. Davey, Tony Austin, Wells R. Moorehead, and Tijen O. Oei
- 1565 **Use or Abuse of the Fluorescence Polarization Measurement of Amniotic Fluid for Determination of Fetal Lung Maturity?**
D.O.E. Gebhardt
(Reply)
M. Shinitzky and G. Barkai
- 1566 **pH Measurement with a Fiber-Optic Tissue-pH Monitor and a Standard Blood-pH Meter**
Joseph S. Suidan, Bruce K. Young, Fredrick W. Hetzel, and Herbert R. Seal
- 1566 **Improved Photography of Silver-Stained Two-Dimensional Electrophoresis Gels**
Harold H. Harrison
- 1567 **IL System 1303: Problem Resolved**
Henry J. Garfield and Don C. Davidson
- 1567 **Substrate-Labeled Fluorescent Immunoassay for Ethosuximide Evaluated**
Sandra M. Walker and Robert E. Hill
- 1568 **Lactate Dehydrogenase and Its Isoenzymes in Human Milk—a Preliminary Study**
Kumud P. Patil and Neelima R. Rangnekar
- 1570 **Sex- and Age-Related Differences in Activity of Angiotensin-Converting Enzyme in Serum**
Ernest Beutler and Carol West
- 1570 **Computers Should Be More Widely Used in Quality Control**
Ralph E. Thiers
- 1572 **Improved Liquid-Chromatographic Determination of Lidocaine and Its Desethylated Metabolites in Serum**
R. Lindberg, J.S. Salonen, and E. Laurikainen
- 1573 **Potential Error on Beckman Astra-8 Print-Out Sheet**
Chaidong Cho and Alan B. Warren
- 1574 **BOOK REVIEW**
G. Thomas Passananti
- 1575 **THE CLINICAL CHEMIST**
J. Stanton King

SEPTEMBER

INTRODUCTION

- 1577 Carl A. Burtis, Charles D. Scott, Arthur Karmen, Robert S. Melville, Thomas O. Tiffany, and Peter Wilding

I ANALYTICAL CONCEPTS

- 1578 **Simplified Methods for Measuring Enzyme Kinetics in a Single Cell**
Nenad S. Marković, Olivera T. Marković, and Donald S. Young
- 1582 **Immunoassay Techniques with Fluorescent Phycobiliprotein Conjugates**
Mel N. Kronick and Paul D. Grossman

- 1587 **Novel Liposome Composition for a Rapid Colorimetric Test for Systemic Lupus Erythematosus**
Andrew S. Janoff, Sharon Carpenter-Green, Alan L. Weiner, James Seibold, Gerald Weissmann, and Marc J. Ostro
- 1593 **Development of a Screening System for Cystic Fibrosis**
Arthur J. Coury, Eric J. Fogt, Marye Sue Norenberg, and Darrel F. Untereker
- 1598 **An Internally Referenced Test Strip Immunoassay for Morphine**
David J. Litman, Rita H. Lee, Henry J. Jeong, Henry K. Tom, S.N. Stiso, N. Chung Sizto, and Edwin F. Ullman
- 1604 **Homogeneous Immunoassay Based on Chemiluminescence Energy Transfer**
Ashok Patel and Anthony K. Campbell

II ANALYTICAL SYSTEMS

- 1609 **Discrete Automated Chemistry System with Tableted Reagents**
Richard C. Driscoll, Richard B. Edwards, Max D. Liston, Thomas W. Love, John C. Mazza, and John E. Trafton
- 1616 **Use of Laser-Excited Fluorescence to Measure Mixed-Function Oxidase Activity**
B.Z. Egan, N.E. Lee, C.A. Burtis, J.Y. Kao, and J.M. Holland
- 1620 **Use of a Solid-State Multihead Gamma Counter in a Second-Generation System for Solid-Phase Immunoassay**
George H. Parsons, Jr., Charles H. Rogers, Rosemary Polsky-Cynkin, Anne M. Wood, Laughton E.M. Miles, and Arthur H. Rogers
- 1628 **Automated Fluorometer/Photometer System for Homogeneous Immunoassays**
Thomas M. Li, Steven P. Robertson, Thomas H. Crouch, Edward E. Pahuski, Gerald A. Bush, and Steven J. Hydo
- 1635 **Applications of Fast Protein Liquid Chromatography in the Separation of Plasma Proteins in Urine and Cerebrospinal Fluid**
E.H. Cooper, R. Turner, E.A. Johns, H. Lindblom, and V.J. Britton
- 1641 **Molecular Markers of Hemostatic Disorders: Implications in the Diagnosis and Therapeutic Management of Thrombotic and Bleeding Disorders**
Jawed Fareed, Rodger L. Bick, Grace Squilacci, Jeanine M. Walenga, and Edward W. Bermes, Jr.

III ADVANCED SPECTROSCOPY

- 1659 **New Techniques and Tools for Clinical Chemistry**
Gary M. Hieftje
- 1665 **Photoelectroanalytical Chemistry: Possible Interferences in Serum and the Selective Detection of Tris(2,2'-bipyridine)-ruthenium(II) in the Presence of Interferents**
Stephen G. Weber, Donald M. Morgan, and Janean M. Elbicki
- 1673 **Evaluation of Multi-Wavelength Derivative Spectra for Quantitative Applications in Clinical Chemistry**
William E. Weiser and Harry L. Pardue

1678 Optical Fiber Fluoroprobes in Clinical Analysis

Michael J. Sepaniak, Bruce J. Tromberg, and Jerome F. Eastham

1683 Trace Metal Analysis by Laser-Enhanced Ionization in Flames

J.C. Travis, G.C. Turk, and J.R. DeVoe

LETTERS

1687 Stable Glycosylated Hemoglobin as Measured by a Microcolumn Method

Angelo Carenini, Andrea Mosca, and Guido Pozza

1688 Assay of Thyrotropin in Hyperthyroidism

Norman P. Kubasik, Daniel G. Same, Robert G. Brodows, and Harrison E. Sine

1689 Variation among Insulin Radioimmunoassays Is Mainly a Matter of Standardization

W. Kortland and J.H.H. Thijssen

1689 Economical Multiple Spotter for Thin-Layer Chromatography

J.S. Cridland

1690 EMIT Assay Curve Stability

Jay E. Gorsky

1690 Concentrated Gelatin Diminishes Background Fluorescence on Cellulose-Nitrate Discs in the "FIAX" Fluorometric Immunoassay

Bernard H. Berne

1691 Abnormally High Values for Direct Bilirubin in Serum as Measured with the Technicon SMAC

John Vasilades, Sharon Monaco, Pam Miller, and Jean Lauer

1691 Anatomically Related Variations in Trace-Metal Concentrations in Hair: A Comment

G. Steinbach, H. Pfeleger, and V. Maier

1701 Du Pont aca and Dow AST/ALT-UV (PLP Activated)-Centrifugal Analyzer Serum Aspartate Aminotransferase Assays Compare Well

Alan D. Proia

1702 Free-Thyroxine Concentration as Affected by Major Illness

R.J. Mardell, T.R. Gamlen, J.E.M. Midgley, and T.A. Wilkins

1703 Direct Radioimmunoassay and Gas Chromatography—Mass Spectrometry Compared for Determination of Melatonin in Plasma

S. Fraser, P. Cowen, M. Franklin, and A.J. Lewy

1704 Analysis of Thorotrast Granuloma by Scanning Auger Microscopy

A. Lanir, J. Boss, J.E. Naschitz, and D. Yeshurun

1704 A Simple Kinetic Assay for Plasma Ammonia, Suitable for Small Laboratories

Josephine T. Lee and Philip K. Li

1705 Plasma Carbamazepine Determination by Substrate-Labeled Fluorescent Immunoassay Compared with Liquid Chromatography and EMIT

Kan Chiba, Keiko Kushida, and Takashi Ishizaki

1707 BOOK REVIEWS

Simone Silberman, Robert L. Habig, Robert Rej, J.S. King, and Samuel Natelson

1710 THE CLINICAL CHEMIST

J.S. King

OCTOBER

1713 Simple, Rapid Spectrophotometry of Urinary N-Acetyl-β-D-glucosaminidase, with Use of a New Chromogenic Substrate

Akira Noto, Yasunao Ogawa, Sachio Mori, Mitsuru Yoshioka, Takeshi Kitakaze, Takashi Hori, Masuhisa Nakamura, and Tamotsu Miyake

1717 Assay of Urinary N-Acetyl-β-glucosaminidase in a Centrifugal Analyzer

Samuel C. Powell, Judy Scaro, Elma Wilson, and Z.K. Shihabi

1720 An Immunoradiometric Assay for Erythrocyte Complement (C3b) Receptor Activity Applied to a Pediatric Population with Connective Tissue Disease

G.J. Buffone, C.M. Leatherwood, D.A. Person, and E.J. Brewer

1724 Clinical Acceptance of a Multi-Test Reference Region for Biochemical-Panel Results

Timothy C. Durbridge

1727 Cathodal Bands in Electrophoretograms of Creatine Kinase Isoenzymes in Serum Collected af-

ter Cardiac Surgery: A Poor Prognostic Sign

Albert A. Keshgegian and Betty Lou Marchant

1731 Preparation of Soluble Apolipoproteins A-I, B, and C-II by a Chromatofocusing Column Method, and Evaluation of Their Concentrations in Serum in Pulmonary Disease

Matti Jauhainen, Matti Laitinen, Jukka Marniemi, Kari Liipo, Ilkka Penttilä, and Eino Hietanen

1736 Protocol for the Study of Drug Interferences in Laboratory Tests: Cefotaxime Interference in 24 Clinical Tests

Daniel M. Baer, Ronald N. Jones, John P. Mullooly, and Wilhelmina Horner

1741 A "Column-Batch" Method for Separating MB and LD₁ in a Single Fraction

Leo G. Morin and Earl G. Barton

1746 Comparison of a Commercially Available Assay System with Two Reference Methods for the Determination of Plasma Cholinesterase Variants

Mary Whittaker, Judith J. Britten, and Peter J.G. Dawson

1752 Hormones in Saliva: Mode of Entry and Consequent Implications for Clinical Interpretation

Ross F. Vining, Robynne A. McGinley, and Richard G. Symons

1757 Comparison of a Logistic and a Mass-Action Curve for Radioimmunoassay Data

Gillian M. Raab

1762 Response Curves for Radioimmunoassay

D.J. Finney

1767 Liquid-Chromatographic Assay and Identification of Mono- and Diester Conjugates of Bilirubin in Normal Serum

Maurizio Muraca and Norbert Blancaert

1772 Purification and Characterization of Human Pancreatic Phospholipase A₂

Jarkko U. Eskola, Timo J. Nevalainen, and Heikki J. Aho

1777 Time-Resolved Fluoroimmunoassay of Human Pancreatic Phospholipase A₂

Jarkko U. Eskola, Timo J. Nevalainen, and Timo N.-E. Lövgren

1781 Free Thyroxine by Radioimmunoassay: Evaluation of a New Direct Method Involving a Radiolabeled Thyroxine Analog

Norman P. Kubasik, Per-Arne Lundberg, Robert G. Brodows, Glenn D. Hallauer, Daniel G. Same, Göran Lindstedt, Calle Bengtsson, and Ernst Nyström

SCIENTIFIC NOTES

1787 Electroimmunoassay of Albumin in Human Serum: Accuracy and Long-Term Precision

Mark W. Pascucci, Daniel W. Grisley, Jr., and Royden N. Rand

1790 Semi-Automated Continuous-Flow Enzyme Immunoassay for Antiepileptic Drugs in Serum

Sadao Hayashi, Shigeru Kurooka, Kazutaka Arisue, Kazuma Kohda, and Chozo Hayashi

1793 Determination of Bethanidine in Plasma by Liquid-Chromatography with a Microbore Reversed-Phase Column

James R. Shipe, Annette F. Arlinghaus, John Savory, Michael R. Wills, and John P. DiMarco

1796 Direct Measurement of Testosterone in a Pediatric Center, with Use of a Radioimmunoassay Kit and Unextracted Serum

Linda J. Funderburgh, William B. Zipf, and Juan F. Sotos

1798 Kinetic Enzymic Method for Automated Determination of Total Cholesterol in Serum

Rolf Deeg and Joachim Ziegenhorn

1803 Polarization Fluoroimmunoassay of 11-Deoxycortisol in Serum and Saliva

A.A.K. Al-Ansari, M. Massoud, L.A. Perry, and D.S. Smith

1806 24,25-Dihydroxyvitamin D₃ in Serum: Sample Purification with Sep-Pak C-18 Cartridges and Liquid Chromatography before Protein-Binding Assay

M.L. Traba, M. Babé, C. de la Piedra, and A. Marin

1808 Solid-State Extraction of Cortisol from Plasma or Serum for Liquid Chromatography

Bernard T. Hofreiter, Angélique C. Mizera, John P. Allen, A.M. Masi, and William C. Hicok

1810 Evidence for Interference by Ascorbate in the Measurement of Cerebrospinal Fluid Glucose by a Kinetic Glucose Oxidase/Peroxidase Procedure
Gerald A. Maguire and Christopher P. Price

1812 Five Recent Urinary Tests for Early Pregnancy Evaluated
Kenneth W. Ryder, Robert A. Munsick, Tijen O. Oei, Peter C. Young, and H. Frances Blackford

1815 Quantification of Urinary Oxalate with Oxalate Oxidase from Beet Stems
David M. Obzansky and K.E. Richardson

1819 An Equilibrium Model of the Oxygen Association Curve of Normal Human Erythrocytes under Standardized Conditions
Richard G. Ryall and Colin J. Story

1823 Kinetic Enzymic Assay for D(-)-Lactate, with Use of a Centrifugal Analyzer
Carl W. Ludvigsen, Joseph R. Thurn, Gordon L. Pierpont, and John H. Eckfeldt

1825 Salivary Urea Nitrogen as an Index to Renal Function: A Test-Strip Method
Toshihiro Akai, Keiichi Naka, Chikao Yoshikawa, Kiyoshi Okuda, Teruo Okamoto, Seiji Yamagami, Takashi Inoue, Yasuo Yamao, and Shigeki Yamada

1828 An Evaluation of 10 Kits for Determination of Human Chorionadotropin in Serum
Joan L. Rasor, Sergio Farber, and Glenn D. Braunstein

1832 Abnormal Regulation of Pyridoxal 5'-Phosphate in Reye's Syndrome
Bahjat A. Faraj, Vernon M. Camp, Daniel B. Caplan, Peter A. Ahmann, and Michael Kutner

1834 Profiles of Urinary Volatiles from Metabolic Disorders Characterized by Unusual Odors
Daniel G. Burke, Berthold Halpern, Don Malegan, Eric McCairns, David Danks, Peter Schlesinger, and Bridget Wilken

1838 Optimizing Reference Values for the Measurement of Alpha₁-Antitrypsin in Serum: Comparison of Three Methods
Laima Gaidulis, Helmut A. Muensch, William C. Maslow, and William Z. Borer

1840 Liquid-Chromatographic Determination of Alpha- and Gamma-Tocopherols in Erythrocytes, with Fluorescence Detection
Joanna Lehmann and Hilda L. Martin

1842 A Unique Protein in Normal Human Cerebrospinal Fluid
Nicholas M. Papadopoulos, Peter A. LeWitt, Richard P. Newman, Marc I. Raphaelson, and Thomas N. Chase

CASE REPORTS

1845 Two Macromolecular Complexes between Alkaline Phosphatase and Immunoglobulin A in a Patient's Serum
Philip R. Wenham, Brian Chapman, and Alistair F. Smith

1869 Radioimmunoassay of Cortisol in Saliva with the "GammaCoat" Kit
Anne C. Silver, J. Landon, D.S. Smith, and L.A. Perry

1870 Discrepant Results for Determination of Theophylline in Serum from a Patient with Renal Failure
Ronald J. Elin, Mark Ruddel, W.R. Korn, and Bernard C. Thompson

1870 Human Thyrotropin Radiolabel: Specific Activity, Zero Binding, and Stability
James J. Hagan, Jan I. Tu, D.R.K. Murty, and Eileen L. Nickoloff

1871 False-Positive Results for Chorionadotropin in Serum
Patricia E. Garrett, Sanford R. Kurtz, and Joseph K. Hurd, Jr.

1871 Effect of Protein on Determination of Total Bile Acids in Serum Is Minimized by Preheating the Sample
Kristian Linnet

1872 More on Contaminated Water Purification Cartridges
Stephen P. Coburn

1873 BOOK REVIEWS
Harold Grady, Robert McComb, George N. Bowers, Jr., and Helen K. Berry

1875 THE CLINICAL CHEMIST
J.S. King

NOVEMBER

19A 1984 CALL FOR ABSTRACTS

1877 REVIEW: Temperature Correction of Blood-Gas and pH Measurements
Edward R. Ashwood, Gerald Kost, and Margaret Kenny

1886 Isolation and Characterization of Electrophoretic Variants of Human Prostatic Acid Phosphatase
Michael D. Hibbard, Robert C. McCarthy, and Harold Markowitz

1890 Monoclonal Antibodies to Human Plasma Low-Density Lipoproteins. I. Enhanced Binding of ¹²⁵I-Labeled Low-Density Lipoproteins by Combined Use of Two Monoclonal Antibodies
Simon J.T. Mao, James G. Patton, Juan-José Badimon, Bruce A. Kottke, Michael C. Alley, and Alan D. Cardin

1898 Monoclonal Antibodies to Human Plasma Low-Density Lipoproteins. II. Evaluation for Use in Radioimmunoassay for Apolipoprotein B in Patients with Coronary Artery Disease
James G. Patton, Juan-José Badimon, and Simon J.T. Mao

1904 Prognostic Value of Combined Data on Enzymes and Inflammation Markers in Plasma in Cases of Severe Head Injury
A. Bourguignat, A. Albert, G. Féraud, P.A. Tulasne, I. Kempf, and P. Métais

1908 Clinical Evaluation of Two Direct Procedures for Free Thyroxine, and of Free Thyroxine Index Determined Nonisotopically and by Measuring Thyroxine-Binding Globulin
John M. Waud, Daniel W. Chan, Helen M. Drew, Manuel J. Oropeza, Maria S. Sucupira, Barbara Scheinin, Grace M. Garrison, Marvin Mayo, Eleanor Taylor, Juanita Stem, David Graham, Joseph T. Coyle, Jennifer Niebyl, and Henry N. Wagner, Jr.

1912 DNA Interference with Radioimmunoassay Procedures
Noboru Matsuo and S.S. Koide

1916 Evaluation of Accuracy of 20 Different Test Kits for the Enzymic Determination of Cholesterol
P.N.M. Demacker, G.J.M. Boerma, H. Baadenhuijsen, R. van Strik, B. Leijnse, and A.P. Jansen

1923 Radioimmunoassay for Pancreatic Polypeptide, and Its Age-Related Changes in Concentration
M.M.T. O'Hare, J.G. Daly, and K.D. Buchanan

1928 An Enzyme-Linked Immunosorbent Assay for Lactose Synthase (Galactosyltransferase) in Serum and Its Application as a Tumor Marker in Ovarian Carcinoma
Bernadette Verdon, Eric G. Berger, Sonja Salchli, Aron Goldhirsch, and Andreas Gerber

1934 Concurrent Measurement of Theophylline and Caffeine in Neonates by an In-

Interference-Free Liquid-Chromatographic Method

- 1937 **Separation of Bound and Free Ligand by Ethacridine (Rivanol™) in Thyroxine Radioimmunoassay**
Ching-Nan Ou and Vicki L. Frawley
V. Bhupal and R.S. Mani

- 1941 **Spectrophotometric Method for Selective Assay of the Five Isoenzymes of Human Lactate Dehydrogenase, Based on Their Different Stabilities at Alkaline pH**
Norimasa Takizawa, Jun-iti Yamauti, Yohji Marui, Chozo Hayashi, Jinpei Yamashita, and Takekazu Horio

- 1946 **Evaluation of the Coomassie Brilliant Blue G-250 Method for Urinary Protein**
John A. Lott, Vicki A. Stephan, and Kirkwood A. Pritchard, Jr.

- 1951 **(3-sn-Phosphatidyl)cholines (Lecithins) in Amniotic Fluid**
Joseph C. Touchstone, Sidney S. Levin, Murrell F. Dobbins, Lorianne Matthews, Philip C. Beers, and Steven G. Gabbe

- 1955 **A Radioisotopic Method for Fructose-1-phosphate Aldolase Assay That Facilitates Diagnosis of Hereditary Fructose Intolerance**
Yoon S. Shin, Vinco Moro, Hanni Doliwa, and Wolf Endres

SCIENTIFIC NOTES

- 1959 **Effect of Short-Term Storage Conditions on Alcohol Concentrations in Blood from Living Human Subjects**
Charles L. Winek and Louette J. Paul

- 1961 **Evaluation of a Radioimmunoassay for Estradiol in Unextracted Serum**
Richard Mertens, Raymond J. Liedtke, and John D. Batjer

- 1964 **Evaluation of a Solid-Phase Enzyme Immunoassay for Human Chorionadotropin β Subunit**
Diane D. Davey, Martha M. Sample, and Tijen O. Oei

- 1966 **Quality-Control Sera for Routine Determination of Aluminum by Electrothermal Atomic Absorption Spectroscopy**
Fred Y. Leung and A. Ralph Henderson

- 1969 **The Chemical Basis and Specificity of the Nitrosonaphthol Reaction**
J.A. Knight, G. Robertson, and J.T. Wu

- 1972 **Seven Different Digoxin Immunoassay Kits Compared with Respect to Interference by a Digoxin-Like Immunoreactive Substance in Serum from Premature and Full-Term Infants**
Morris R. Pudek, David W. Seccombe, Beryl E. Jacobson, and Michael F. Whitefield

- 1974 **Determination of Ultrafiltrable Zinc in Plasma by Flameless Atomic Absorption Spectrophotometry**
Robert C. Whitehouse, Ananda S. Prasad, and Zafarallah T. Cossack

- 1977 **Assay of Urinary Oxalate: Six Methodologies Compared**
Joseph E. Zerwekh, Ed Drake, John Gregory, Donald Griffith, Alan F. Hofmann, Mani Menon, and Charles Y.C. Pak

- 1980 **Time-Course of Cigarette Smoke Contamination of Clinical Hydrogen Breath-Analysis Tests**
Andrea Rosenthal and Noel W. Solomons

- 1982 **Preparation of F(ab')₂ Fragments of Immunoglobulin G**
Jerald J. Killian and Elizabeth M. Holtgrewe

- 1984 **Changes in Serum Iron and Leukocyte Count Associated with Open-Heart Surgery**
Edward J. Fitzsimons and Garth H. Ballantyne

- 1987 **Addendum: Product Guide for Radioassays and Non-Isotopic Ligand Assays (3rd ed.)**

LETTERS

- 1989 **Simply Diluting Serum before Radioimmunoassay Does Not Prevent Binding of Prednisolone to Protein**
Seizo Iwayama, Takehiko Yasaki, Takao Miyata, and Yoshizo Asano

- 1989 **Heparin Does Not Interfere with the Measurement of Plasma Albumin by Bromocresol Purple**
B. Hill, D.W. Wilson, R.P. Hill, and P.G. Hill

- 1990 **Spectrophotometric and Radiometric Assays of Angiotensin-Converting Enzyme Compared**
John F. O'Brien, Rodney W. Forsman, and Michael S. Rohrbach

- 1991 **"Glycated Hemoglobin," Not "Glycosylated" or "Glucosylated"**
Marc Roth

- 1991 **Criticism of Glucose Test Comparison**
Mark T. Skarstedt
(Reply)
Zoltan L. Bandi

- 1992 **Concentrations of Dehydroepiandrosterone Sulfate in the Plasma of Normal and Abnormal Women**
Roy Moncayo and Siegfried Schwarz

- 1993 **Measuring Urate in the Technicon SMAC by Using Unbound Uricase and Omitting Dialysis**
Niall O'Leary, John Devoy, and P. Finbarr Duggan

- 1994 **A New Direct Method for Serum Estradiol**
Joseph D. Musto, John M. Pizzolante, Vincent P. Chesarone, and Adrian Leek

- 1994 **Improved Sensitivity of Aminoglycoside Enzyme Immunoassays**
Jay E. Gorsky, Philip R. Bach, and William Wong

- 1995 **Lecithin:Cholesterol Acyltransferase Activity in Plasma of Patients with Multiple Sclerosis**
James M. Van Alstine, Kenneth Hon, J. Frohlich, and Donald E. Brooks

- 1996 **Additional Applications of the Fernandez-Loeb Plot in Radioimmunoassays**
C.S. Chiang
(Reply)
Alberto A. Fernandez and George W. Stevenson

- 1997 **Is There an Enzymatic Reversibility of Nonenzymatic Glycosylation of Hemoglobin?**
Vincent M. Monnier

- 1997 **Reducing Equivalents and Ethanol Metabolism**
Robert A. Stinson

- 1997 **Serum Thyrotropin and More Accurate Diagnosis of "Thyroid Hormone Resistance"**
Göran Lindstedt, Per-Arne Lundberg,

- Ernst Nyström, Lars-Erik Tisel, Ragnar Olegård, and Otto Westphal

- 1999 **Two Liquid and Lyophilized Control Materials Compared**
Harvey George, Patricia E. Garrett, and Sanford R. Kurtz

- 2000 **Assessment of a Computerized Diagnostic Program for Serum Protein Electrophoresis**
Jana McLester and Fred Y. Leung

- 2001 **Interference by Intravenous Fluorescein with Drug Assays in the Abbott TDx**
Mary Carol Schneider, Barry K. Rayburn, and Roger Frve

- 2001 **Enzymic Determination of Total Cholesterol in Skin Tissue**
A. Aoudiet, J. de Graeve, J.C. Thiers, P. Valdiguié, and H. Bouissou

- 2002 **Determination of Creatinine in Serum by Using Creatininase: Enhancement of a Commercial Method**
Paul W. Landesman and John A. Lott

- 2003 **Pancreatic Lipase in Serum of Patients with β -Thalassemia Major**
D. Junglee, A. Katrak, A.V. Hoffbrand, and P. Dandona

- 2004 **Long-Term Precision of Carcinoembryonic Antigen Assays**
Norman P. Kubasik and Harrison E. Sine

- 2005 **BOOK REVIEWS**
Robert L. Wolen, M.H. Jonckheer, Gefard Siést, Mary F. Burritt, Steven M. Faynor, and Jeffrey A. Huth
